MICROCHIMERISM IN JUVENILE RHEUMATOID ARTHRITIS BY USING CD₃₄ +VE AND CD₃₈ +VE CELLS

A thesis submitted by
SHERIF ABDEL RAZIK HASSAN MUSTAFA
M.B.B.CH

*For the Partial Fulfillment of
Master Degree in Pediatrics*

Supervised by

PROF. SHAHEEN ALY YASSEN DABOUR

*Professor of Pediatric
Benha Faculty of Medicine
Benha University*

PROF. EL SAYED A. RAHMAN AMER

*Professor of Pediatric
Benha Faculty of Medicine
Benha University*

PROF. ALY MOHAMMED EL-SAID YOUSSEF

*Professor and Chairman of Medicine
and Rheumatology Department
Benha Teaching Hospital*

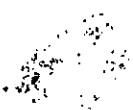

DR. MOHAMMED KHALIED ALY ABDOU

*Lecturer Of Pediatrics
Benha Faculty of Medicine*

*Benha Faculty of Medicine
Benha University
2006*

21

ACKNOWLEDGMENT

First and for most I thank 'Allah' almighty, the beneficent and most merciful.

I would like to express my endless gratitude and appreciation to
Prof. Dr. Shahein Dabour professor of Pediatrics, Benha Faculty of Medicine for giving me the honor of working under his supervision and for his continuous guidance, endless patience, encouragement

And I would like to express my endless gratitude and appreciation to
Prof. Dr. El-Sayed Amer Professor of Pediatrics, Benha Faculty of Medicine for giving me the honor of working under his supervision and for his continuous guidance, endless patience, encouragement

My deep thanks are to **Prof. Dr. Aly Yousef**, Prof. And Head Rheumatology Department and Genetic Unit Benha Teaching Hospital, for his generous assistance and valuable guidance and remarkable efforts during the whole period of the study.

My apperception is due to great help and close supervision offered of **Dr. Mahmed Khald Abdu** lecturer of pediatrics, Benha Faculty of medicine, my deep thanks are to **Dr. Ehab El-Desoky** consultant of clinical pathology and cytopathology Benha Children Hospital for his generous assistance and valuable guidance encouragement and support.

My deep thanks are to **Dr. Sausan M. Farowk** assistant Professor of cytopathology Benha Teaching hospital for her generous assistance and valuable guidance encouragement and support.

And deep thanks are to **Dr. Eman Essa** lecturer of cytopathology, Benha Teaching hospital for her generous assistance and valuable guidance encouragement and support.

No words can describe the support and encouragement offered to me by my parents any my family.

LIST OF TABLES

Table No.	A) List of tables of Review	Page
1	JRA onset types and relationship to age and sex	6
2	Immunologic abnormalities in JCA	12
3	HLA relationship in children with JRA.	17
4	Criteria for diagnosis of JRA/JCA	49
5	Differential diagnosis of Juvenile Rheumatoid arthritis	65
6	Another table for differential diagnosis was made by (Cassidy, 1990).	68
7	Objectives of the treatment of JRA	72
8	Pediatric dosages of Nonsteroidal anti-inflammatory drugs.	75
	B) List of tables of Results	
1	Distribution of types of JRA in studied patients 25 cases	113
2	Distribution of studied group cases and control according to sex and age/year.	114
3	Statistical correlation between different patient groups & control group as age /year.	115
4	Distribution of clinical picture and some routine investigations among the studied patients 25 cases.	116
5	Statistical comparison between different patient groups & control group as regarding Hb%	117
6	Statistical comparison between different patient groups & control group as regarding WBCs count	118
7	Statistical comparison between different patient groups & control group as regarding platlet count	119
8	Statistical comparison between different patient groups	120

	& control group as regarding neutrophilic count	
9	Statistical comparison between different patient groups & control group as regarding ESR	121
10	Statistical comparison between different patient groups & control group as regarding ANA	122
11	Statistical comparison between different patient groups & control group as regarding RF.	123
12	Statistical comparison between different patient groups & control group as regarding CD34	124
13	Statistical comparison between different patient groups & control group as regarding CD38	125
14	Statistical correlation between CD34 and RF in diseased control groups and as total	126
15	Statistical correlation between CD34 and Hb% in diseased control groups and as total	127
16	Statistical correlation between CD34 and ESR in diseased control groups and as total	128
17	Statistical correlation between CD34 and ANA in diseased control groups and as total	129
18	Statistical correlation between CD34 and neutrophilic count in diseased control groups and as total	130
19	Statistical correlation between CD34 and WBCs in diseased control groups and as total	131
20	Statistical correlation between CD34 and platlet in diseased control groups and as total	132
21	Statistical correlation between CD34 and CD38 in diseased control groups and as total	133
22	Statistical correlation between CD38 and Hb% in	134

	diseased control groups and as total	...
23	Statistical correlation between CD38 and platlet count in diseased control groups and as total	135
24	Statistical correlation between CD38 and WBCs count in diseased control groups and as total	136
25	Statistical correlation between CD38 and neutrophilic count in diseased control groups and as total	137
26	Statistical correlation between CD38 and ANA in diseased control groups and as total	138
27	Statistical correlation between CD38 and ESR in diseased control groups and as total	139
28	Statistical correlation between CD38 and RF in diseased control groups and as total	140

LIST OF FIGURES & HISTOGRAM

Table No.	Subject	Page
1	A scheme for immunopathogenesis of RA	15
2	Arthritis Research.	38
3	Potential sequential therapeutic steps according to onset/course type and clinical response.	73
	List of Histogram	
1	Compare the diseased and control groups as regarding the mean age (year)	115
2	Graph for comparison between diseased and control groups as regard mean Hb%	117
3	Graph for comparison between diseased and control groups as regard mean WBCs count.	118
4	Graph for comparison between diseased and control groups as regard mean platlet count	119
5	Graph for comparison between diseased and control groups as regard mean neutrophilic count	120
6	Graph for comparison between diseased and control groups as regard mean ESR	121
7	Graph for comparison between diseased and control groups as regard mean ANA	122
8	Graph for comparison between diseased and control groups as regard mean RF.	123
9	Graph for comparison between diseased and control groups as regard mean CD34	124
10	Graph for comparison between diseased and control groups as regard mean CD38	125

LIST OF ABBREVIATIONS

ANA	Anti –nuclear antibody
AHAS	Antishistone antibodies
APF	Anti-perinuclear factor
ASA	Acetyl salicylic acid
BCSO	Black currant seed oil
CD4	Differentiated T-cell helper / inducer
CICs	Circulating immune complexes.
CIT	Gastro-intestinal tract
CNS	Central nervous system
CRP	C-reactive protein
DNA	Deoxyribonucleic acid
E-BVIRUS	Epstein –Barr virus
ESR	Erythrocyte sedimentation rate
HCT	Haematocrite
HLA	Human leukocyte antigens
HSP	Heat shock proteins
IG	Immunoglobuline
IL	Interlaken
ITS	Immunotoxins
IV	Intra venous
IVIG	Intravenous immunoglobulin
JRA	Juvenile rheumatoid arthritis
MABS	Monoclonal antibodies
MAS	Macrophage activation syndrome
MCP	Metacarpo-phalangeal
