Study of Adverse Effects of Agriculture Drainage Water on Reproductive Traits and Some Hematological Parameters in Rabbits

Thesis

M. Abd El Fattah
F.D. Al-Naity
A.B. Okab
A. Hofe

Submitted in Partial Fulfillment for the Degree of

M.Sc. in Environmental studies

By

Ahmed Abd Allah Ahmed Koriem

B. Sc. Zoology, Faculty of Science, 1983,
University of Alexandria

**Department of Environmental Studies
Institute of Graduate Studies and Research
University of Alexandria**

2004

بسم الله الرحمن الرحيم

صدق الله العظيم

Supervisors

Dr./ Aly Bassunny Okab

**Associate professor of Animal physiology
Department of Environmental Studies
Institute of Graduate Studies and Research
Alexandria University**

Dr./ Afaf Mahmoud Hafez

**Associate professor of Genetics
Department of Environmental Studies
Institute of Graduate Studies and Research
Alexandria University**

Dr./ Sabah Gaber El-Banna

**Lecturer of Biochemistry
Department of Environmental Studies
Institute of Graduate Studies and Research
Alexandria University**

*In the memory of my father
And to my beloved family*

ACKNOWLEDGEMENTS

I wish to acknowledge with sincere gratitude and appreciation the supervision of Dr./ Aly Bassunny Okab, Associate professor of Animal physiology, Department of Environmental Studies, Institute of Graduate Studies and Research, Alexandria University, for his patience, guidance and everlasting support throughout this study.

I am truly grateful to Dr./ Afaf Mahmoud Hafez, Associate professor of Genetics, Department of Environmental Studies, Institute of Graduate Studies and Research, Alexandria University for her help, support and encouragement.

I wish to thank Dr./ Sabah Gaber El-Banna, Lecturer of Biochemistry, Department of Environmental Studies, Institute of Graduate Studies and Research, Alexandria University, for her invaluable advice, help and everlasting support throughout this study.

I wish to thank Dr./ Mona Abd El-Hamid Yehia, Associate professor of Histochemistry and Cell Biology, Department of Histochemistry and Cell Biology, Medical Research Institute, Alexandria University, for her help, support and guidance in the histological and histochemical studies throughout this study.

I wish to thank Dr./ Magdy Abd El-Salam, professor of Animal Breeding, Department of Animal Production, Faculty of Agriculture, Alexandria University, for his help and guidance in the statistical analysis.

I wish to thank Prof. Dr./ Ahmed Morsi Attia, Professor of Pesticide Chemistry, Department of Environmental Studies, Institute of Graduate Studies and Research, Alexandria University, for his invaluable support and encouragement.

I sincerely thank the technicians of the laboratory of Environmental Toxicology for their ever lasting technical help.

I sincerely would like to thank my family for their complete encouraging and support.

Contents

SUBJECTS	Page
Introduction	1
Aim of the work	5
Review of literature	6
• Effect of drinking agricultural drainage water on feed and water intake	8
• Effect of drinking agricultural drainage water on blood characteristics	8
• Effect of drinking agricultural drainage water on some blood plasma biochemical parameters	10
• Effect of drinking agricultural drainage water on some hepatic microsomal parameters	14
• Effect of drinking agricultural drainage water on reproductive performance of male rabbit	15
• Effect of drinking agricultural drainage water on seminal plasma constituents	17
• Organophosphate residues in liver and kidney tissues of rabbits	19
• Effect of drinking agricultural drainage water on the histopathology of testes, liver, kidney and spleen	19
• Effect of drinking agricultural drainage water on some histochemical parameters	22
• Dehydrogenase enzymes	22
• Alkaline phosphatase	25
Materials and methods	26
Animals and management	26
Experimental design	27
Blood analysis	28
Blood plasma analysis	29
Semen characteristics	30
Seminal plasma analysis	31
Liver microsomal enzymes and protein	32
Determination of organophosphate residues:	33
1. Preparation of the standard solution	33
2. Extraction of pesticide residues	33
3. Clean up	34
4. Determination and recovery	34
Recovery rates of organophosphate residues from liver and kidney tissues of rabbits	35

