SOME THIAZOLE DERIVATIVES AS INHIBITORS FOR CORROSION OF C-STEEL IN ACIDIC SOLUTIONS

BY

Chemist: **WALEED AZMY MOHAMED SHEHAB EL-DEIN**
Water Technology and Chemical Analysis Unit
Faculty of Engineering – Mansoura University

A Thesis

Submitted for partial fulfillment of the Requirements for
the Master Degree of Science in Chemistry
(Physical Chemistry)

SUPERVISED BY

Prof. Dr. A. S. Fouda

*Prof. of Physical Chemistry & Head of Chemistry Department
Faculty of Science
Mansoura University*

Prof. Dr. R. M. El-Bahnasawy

*Prof. of Inorganic and Analytical Chemistry
Chemistry Department
Faculty of Science
Menoufiya University*

Dr. A. A. Al-Sarawy

*Associate Prof. of Chemical Engineering
Mathematics & Physical Science Department
Faculty of Engineering
Mansoura University*

REFEREES :

1. Prof. Dr. M. Abdallah – Benha University
2. Prof. Dr. S. A. Salih – Cairo University
3. Prof. Dr. A. S. Fouda – Mansoura University
4. Prof. Dr. R. M. El-Bahnasawy – Menoufiya University

August 2005

2024

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for ensuring the integrity and transparency of the financial system. This section also outlines the various methods used to collect and analyze data, highlighting the role of technology in streamlining these processes.

2. The second part of the document focuses on the challenges faced by organizations in implementing effective risk management strategies. It identifies key areas such as market volatility, regulatory changes, and operational risks, and provides detailed recommendations for mitigating these risks. The text also discusses the importance of regular communication and collaboration between different departments to ensure a cohesive risk management approach.

THE START STUDIES

The present thesis is submitted to the faculty of Science, Menoufiya University in partial fulfillment for the requirements of Master Degree of Science in Chemistry.

Besides the work carried out in this thesis, the candidate Waleed Azmy Mohamed Shehab El-dein, has pursued the following postgraduate courses for on academic year 2003-2004 ;

- 1- Advanced Analytical Chemistry.
- 2- Solid State Chemistry.
- 3- Advanced Physical Chemistry.
- 4- Surface Chemistry.
- 5- Advanced Inorganic Chemistry.
- 6- Advanced Thermodynamic.
- 7- Kinetic of Reactions Chemistry.
- 8- Applied Chemistry for Spectroscopy.
- 9- Quantum Chemistry.
- 10- Choices in the Physical Chemistry.
- 11- Electrochemistry.
- 12- English Language.
- 13- Statistical.
- 14-Computer.

He has successfully passed the final examination of these courses in January 2004.

Head of Chemistry Department

ACKNOWLEDGEMENT

Praise be to Allah, who guided us to this; and in no way could we have been guided, unless Allah has guided us.

I owe a well-deserved debt of deep gratitude to Prof. Dr. A. S. FOUDA, Professor of Physical Chemistry, and the Head of Chemistry Department, Faculty of Science, Mansoura University, for suggestion point of the research, continuous supervision and guidance in all stages of performing this thesis, without his help, this work can not be done.

I owe a well- deserved debt of deep gratitude to Prof. Dr. R. M. EL-BAHNASAWY Professor of Analytical Chemistry, Faculty of Science Menoufiya University, for his facilities, support and kind encouragement during this work.

I am deeply grateful to Dr. A. A. AL-SARAWY, Associate Professor of Physical Chemistry and the Manager of the Water Technology and Chemical Analysis Unit, Faculty of Engineering, Mansoura University, for his kind encouragement, his sincerely help and invaluable advice in this work.

I would like to express my deepest gratitude and appreciation to Prof. Dr. I.G. RASHED, Professor of Chemical Engineering and the Dean of the Faculty of Engineering, Mansoura University who is setting up and institute the Water Technology and Chemical Analysis Unit where I learn the chemistry and I had proceeded all the experimental techniques and used all the instruments in that unit

It is from my pleasure to thank both of Prof. Dr. S. EL-SHERIFY Professor of Physical Chemistry, Faculty of Science, Menoufiya university and Dr. M. F. EL-SHERBINY Associate Professor of Chemical Engineering, Faculty of Engineering, Menoufiya University for their great help and the continued encouragement.

Waleed Azmy Mohamed

With all my love

**This work is dedicated to my Family,
my Colleagues in Water Technology
& Chemical analysis Unit
and finally to everyone helped
me in this work.**

W. A. Mohamed

CONTENTS

LIST OF FIGURES.....	I
LIST OF TABLES.....	VII
Aim of the present work	1

(CHAPTER I) INTRODUCTION

1.1- Definition of corrosion.....	2
1.2- Classification of corrosion..	2
1.2.1- Various forms of corrosion	3
1.2.1.1- General surface corrosion	3
1.2.1.2- Galvanic corrosion.....	4
1.2.1.3- Concentration-cell corrosion	4
1.2.1.4- Pitting corrosion	4
1.2.1.5- Intergranular corrosion	5
1.2.1.6- Stress corrosion cracking.....	5
1.2.1.7- Dealloying.....	5
1.2.1.8- Erosion corrosion.....	6
1.2.1.9- Filiform corrosion.....	6
1.2.1.10- Fretting corrosion.....	6
1.3- Electrochemical theory of corrosion... ..	7
1.4- Corrosion inhibitors	8
1.4.1- Classifications of inhibitors	8
1.4.2- Applications of inhibitors	9
1.4.3- Mechanism of inhibition	9
1.4.3.1- Formation of a physical barrier and reduction in metal reactivity	9

1.4.3.2- Change in the electrical double layer structure	10
1.5- Theories of corrosion inhibition... ..	10
1.5.1- Adsorption theory	11
1.5.2- Electrosorption	11
1.5.3- π -Orbital adsorption	11
1.5.4- Van der Waals adsorption	11
1.5.5- Film theory	11
1.6- Adsorption isotherms.. ..	11
1.7- Literature survey on using some organic compounds as corrosion inhibitors for iron and its alloys dissolution in aqueous medium.....	14

(CHAPTER II) EXPERIMENTAL AND TECHNIQUES

2.1- Chemical composition of material samples.. ..	46
2.2- Chemicals and solutions.....	46
2.2.1- Hydrochloric acid.....	46
2.2.2- Inhibitors.....	46
2.2.2.1-Inhibitor solutions.....	49
2.2.3- Inorganic additives.....	49
2.3 - Experimental techniques.....	49
2.3.1- Chemical Technique (Weight loss method).....	49
2.3.2- Electrochemical Technique (Polarization method).....	51

(CHAPTER III) RESULTS AND DISCUSSION

SECTION(A) STUDYING THE CORROSION INHIBITION OF C-STEEL IN HYDROCHLORIC ACID BY USING THE CHEMICAL TECHNIQUE

3.1- Weight loss measurements.....	56
