

**Pharmacognostical Study of *Pavonia spinifex*  
(L.) Cav. Family Malvaceae and *Barleria repens*  
Nees. Family Acanthaceae Cultivated in Egypt**

**A THESIS SUBMITTED BY**

**Mina Michael Melk Mikhail**

**FOR THE DEGREE OF MASTER IN PHARMACEUTICAL SCIENCES**

**(Pharmacognosy)**

**UNDER THE SUPERVISION OF**

**Prof. Dr. Seham Salah El-Din El-Hawary**

Professor of Pharmacognosy  
Faculty of Pharmacy  
Cairo University

**Assoc. Prof. Dr. Ola M. Mousa**

Associate Professor of Pharmacognosy  
Faculty of Pharmacy  
Cairo University

**Dr. Nabil M. Abu- Elfetouh**

Lecturer of Pharmacognosy  
Faculty of Pharmacy  
Cairo University

**PHARAMACOGNOSY DEPARTMENT  
FACULTY OF PHARMACY  
CAIRO UNIVERSITY**

**2018**

## **ACKNOWLEDGEMENTS**

First and foremost, praises and thanks to the God, the Almighty, for his showers of blessings throughout my research work to complete the research successfully.

I would like to express my deep and sincere gratitude to *Prof. Dr. Seham Salah El-Deen El-Hawary*, Professor of Pharmacognosy, Faculty of Pharmacy, Cairo University, for giving me the opportunity to do research under her supervision and providing invaluable guidance throughout this research. Her dynamism, vision, sincerity and motivation. She has taught me the methodology to carry out the research and to present it as clearly as possible. It was a great privilege and honor to work and study under her guidance. She helped me come up with the thesis topic and guided me over the years of development. Her support and empathy during the most difficult times during doing this thesis, she gave me the moral support and the freedom I needed.

I am extremely grateful for what she has offered me. I would also like to thank her for her empathy, and great sense of humor. I am extending my heartfelt thanks to her for her acceptance and patience during the discussion I had with her on research work and thesis preparation.

I would like to thank my supervisor, *Assoc. Prof. Dr. Ola M. Mousa*, Associate Professor of Pharmacognosy, Faculty of Pharmacy, Cairo University, for the patient guidance, encouragement and valuable advice. She has provided

throughout my time as this study. I have been extremely lucky to have a supervisor who cared so much about my work, and who responded to my questions and queries so promptly. I want to acknowledge and appreciate her help and transparency during my research. her information has helped me to complete this thesis. She has taught me how good research is done. I appreciate all her contributions of time, ideas, and funding to make my master degree. I am also thankful for the excellent example she has provided as a successful woman professor.

I would like to express my special appreciation and thanks to my advisor *Dr. Nabil Aboul-Fotouh*, Lecturer of Pharmacognosy at Faculty of Pharmacy Cairo University, he has been a tremendous mentor for me. I would like to thank him for encouraging my research and for allowing me to grow as a research scientist. his advice on my research has been invaluable.

I thank *Prof. Dr. Sayed El-Toamy*, Professor of Chemistry of Natural Products, NRC, Cairo, Egypt. For his help in isolation of phenolic compounds. I greatly appreciate all the hard work and the tremendous support of him and for his extensive help with me. This part would not be possible without his help.

A special thanks to *Dr. Adel Fathy El-Tohamy*, Lecturer of Toxicology and Forensic Medicine, Faculty of Veterinary Cairo University, for having welcomed me in veterinary medicine. I would like to thank him for his professional guidance

and personal support and for his advice and nice cooperation in assessment of hepatoprotective and antioxidant assessment.

There is no way to express how much it meant to me to have been a member of Pharmacognosy Department, Faculty of Pharmacy, Al-Ahram Canadian University. These brilliant friends and colleagues inspired me over the many years. This thesis would not have been possible without the inspiration and support of several wonderful individuals — my thanks and appreciation to all of them

Sincere thanks to all my friends for their kindness and moral support during my study. My thanks go to them for their support to complete the research work directly or indirectly. Thanks for the friendship and memories.

Last but not least, my deepest gratitude goes to my beloved parents and also to my brother for their endless love, prayers and encouragement. Their kindness means a lot to me. Thank you very much. I am extremely grateful to them for the keen interest shown to complete this thesis successfully.

*Mina Michael Melk*
