STUDIES ON SOME FACTORS AFFECTING THE PRODUCTIVITY OF PEANUT CROP

By

Ahmed Osama Mohamed Attia El-Nemr
B.Sc. (Agric. Sci.), Zagazig University, 1974
M.Sc. (Agronomy), Suez Canal University, 1989

Thesis

**Submitted in Partial Fulfillment of the
Requirements for the Degree of
Doctor of Philosophy
In
Agricultural Science
Agronomy**

**Department of Agronomy
Faculty of Agriculture
Suez Canal University
Ismailia
2003**

STUDIES ON SOME FACTORS AFFECTING THE PRODUCTIVITY OF PEANUT CROP

By

Ahmed Osama Mohamed Attia El-Nemr
B.Sc. (Agric. Sci.), Zagazig University, 1974
M.Sc. (Agronomy), Suez Canal University, 1989

Supervised By

Prof. Dr. A. M. Abdel-Wahab
Professor of Agronomy
Faculty of Agric., Suez Canal University

A.M. Abdel-Wahab

Prof. Dr. G. M. Yakout
Professor of Agronomy
Faculty of Agric., Suez Canal University

G.M. Yakout

Prof. Dr. S. K. El-Shamy
Professor of Economic
Faculty of Agric., Suez Canal University

Prof. Assist. Dr. S. I. Hafiz
Assistant Professor of Agronomy
Faculty of Agric., Suez Canal University

S.I. Hafiz

Ahmed Osama Mohamed Attia El-Nemr

APPROVAL SHEET

STUDIES ON SOME FACTORS AFFECTING THE PRODUCTIVITY OF PEANUT CROP

By

Ahmed Osama Mohamed Attia El-Nemr
B.Sc. (Agric. Sci.), Zagazig University, 1974
M.Sc. (Agronomy), Suez Canal University, 1989

**This Thesis for the degree of Doctor of Philosophy (Ph.D)
in Agricultural Science (Agronomy) has been approved by:**

Prof. Dr. Nabil A. Khalil

Professor of Agronomy,
Faculty of Agriculture, Cairo University

N. A. Khalil

Prof. Dr. Ahmed A. Mohamed

Professor of Agronomy,
Faculty of Agriculture, Suez Canal University

A. Awad

Prof. Dr. Abd-El-Fatah M. Abd El-Wahab

Professor of Agronomy,
Faculty of Agriculture, Suez Canal University

A. M. Abd-El-Wahab

Prof. Dr. Gamal M. Yakout

Professor of Agronomy,
Faculty of Agriculture, Suez Canal University

G. M. Yakout

Committee in Charge

CONTENTS**Page No.**

INTRODUCTION	1
REVIEW OF LITERATURE	3
A: Effect of phosphorus and potassium fertilization	3
B: Effect of micronutrients	22
C: Effect of biofertilizer	30
D: Effect of growth retardants	35
E: Varietal differences	46
MATERIALS AND METHODS	51
RESULTS AND DISCUSSION	58
I- Vegetative growth characteristics	58
I-1- Plant height (cm)	58
I-2- Number of branches/plant	62
I-3- Dry weight of branches/plant	65
I-4- Dry weight of leaves/plant (g)	69
I-5- Number of pods/plant	72
I-6- Dry weight of pods/plant (g)	75
I-7- Total dry weight/plant (g)	78
II- Yield, yield components and yield quality	82
II-1- Number of surviving plants/fed at harvest	82
II-2- Number of pods/plant	86
II-3- Dry weight of pods/plant (g)	91
II-4- Number of seeds/plant	96
II-5- Seed yield/plant (g)	100
II-6- 100 seed weight of (g)	104
II-7- Pod yield/fed (ardab)	108
II-8- Foliage yield/fed. (kg)	115
II-9- Seed oil content (%)	119
II-10 Seed protein content (%)	122
III- Water use efficiency (g pods/m³ water)	126
SUMMARY	131
REFERENCES	138
ARABIC SUMMARY	

List of Tables

List of Tables

Table (1): Some mechanical and chemical properties of the experimental soils	55
Table (2): The monthly average of temperature and relative humidity during the two growing seasons at Ismailia Governorate.	55
Table (3): Effect of varieties, fertilization treatments and their interaction on plant height (cm) under surface and sprinkler irrigation systems (combined data of 2000 and 2002 seasons.	59
Table (4): Effect of varieties, fertilization treatments and their interaction on number of branches/plant under surface and sprinkler irrigation systems (combined data of 2000 and 2002 seasons.	63
Table (5): Effect of varieties, fertilization treatments and their interaction on dry weight of branches (g)/plant under surface and sprinkler irrigation systems (combined data of 2000 and 2002 seasons.	66
Table (6): Effect of varieties, fertilization treatments and their interaction on dry weight of leaves (g) / plant under surface and sprinkler irrigation systems (combined data of 2000 and 2002 seasons.	70
Table (7): Effect of varieties, fertilization treatments and their interaction on number of pods/plant under surface and sprinkler irrigation systems (combined data of 2000 and 2002 seasons.	74
Table (8): Effect of varieties, fertilization treatments and their interaction on dry weight of pods (g./plant) under surface and sprinkler irrigation systems (combined data of 2000 and 2002 seasons.	76
Table (9): Effect of varieties, fertilization treatments and their interaction on total dry weight (g) /plant under surface and sprinkler irrigation systems (combined data of 2000 and 2002 seasons.	79
Table (10): Effect of varieties, fertilization treatments and their interaction on number of surviving plants at harvest/fad under surface and sprinkler irrigation systems during 2000 and 2002 seasons.	83