Histopathological and histochemical studies	37
Statistical analysis	38
Results and discussion	39
• Chemical composition of tap and agricultural drainage water	39
• Effect of drinking agricultural drainage water on feed and water intake	41
• Effect of drinking agricultural drainage water on blood characteristics	48
• Effect of drinking agricultural drainage water on blood plasma biochemical constituents	55
• Effect of drinking agricultural drainage water on liver and kidney Functions	62
• Liver functions	62
• Kidney functions	70
• Effect of drinking agricultural drainage water on reproductive performance of male rabbits	75
• Effect of drinking agricultural drainage water on seminal plasma constituents	92
• Effect of drinking agricultural drainage water on some hepatic microsomal parameters	109
• Determination of organophosphate residues in liver and kidney tissues of rabbits	112
• Effect of drinking agricultural drainage water on the histopathology of testes, liver, kidney and spleen	115
1. Testes	115
2. Liver	118
3. Kidney	121
4. Spleen	124
• Effect of drinking agricultural drainage water on histochemical changes	127
1. Liver and Kidney	127
a- Lactate dehydrogenase (LDH)	127
b- Alkaline phosphatase (ALP)	127
2. The Spleen	136
a- Dehydrogenase enzymes	136
b- Oxidoreductase enzyme	139
c- Phosphatase enzymes	141
Conclusions	144
Recommendations	145
Summary	146
References	150

List of tables

Table 1: Recovery Percentages of pirimiphos-methyl, chlorpyriphos-methyl, fenitrothion, malathion, profenofos and diazinon from liver and kidney samples of male New-Zealand rabbits drinking agricultural drainage water.	36
Table 2: Chemical composition of tap water, drainage water and mixed water used as drinking water for New-Zealand male rabbits during the experimental period.	42
Table 3: Mean squares for the effects of treatment, weeks and their interactions on Feed Intake and Water Intake of male New-Zealand rabbits drinking agricultural drainage water during treatment period..	43
Table 4: Mean squares for the effects of treatment, weeks and their interactions on Feed Intake and Water Intake of male New-Zealand rabbits drinking agricultural drainage water during recovery period.	43
Table 5: Changes in Feed Intake of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	44
Table 6: Changes in Water Intake of Male New-Zealand Drinking Agricultural Drainage Water.	45
Table 7: Mean squares for the effects of treatment, weeks and their interactions on blood WBC'S, RBC'S, PCV, Hb, MCV, MCH and MCHC of male New-Zealand rabbits drinking agricultural drainage water during treatment period.	49
Table 8: Mean squares for the effects of treatment, weeks and their interactions on blood WBC'S, RBC'S, PCV, Hb, MCV, MCH and MCHC of male New-Zealand rabbits drinking agricultural drainage water during recovery period.	49
Table 9 : Changes in White Blood Cells of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	50
Table 10: Changes in Red Blood Cells of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	50
Table 11: Changes in Packed Cell Volume of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	51
Table 12: Changes in Mean Corpuscular Volume of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	51
Table 13: Changes in Mean Corpuscular Hemoglobin of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	52
Table 14: Changes in Mean Corpuscular Hemoglobin Concentration of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	52
Table 15: Changes in Hemoglobin in Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	53
Table 16: Mean squares for the effects of treatment, weeks and their interactions on blood plasma TP, Albumin, Globulin, A/G ratio, TL and Cholesterol of male New-Zealand rabbits drinking	56

