**CORRELATION BETWEEN MUSCULAR
ACTIVITY AND RETENTION OF DENTURES
WITH DIFFERENT BORDER MOLDING
MATERIALS**

THESIS

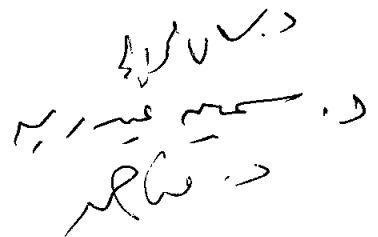

Submitted to the Faculty of Oral and Dental Medicine,
in partial fulfillment of the requirements for the Master
Degree in Prosthodontics

By

Yasser Mohamed Shawky Mostafa

B.D.S. Cairo University

**Department of Prosthodontics
Faculty of Oral and Dental Medicine
Cairo University
2000**

Acknowledgment

First of all I would like to thank **GOD** deeply and express my gratitude for his favor and support.

I wish to express my sincere gratitude to **Professor Dr. Samy Mahmoud El-Sayed**, Professor of Prosthodontics, Faculty of Oral and Dental Medicine, Cairo University for his valuable supervision, guidance and continual advice and encouragement throughout this work.

I would like to express my deep appreciation and thanks to **Dr. Mona Ahmed Mahmoud**, Associate Professor of Prosthodontics, Faculty of Oral and Dental Medicine, Cairo University for her supervision, sincere co-operation and valuable advice.

I would like to express my sincere gratitude and appreciation to **Dr. Samiha Abu-El- Yazid Abd Raboh**, Associate Professor of Internal Medicine, Faculty of Medicine for girls, Al- Azhar University for her supervision, guidance and valuable encouragement.

I am greatly indebted to **Professor Dr. Said Abbas El Basty**, Professor of Prosthodontics, Faculty of Oral and Dental Medicine, Cairo University for his generous help, noble support and kindness.

I would like to express my deep appreciation and thanks to **Dr. Mohamed Aly El-Yasaky**, Associate Professor of Restorative Dentistry, Faculty of Dental Medicine for girls, Al-Azhar University for his help, valuable guidance and moral support.

I would like to express my deep thanks to **Dr. Nelly Hassan Aly El-Din** Lecturer of Epidemiology and Biostatistics, National Cancer Institute for her great help in the statistical analysis of the data of this study.

Countless thanks are extended to all my professors, colleagues and staff members of the Prosthodontic Department, Faculty of Oral and Dental Medicine, Cairo University for their spiritual encouragement and support.

Supervisors

Professor Dr.Samy Mahmoud El- Sayed

Professor of Prosthodontics

Faculty of Oral and Dental Medicine

Cairo University

Dr. Mona Ahmed Mahmoud

Associate Professor of Prosthodontics

Faculty of Oral and Dental Medicine

Cairo University

Dr. Samiha Abu- El- Yazid Abd Raboh

Associate Professor of Internal Medicine

Faculty of Medicine for Girls

Al- Azhar University

To the soul of my father,

My family

And my beloved son Seif

For their love and support

C O N T E N T S

Chapter	Page
I- Introduction.....	1
II-Review of literature.....	3
Retention of complete denture.....	3
Border molding.....	10
Methods of enhancing retention of maxillary complete Denture.....	12
Evaluation of denture retention.....	14
Electromyography.....	18
Factors affecting masticatory muscle activity.....	20
III- Aim of the study.....	33
IV- Materials and methods.....	34
V- Results.....	63
VI-Discussion.....	85
VII- Summary and conclusions.....	95
References.....	98
Arabic summary.....	--

List of Figures

	Page
Fig. 1: Border molded tray with green stick compound.....	37
Fig. 2: Zinc oxide and Eugenol secondary impression.....	37
Fig. 3: Forcemeter tension gauge graduated from 0 to 2000 gms.....	39
Fig. 4: Tin foil strip adapted on a line drawn from the Incisive papillae to a point midway between the fovea palatini...	41
Fig. 5: Tin foil strip divided into two equal halves to determine the geometrical center.....	41
Fig. 6: Maxillary denture with wire loop fixed at the geometrical center.....	42
Fig. 7: Application of the dislodging force at the geometrical center.....	44
Fig. 8: Application of the dislodging force at the canine area.....	44
Fig. 9: Application of the dislodging force at the labial notch.....	45
Fig. 10: The electromyographic apparatus.....	45
Fig. 11: The position of electrodes placement for the masseter muscle.....	47
Fig. 12: The position of electrodes placement for the temporalis muscle.....	48
Fig. 13: A transparent plastic template showing the positions surface electrodes in relation to the studied muscles, together with certain anatomical landmarks.....	50
Fig. 14: EMG record of the masseter muscle during chewing crushable type of food (peanuts).....	52

List of Figures Cont'd

	Page
Fig. 15: EMG record of the masseter muscle during chewing hard fibrous type of food (carrots).....	53
Fig. 16: EMG record of the masseter muscle during chewing soft type of food (banana).....	54
Fig. 17: EMG record of the temporalis muscle during chewing crushable type of food (peanuts).....	55
Fig. 18: EMG record of the temporalis muscle during chewing Hard fibrous type of food (corrots).....	56
Fig. 19: EMG record of the temporalis muscle during chewing soft type of food (banana).....	57
Fig. 20: Border molded denture with dough molding resin.....	59
Fig. 21: Border molded denture with heavy body rubber base..	61
Fig. 22: Mean retention values measured at different points of force application with the three border molding materials	70
Fig. 23: Mean muscle activity values of both temporalis and masseter muscles measured with peanuts, carrots and banana with the three border molding materials...	76

List of Tables

Table No.	Page
Table (1) Descriptive statistics of mean retention values measured at different points of force application with the three border molding materials.....	65
Table (2) ANOVA for comparison of retention of dentures using different border molding materials at different points of force application.....	67
Table (3) Scheffe test for multiple comparisons at different points of force application with the three border molding materials.....	69
Table (4) Descriptive statistics of mean (right, left) muscle activity values of both temporalis and masseter muscles with peanuts, carrots and banana with the three border molding materials.....	73
Table (5) ANOVA for comparison of muscle activity using different border molding materials with different types of food.....	75
Table (6) Descriptive statistics and reliability measure of retention power with green stick material measured at geometrical center.....	78
Table (7) Descriptive statistics and reliability measure of retention power with green stick material measured at right canine eminence.....	78

List of Tables Cont'd

Table No.	Page
Table (8) Descriptive statistics and reliability measure of retention power with green stick material measured at left canine eminence.....	79
Table (9) Descriptive statistics and reliability measure of retention power with green stick material measured at labial notch.....	79
Table (10) Descriptive statistics and reliability measure of retention power with molding resin material measured at geometrical center.....	80
Table (11) Descriptive statistics and reliability measure of retention power with molding resin material measured at right canine eminence.....	80
Table (12) Descriptive statistics and reliability measure of retention power with molding resin material measured at left canine eminence.....	81
Table (13) Descriptive statistics and reliability measure of retention power with molding resin material measured at labial notch.....	81
Table (14) Descriptive statistics and reliability measure of retention power with rubber base material measured at geometrical center.....	82
Table (15) Descriptive statistics and reliability measure of retention power with rubber base material measured at right canine eminence.....	82
