# ENVIRONMENTAL IMPACTS ON THE GROUNDWATER AQUIFER IN EL SADAT AREA, WEST OF THE NILE DELTA, EGYPT

A Thesis

Submitted in partial fulfillment for the  
Requirements of the degree of Master of Science in Hydrogeology and petroleum

By

**Mohamed Gad Ahmed Gad**

B.Sc. in Geology, Tanta University, 1999

Supervisors

**Prof. Dr. Maghawry Sh. Diab**

Emeritus Prof. of Hydrogeology  
Former President of Minufiya University

**Dr. Kamal A. Dahab**

Associate Prof. of Hydrogeology  
Faculty of Science, Minufiya University

لجنة فحص ومناقشة الرسالة :

١- ا.د. محمود كامل سلومة - استاذ المياه الجوفية - مركز بحوث الصحراء - المطرية.

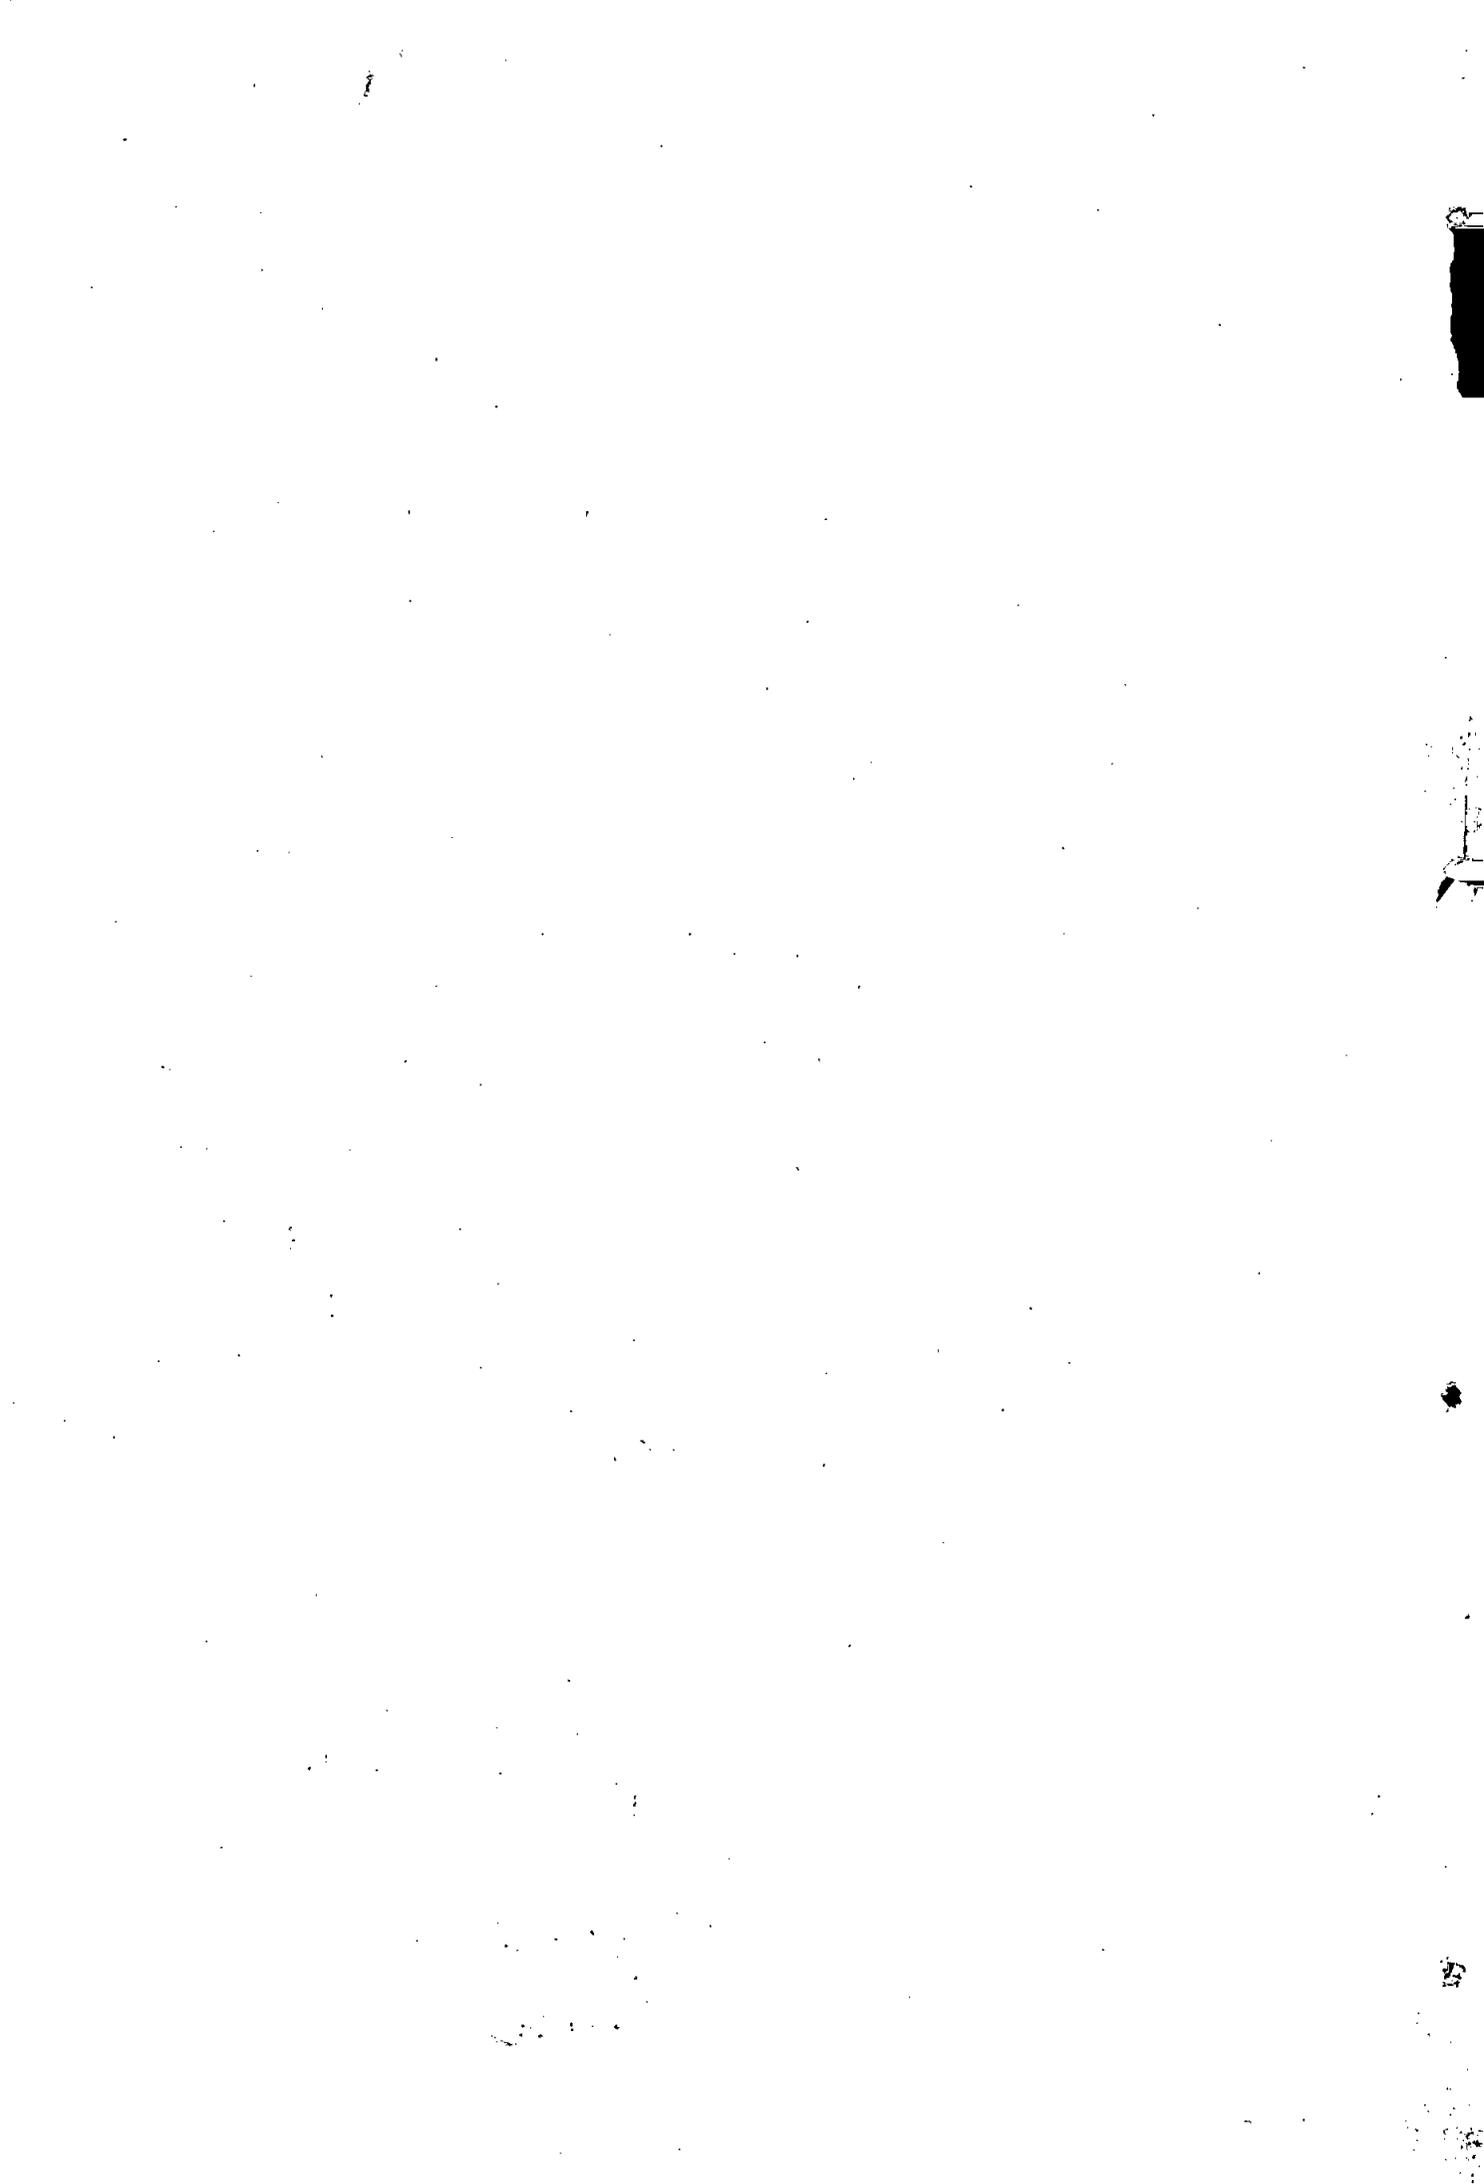

٢- ا.د. سمير عبد الفتاح عطا - استاذ الهيدروجيوكيمياء - معهد بحوث المياه الجوفية - القناطر الخيرية.

٣- ا.د. مغاوى شحاتة دياب - استاذ الهيدروجيولوجيا المتفرغ - كلية العلوم - جامعة المنوفية.

٤- د.د. كمال عبد العظيم دهب - استاذ الهيدروجيولوجيا المساعد - كلية العلوم جامعة المنوفية.