agricultural drainage water during treatment period.	
Table 17 : Mean squares for the effects of treatment, weeks and their interactions on blood plasma TP, Albumin, Globulin, A/G ratio, TL and Cholesterol of male New-Zealand rabbits drinking agricultural drainage water during recovery period.	56
Table 18: Mean squares for the effects of treatment, weeks and their interactions on blood plasma Nitrite and Hydroxylamine of male New-Zealand rabbits drinking agricultural drainage water during treatment period.	56
Table 19: Mean squares for the effects of treatment, weeks and their interactions on blood plasma Nitrite and Hydroxylamine of male New-Zealand rabbits drinking agricultural drainage water during recovery period.	56
Table 20: Changes in Total Protein in Blood Plasma of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	57
Table 21: Changes in Albumin in Blood Plasma of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	57
Table 22: Changes in Globulin in Blood Plasma of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	58
Table 23: Changes in Albumin Globulin Ratio in Blood Plasma of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	58
Table 24: Changes in Total Lipids in Blood Plasma of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	59
Table 25: Changes in Cholesterol in Blood Plasma of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	59
Table 26: Changes in Nitrite in Blood Plasma of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	60
Table 27: Changes in Hydroxyl Amine in Blood Plasma of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	60
Table 28: Mean squares for the effects of treatment, weeks and their interactions on blood plasma AST, ALT, AST/ALT ratio, LDH and ALP of male New-Zealand rabbits drinking agricultural drainage water during treatment period.	65
Table 29: Mean squares for the effects of treatment, weeks and their interactions on blood plasma AST, ALT, AST/ALT ratio, LDH and ALP of male New-Zealand rabbits drinking agricultural drainage water during recovery period.	65
Table 30: Changes in Aspartate Aminotransferase in Blood Plasma of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	66
Table 31 : Changes in Alanine Aminotransferase in Blood Plasma of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	66
Table 32: Changes in AST/ALT Ratio in Blood Plasma of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	67
Table 33: Changes in Lactate Dehydrogenase in Blood Plasma of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	67
Table 34: Changes in Alkaline Phosphatase in Blood Plasma of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	68
Table 35: Mean squares for the effects of treatment, weeks and their interactions on blood plasma Urea, Creatinine and Urea/Creat ratio of male New-Zealand rabbits drinking agricultural drainage water	72

during treatment period.	
Table 36: Mean squares for the effects of treatment, weeks and their interactions on blood plasma Urea, Creatinine and Urea/Creat ratio of male New-Zealand rabbits drinking agricultural drainage water during recovery period.	72
Table 37: Changes in Urea in Blood Plasma of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	72
Table 38: Changes in Creatinine in Blood Plasma of Male New-Zealand Rabbits Drinking Agricultural Drainage Water .	73
Table 39: Changes in Urea Creatinine Ratio in Blood Plasma of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	73
Table 40: Mean squares for the effects of treatment, weeks and their interactions on Sperm volume, Motility, Motile Sp./Ej., Motile Sp./ml, Dead Sp.%, Live Sp.% and Normal Sp.% of male New-Zealand rabbits drinking agricultural drainage water during treatment period.	78
Table 41: Mean squares for the effects of treatment, weeks and their interactions on Sperm volume, Motility, Motile Sp./Ej., Motile Sp./ml, Dead Sp.%, Live Sp.% and Normal Sp.% of male New-Zealand rabbits drinking agricultural drainage water during recovery period.	78
Table 42: Mean squares for the effects of treatment, weeks and their interactions on Sp./ml, Sp. Output, Altered Acrosomes and TFSF of male New-Zealand rabbits drinking agricultural drainage water during treatment period.	79
Table 43: Mean squares for the effects of treatment, weeks and their interactions on Sp./ml, Sp. Output, Altered Acrosomes and TFSF of male New-Zealand rabbits drinking agricultural drainage water during recovery period.	79
Table 44: Changes in Ejaculate Volume of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	80
Table 45: Changes in Sperm Motility of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	81
Table 46: Changes in Motile Sperm / milliliter of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	82
Table 47: Changes in Motile Sperm / Ejaculate of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	83
Table 48: Changes in Sperm Concentration of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	84
Table 49: Changes in Sperm Output of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	85
Table 50: Changes in Total Dead Sperm of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	86
Table 51: Changes in Abnormal Sperm/ Ejaculate of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	87
Table 52: Changes in Altered Acrosomes of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	88
Table 53: Changes in Total Functional Sperm Fraction of Male New-Zealand Rabbits Drinking Agricultural Drainage Water.	89
