قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ

صدق الله العظيم

سورة البقرة الآية (٣٢)

ACKNOWLEDGMENT

Thanks for God for pleasing this work until it has reached its end as a little part of his generous help throughout our life.

I would like to express my deepest gratitude to my main supervisor

Prof. Dr. Mostafa Mahmoud El-Serafy, Prof. of Medical Oncology and chairman of Medical Oncology Dept, NCI, Cairo University for his support, guidance and stimulation throughout this work.

I am also grateful to ***Prof. Dr. Sameh Sayed Ahmed Shamaa***, Prof. of Medical Oncology, internal Medicine, and head of Oncology center, Mansoura University, for his support.

I would like to express my sincere thanks and gratitude to ***Prof. Dr. Farida Hassan Abdel Rahman***, Prof. of Clinical Pathology, NCI, Cairo University, for her constant guidance and valuable directions and encouragement.

I would like to express my great thanks to ***Prof. Dr. Azza Kamel***, Prof. of Clinical Pathology, NCI, Cairo University for her great valuable directions to me. I must not forget ***Dr. Nahla EL-Sharkawy***, Lecturer of clinical pathology, NCI, Cairo University, for her great support to me.

Maha Ibrahim Ismael Ibrahim

2001

CONTENTS

Subject	Page
Introduction and Aim of Work	**1**
Review of Literature	**4**
• Pathogenesis of acute leukemias	**4**
• Diagnostic evaluation of the patient with acute leukemia.	**5**
• Classification of acute leukemia.	**8**
• Acute myeloid leukemia.	**16**
• Incidence of actiology of AML.	**16**
• Clinical manifestation of AML.	**22**
• Diangosis of AML.	**27**
• Treatment of AML.	**36**
• Acute lymphatic leukemia.	**58**
• Classification of ALL.	**59**
• Diagnosis of ALL.	**72**
• Treatment of ALL.	**74**
• Prognostic factors in acute leukemias.	**101**
1- Immunophenotyping in acute leukemias.	**102**
2- Molecular aspects of acute leukemia.	**116**
a) Cell cycle regulation.	**116**
b) Cancer genes (oncogenes and tumor suppressor genes).	**119**
c) Apoptosis and its regulation.	**122**
• P53 biology.	**126**
• Bcl-2.	**131**
3- DNA study in acute leukemias.	**140**
a) Cytogenetics in acute leukemias.	**140**
b) DNA content.	**153**
4- Other prognostic factors in AML.	**156**
5- Other prognostic factors in ALL.	**165**
6- Mechanisms of drug resistance.	**174**
Patients and Methods	**184**
Results	**190**
Discussion	**215**
Summary and Recommendations	**230**
References	**233**
Arabic Summary	

TABLES IN THE REVIEW SHOW

	Page
Morphologic, cytochemical and biochemical characteristics helpful in distinguishing ALL from AML.	7
Blast types in acute leukemia.	9
Classification and incidence of subtypes of AML.	9
FAB classification of acute lymphocytic leukemia.	10
Cytological criteria for the diagnosis of acute myeloid luekaemia: French-American-British classification.	15
Correlation between morphologic subtypes of AML and recurring chromosomal translocations.	21
Cytochemical stains in acute leukemia.	30
Monoclonal antibodies commonly used to distinguish AML from ALL.	32
Immunophenotyping markers in AL.	34
Randomized comparisons of maintenance versus no maintenance in patients in first remission.	42
Randomized comparison of standard dose ara-C with high dose ara-C in newly diagnosed AML.	45
Comparison of autologous marrow transplant with chemotherapy or allogenic marrow transplant in first CR.	50
Does GM- or G-CSF reduce morbidity or mortality after induction therapy? Results of randomized trials.	55
Scoring system for L1 and L2 FAB subclasses of ALL.	60
Cytochemistry of ALL.	61
Immunologic classification of T-ALL.	69
Monoclonal antibodies commonly used to immunophenotype leukemia.	71
Induction therapy of ALL according to the GMALL protocol.	77
Overall treatment results in adult acute lymphocytic leukemia in larger studies.	85
Autologous BMT for ALL in first remission.	92
Randomized study of BMT in first complete remission: long term confirmation of early data.	94
Clusters of differentiation (CD) antigens useful in the immunologic classification of acute leukemias.	104
Immunological classification of ALL.	110
Immunophenotype according to FAB classification in AML.	111
Recurring chromosome abnormalities in malignant myeloid diseases.	148
Cytogenetic immunophenotypic correlations in ALL.	152

Unfavorable prognostic factors for outcome of chemotherapy in adult patients with AML.	**157**
Prognostic factors in AML.	**162**
Established prognostic factors for response to standard chemotherapy in newly diagnosed AML.	**164**
Prognostic parameters in ALL at presentation.	**173**
Effect of MDR1/Pgp expression on CR.	**177**
Characteristics of three mechanisms of multidrug resistance that result from overexpression of P-Glycoprotein (PGP), multidrug resistance associated protein (MRP) or lung resistance related protein (LRP).	**183**