August - 2005

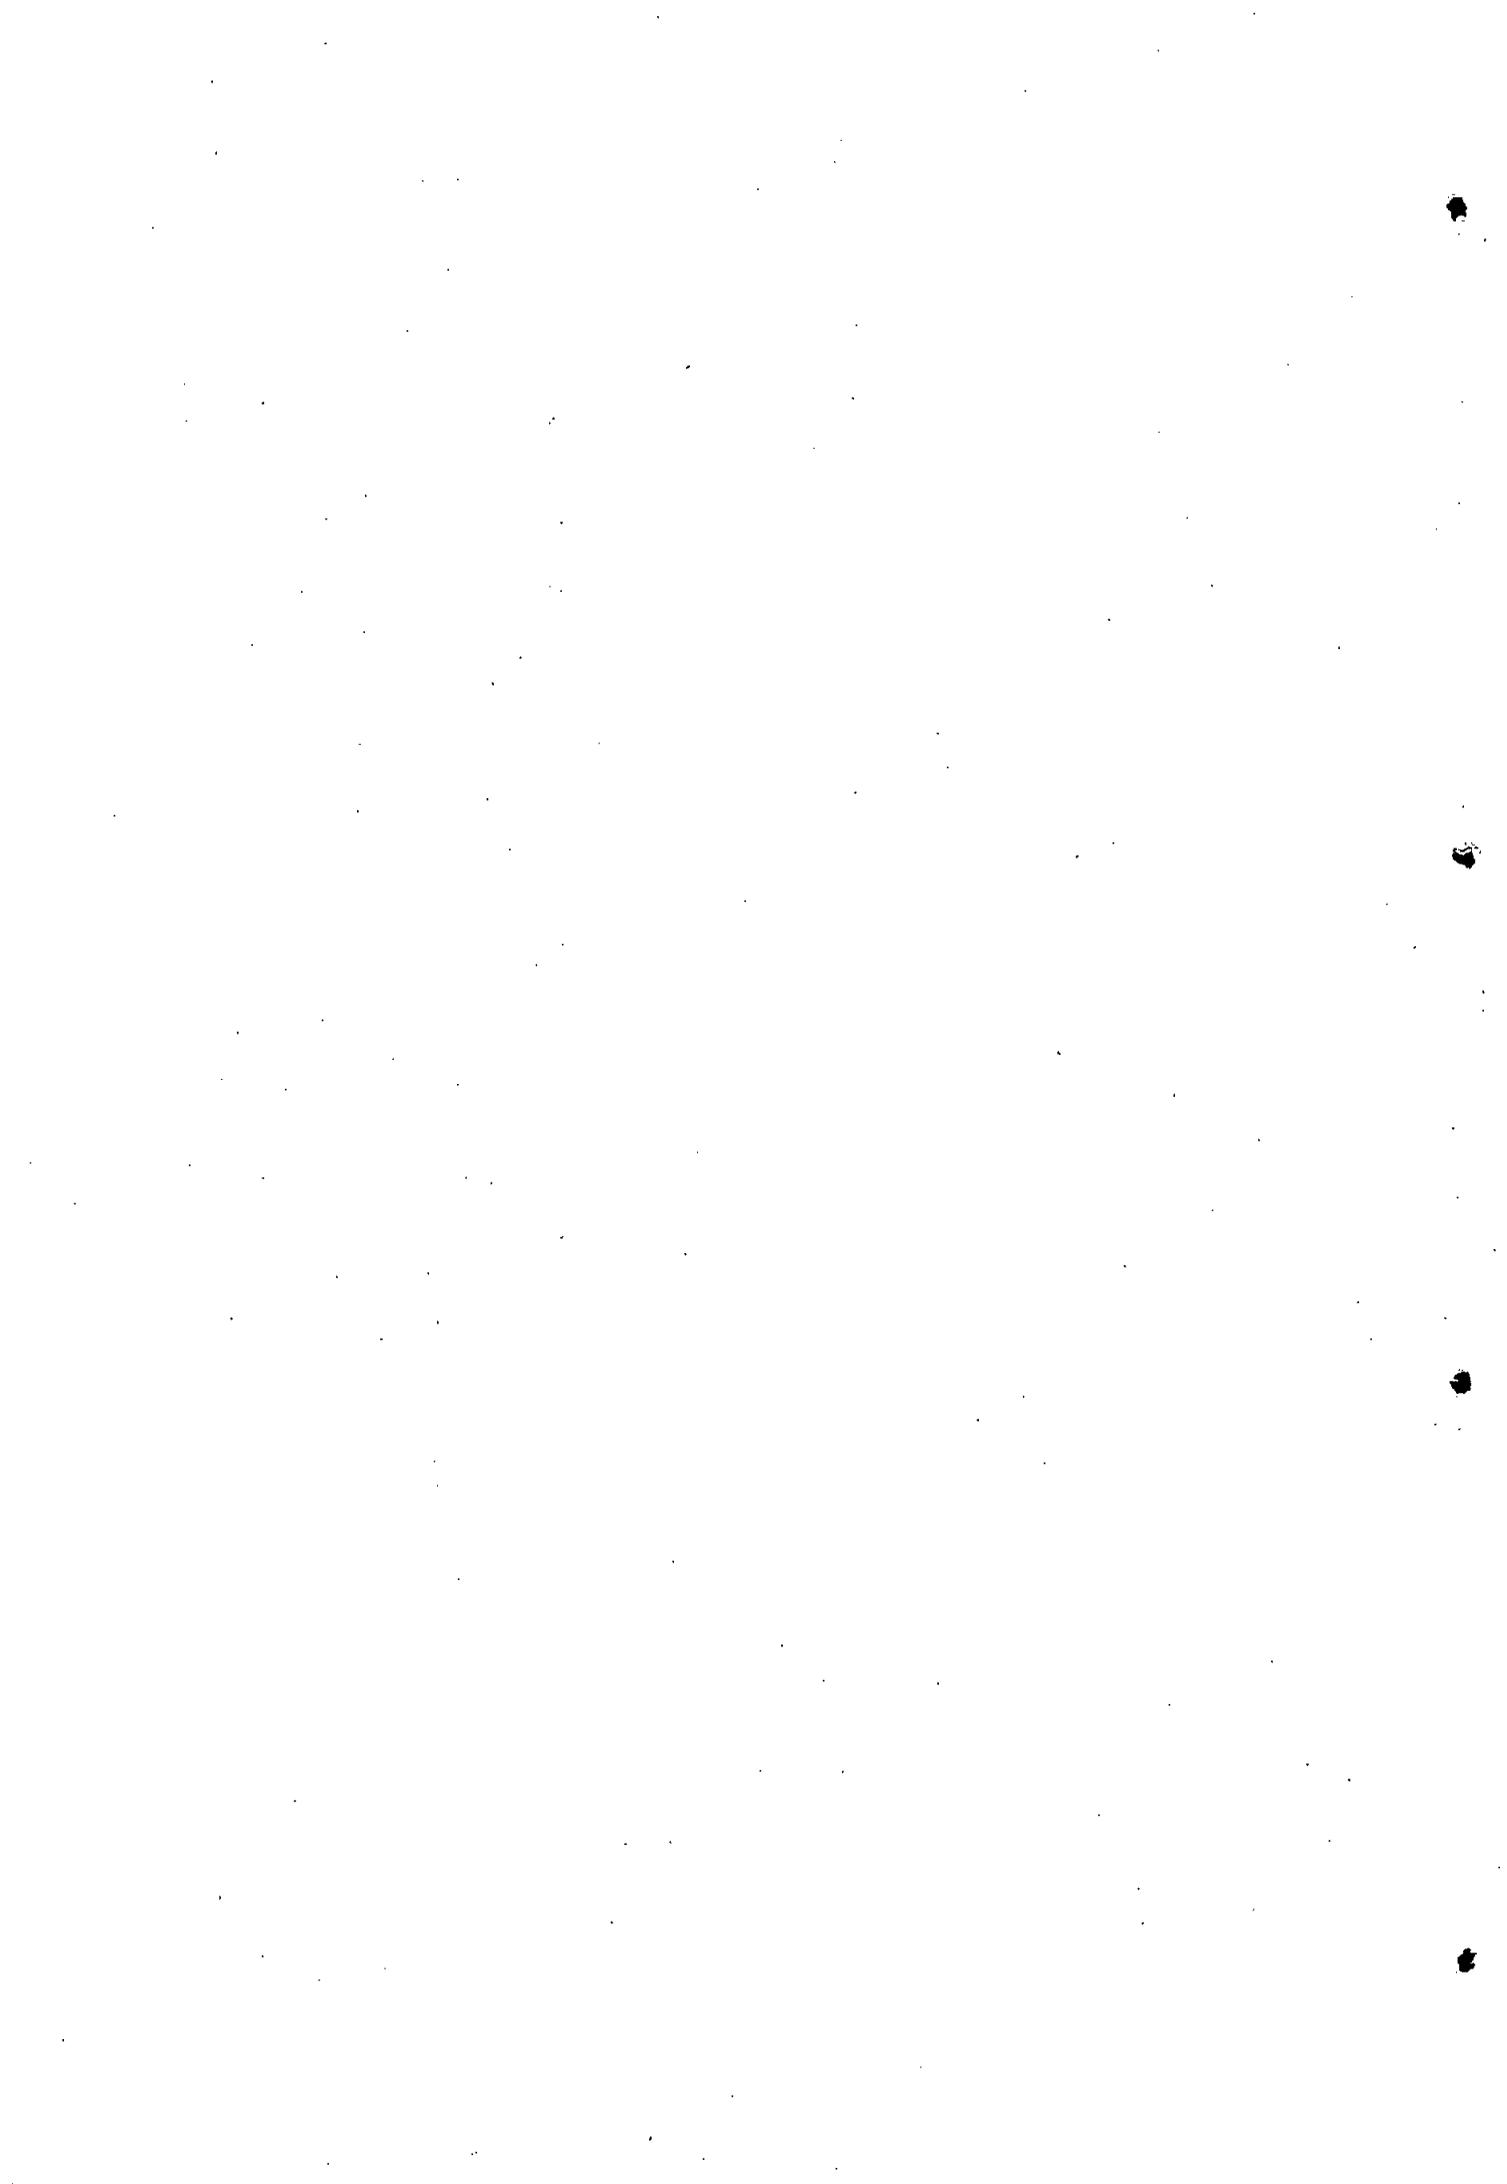

## ACKNOWLEDGMENTS

The author would like to express his deepest thanks and highest appreciation to **Prof. Dr. M. S. Diab**, Professor Emeritus of Hydrogeology, Geology Department, Faculty of Science, Minufiya University and **Dr. K. A. Dahab**, Associate Professor of Hydrogeology, Geology Department, Faculty of Science, Minufiya University, for their supervising of the present work, faithful help, fruitful discussions, critical reviewing of the manuscripts and continuous help.

My deep thanks are due to all the staff members of the stable isotope laboratory of the Environmental physics institute, Heidelberg University, Germany.

My sincere thanks are also due to all the staff members of the Desert Environment Research Institute (DERI), Minufiya University. Thanks and high appreciations are dedicated to my family for the kind encouragement and help during the progress of this work.

<b>AKNOWLEDGMENT</b> .....	i
<b>LIST OF FIGURES</b> .....	v
<b>LIST OF TABLES</b> .....	viii
