Petroleum Engineering

Approved by the
Examining Committee:

Prof. Dr. Abdel-Alim H. El-Sayed Thesis Main Advisor
Professor of petroleum engineering, Cairo University

Ass. Prof. Dr. Abdulaziz M. Abdulaziz Advisor
Associate Professor of Petroleum Engineering, Cairo University

Prof. Dr. Fouad Khalaf Mohamed Internal Examiner
Professor of Petroleum Engineering, Cairo University

Prof. Dr. Mohamed M. El Assal External Examiner
Triple L Oil Services Chairperson and Founder / Petrol. Eng. Consultant

FACULTY OF ENGINEERING, CAIRO UNIVERSITY
GIZA, EGYPT
2018

Engineer's Name: Ibrahim Abo-Zaid Abdel-Hay Mohamed

Date of Birth: 20/08/1992

Nationality: Egyptian

E-mail: Ibrahimabozaid894@gmail.com

Phone: +2-010-00591962

Address: Shahedy, Al-Mahala Al-Kubra, Egypt.

Registration Date: 1 / 3 / 2016

Awarding Date: / / 2018

Degree: Master of Science

Department: Petroleum, Mining and Metallurgical Engineering

Supervisors:

Prof. Dr. Abdel-Alim H. El-Sayed

Dr. Abdulaziz M. Abdulaziz

Examiners:

Prof. Dr. Abdel-Alim H. El-Sayed (Thesis main advisor)

Dr. Abdulaziz M. Abdulaziz (Thesis advisor)

Prof. Dr. Fouad Khalaf Mohamed (Internal examiner)

Prof. Dr. Prof. Dr. Mohamed M. El Assal (External examiner)

Triple L Oil Services Chairperson and Founder / Petrol. Eng. Consultant

Title of Thesis:

SELECTION OF SHALE GAS DRILLING TECHNIQUE FOR SHALE GAS PLAYS IN EGYPT

Key Words:

Shale Gas Plays; The Drilling Techniques; The Geochemical Properties; The Rate of Penetration.

Summary:

Recently, the shale gas drilling operation has high cost due to low rate of penetration and the encountered problems during the drilling operation which increase the trip time and rig cost. There are eight techniques of shale gas drilling were used in different shale gas plays and achieved improvement in the drilling performance in all case studies. The optimum shale gas drilling technique is selected to be applied in Egypt's shale gas plays by the selection of the closest geochemical properties of shale gas play to shale gas plays in Egypt.

ACKNOWLEDGMENT

I would like to thank God who inspired me to this work. I would like to take this opportunity to thank Prof. Dr. Abdel-Alim H. El-Sayed who was always willing to provide his insights and direction. I would like to thank Dr. Abdulaziz M. Abdulaziz for his invaluable guidance, inspiration and support in the development of this work and throughout my studies at Cairo University.

My gratitude also goes out to Eng. Mohamed Maeen, Petrobel Petroleum Company for his support, guidance and enthusiasm that encouraged me to excel in my endeavors. He has been a strong motivating force and an integral part of my studies in drilling engineering. Special thank goes to Eng. Mohamed Alaa, Khalda Petroleum Company who was always willing to provide his insight and direction. I would also like to thank my family who has been a constant source of support throughout this journey.

DEDICATION

I would like to dedicate this work to my dear family especially my daughter who inspired me to work hard to achieve my goals.
