

Accredited Faculty

Holocene Palynological Study and Vegetation History with reference to Cladistic Evidences in Fayoum Depression, Egypt

A Thesis
Submitted to the Faculty of Science
Ain Shams University

For the Degree of
Doctor of Philosophy (in Botany)

By

Nermeen Adel Ragaie Mohammed Ziada

M.Sc. in Botany-Palaeobotany (2014)

Supervisors

Dr. Wagieh El-Sayed El-Saadawi
Professor of Botany
Faculty of Science, Ain Shams University

Dr. Mohamed Ismail Ibrahim
Professor of Palynology and Environmental Micropaleontology
Faculty of Science, Alexandria University

Dr. Usama Kamal Abdel-Hameed
Associate Professor of Taxonomy of Flowering plants
Faculty of Science, Ain Shams University

(2018)

Accredited Faculty

Approval Sheet

Thesis Title: Holocene Palynological Study and Vegetation History with reference to Cladistic Evidences in Fayoum Depression, Egypt

Name: Nermeen Adel Ragaie Mohammed Ziada

Degree: Doctor of Philosophy (in Botany)

Supervision Committee

Dr. Wagieh El-Sayed El-Saadawi: Professor of Botany, Faculty of Science, Ain Shams University.

Dr. Mohamed Ismail Ibrahim: Professor of Palynology and Environmental Micropaleontology, Faculty of Science, Alexandria University.

Dr. Usama Kamal Abdel-Hameed: Associate Professor of Taxonomy of Flowering plants, Faculty of Science, Ain Shams University.

Examination Committee

Prof.

Prof.

Prof.

Prof.

Prof. Hanaa Mostafa Shabbara

Head of Botany Department

Declaration

I declare that the work contained in this thesis is the result of my own investigations. This thesis has not been submitted for any degree at this or any other University.

Nermeen Adel Ziada

Dedication

*"To one and all who directly or indirectly lent their
helping hands and given me dreams to look forward
to"*

Acknowledgements

I need a garden of flowers to present a flower each to all those who have rendered invaluable help in my research work and the presentation of this thesis.

I would like to express the deepest appreciation to **Prof. Wagieh El-Sayed El-Saadawi**. Thanks for endowing the unique gift of perseverance and the confidence in one's ability to achieve success. He deserves wholesome praise and a major share of gratitude for his sincere and valuable guidance throughout this work.

I gratefully acknowledge **Prof. Mohamed Ismail Ibrahim**, President of Matrouh University; for his supervision, offering the opportunity to work in his lab, persistent help and guidance. Thanks for presenting possibilities and helping me all along.

A special word of gratitude is due to **Dr. Usama Kamal Abdel-Hameed** for his unrelenting support, friendship, encouragement and advice throughout these years on the personal and academic levels.

Many great thanks go to **Prof. Mohamed Hamdan** (Professor of Geoarchaeology and Quaternary Geology, Faculty of Science, Cairo University) for providing the samples to Prof. Mohamed

Ibrahim. Without their help, this thesis could not have been completed.

I am forever indebted to **Prof. Marwah Mohamed Kamal El-Din** for her caring, advice and unconditional support throughout the past years.

I am heartily thankful to **Prof. Hanaa Mostafa Shabbara**, Head of Botany Department, Faculty of Science, Ain Shams University.

Special thanks are due to my friends **Mohamed Farag** and **Nehal Talaat** for their persistent help and support in innumerable ways. Many thanks are also due to **Mariam Ibrahim** for accompanying me on the field trips and helping me in a myriad of ways.

To my Mum, Dad and brothers; a very special thank you for instilling in me the virtue of commitment and encouraging me to strive for excellence. Your affection, love and prayers made me reach such success. To my fiancé Mohammed, thank you for being in my life.

Finally, I would like to record my sense of gratitude to all the staff members of the Botany Department, Faculty of Science, Ain Shams University for their faithful help.

Nermeen Adel Ziada