<b>LIST OF APPENDICES</b> .....	ix
<b>CHAPTER I</b> .....	1
<b>INTRODUCTION</b> .....	1
General out lines .....	1
1.1. The study area .....	1
1.2. Main objective of the present work .....	9
1.2.1. Field works .....	10
1.2.2. Laboratory analyses .....	10
1.2.3. Office works .....	11
<b>CHAPTER II</b> .....	12
<b>HYDROGEOLOGIC SETTING</b> .....	12
2.1. Groundwater aquifer system .....	12
2.1.1. Hydraulic parameters .....	18
2.2. Groundwater flow patterns .....	28
<b>CHAPTER III</b> .....	33
<b>HYDROCHEMICAL ASPECTS</b> .....	33
General outlines .....	33
3.1. Salinity distribution .....	33
3.2. Distribution of hydrochemical elements in the groundwater .....	35
3.2.1. Distribution of calcium .....	35
3.2.2. Distribution of magnesium .....	36
3.2.3. Distribution of sodium .....	37
3.2.4. Distribution of potassium .....	39
3.2.5. Distribution of chloride .....	39

3.2.6. Distribution of sulfates .....	40
3.2.7. Distribution of carbonates and bicarbonates .....	42
3.3. Ions dominance .....	44
3.4. Groundwater types .....	45
3.5. Evaluation of groundwater according to trace and minor elements.....	48
3.5.1. Iron distribution .....	48
3.5.2. Manganese distribution .....	49
3.5.3. Zinc distribution .....	49
3.5.4. Aluminum distribution .....	50
3.5.5. Nitrite and nitrate distribution .....	50
3.5.6. Phosphate distribution .....	50
<b>CHAPTER IV .....</b>	<b>52</b>
<b>EVALUATION OF GROUNDWATER RESOURCES</b>	
<b>AND SUSTAINABILITY .....</b>	<b>52</b>
4.1. Environmental stable isotope studies .....	52
4.1.1. Results and discussion .....	54
4.2. Hydrochemical model .....	58
4.2.1. Input File of the Program .....	59
4.2.2. Running the Program .....	60
4.2.3. Output File of the Program .....	60
4.2.4. Discussion of the results .....	61
4.3. Environmental impacts of the present groundwater development plans.....	68
4.3.1. Groundwater levels fluctuation .....	68
4.3.2. Groundwater quality changes .....	72
4.4. Groundwater sustainability .....	73
<b>CHAPTER V .....</b>	<b>76</b>
<b>Groundwater Evaluation for different purposes .....</b>	<b>76</b>

