ACKNOWLEDGMENT

I would like to thank **Dr. Mohammed Samara El-Dahlouty**, Professor of Nutrition and Food Science, Faculty of Home Economics, Menoufia University, Shebin El-Kom, Egypt, for his supervision and great helpful throughout the course of this investigation.

Deep thanks and appreciation are also due to **Dr. Fatty El-Sahara Amen El-Sheriff**, Associated Professor of Faculty of Home Economics, Menoufia University, Shebin El-Kom, Egypt, for his general logistical support, helpful efforts and continuous supervision.

Profound gratitude, Sincere appreciation and infinite thanks are also extended to **Dr. Yousif Abd El-Aziz Elhassaneen**, Lecturer of Nutrition and Food Science, Faculty of Home Economics, Al-Menoufia University, Shebin El-Kom, Egypt, for his supervision, great helpful, valuable suggestions and criticism, and guidance in presenting this study. Also, Dr. Yousif offered me every possible assistance during the course of this study involving the experimental design, the operation of chemical analysis apparatus, estimation of toxic and carcinogenic compounds ...etc. (no easy task). Really, his advises, encouragements and helpful were and still endless as well as a constant source of strengt.

Finally, my deepest thanks are expressed to all post graduate colleagues working with Dr. Yousif Abd El-Aziz El-Hassaneen, in particular Mrs. Sahr A. El-Hakeem, Mrs. Mahasen A. Koteb and Mrs. Mervat Mahran

who offered me assistance during the course of this study involving the operation of some apparatus and organoleptic evaluation.

And last but not least, sincere thanks are extended to my family: my husband, my parents, my brothers and my sisters. Their love, affection and advice were a constant source of strength and peace.