	<b>Page No.</b>
5.1. Evaluation of the groundwater for drinking and domestic purposes .....	76
5.2. Evaluation of groundwater for livestock and poultry .....	78
5.3. Suitability of groundwater for agricultural uses .....	79
5.3.1. Classification of groundwater according to U.S. Salinity Laboratory Staff .....	79
5.3.2. Residual sodium carbonate .....	81
<b>SUMMARY AND CONCLUSION</b> .....	<b>82</b>
<b>REFERENCES</b> .....	<b>89</b>
<b>APPENDICES</b>	
<b>ARABIC SUMMARY</b>	

# List of Figures

Figure No.	Page No.
1. Key map of El-Sadat area .....	2
2. Mean annual rainfall of west Nile Delta area (mm) from the period (988 to 1993) .....	3
3. Topographic map of the area under study .....	4
4. Geomorphologic map of the studied area and its vicinities .....	5
5. Drainage pattern map of the area under study .....	6
6. Geologic map of the area under study and its vicinities .....	7
7. Log of Wadi El Natrun test well No.1 .....	8
8. Distribution of the present aquifers in the west of Nile Delta .....	13
9. Hydrogeological cross section A – A\ .....	14
10. Hydrogeological cross section B – B\ .....	15
11. Hydrogeological cross section C – C\ .....	16
12. Saturation thickness contour map of the Quaternary aquifer in the study area..	17
13. Shale percentage contour map of the study area .....	18
14. Jacob method for pumping test data analysis (Well No. 36).....	21
15. Recovery method for pumping test data analysis (Well No. 36).....	21
16. Step drawdown test carried out of the Quaternary aquifer in the study area (well No. 2) .....	24
17. Step drawdown test carried out of the Quaternary aquifer in the study area (well No. 8) .....	25
18. Step drawdown test carried out of the Quaternary aquifer in the study area (well No. 12) .....	26
19. Step drawdown test carried out of the Quaternary aquifer in the study area (well No. 35) .....	27
20. Depth to water contour map of the Quaternary aquifer in the study area .....	30
21. Water levels contour map of the Quaternary aquifer in the study area .....	31
22. Hydrological cross section showing change in hydraulic gradient .....	32
23. Samples location map in the study area .....	34
24. Water salinity contour map in the study area .....	35
25. Distribution of calcium ions of the Quaternary aquifer in the study area .....	36
26. Distribution of magnesium ions of the Quaternary aquifer in the study area.....	37

27. Distribution of sodium ions of the Quaternary aquifer in the study area .....	38
28. Distribution of chloride ions of the Quaternary aquifer in the study area .....	40
29. Distribution of sulfates of the Quaternary aquifer in the study area .....	41
30. Distribution of carbonates and bicarbonates of the Quaternary aquifer in the study area.....	42
31. Semi-logarithmic graph representation (Schoeller, 19569) .....	44
32. Trilinear diagram for the presentation of groundwater in the study area .....	46
33. Water types distribution map of the Quaternary aquifer in the study .....	47
34. Oxygen <sup>18</sup> & Deuterium relationship of the Quaternary aquifer in the study Area .....	54
35. Oxygen <sup>18</sup> distribution contour map of the Quaternary aquifer in the study area.....	55
36. Deuterium distribution contour map of the Quaternary aquifer in the study area.....	56
37. Oxygen <sup>18</sup> and total dissolved salts relationship of the Quaternary aquifer in the study area .....	57
38. Oxygen <sup>18</sup> and chloride relationship of the Quaternary aquifer in the study area .....	57
39. Flow chart of WATEQp program (Plummer et al; 1984) .....	61
40. Pressure of carbon dioxide (P-CO <sub>2</sub> ) of the Quaternary aquifer in the study area .....	62
41. Saturation indices of calcite of the Quaternary aquifer in the study area .....	63
42. Saturation indices of aragonite of the Quaternary aquifer in the study area .....	64
43. Saturation indices of dolomite of the Quaternary aquifer in the study area .....	65
44. Saturation indices of gypsum of the Quaternary aquifer in the study area .....	66
45. Saturation indices profile of minerals of groundwater in the study area .....	67
46. Water levels contour map of the study area, 1975 .....	69
47. Water levels contour map of the study area, 1988 .....	70
48. Lowering in the groundwater levels in the study area from (1988 to 2003) .....	71
