FINITE ELEMENT STUDY OF THE BEHAVIOR OF STONE COLUMNS

by

Dahlia Hisham Hussein Hafez
B.Sc. in Civil Engineering 2000
Cairo University

A Thesis Submitted to the
Faculty of Engineering at Cairo University
in Partial Fulfillment of the
Requirements for the Degree of
MASTER OF SCIENCE
In
CIVIL ENGINEERING

FACULTY OF ENGINEERING, CAIRO UNIVERSITY
GIZA, EGYPT
January 2003

FINITE ELEMENT STUDY OF THE BEHAVIOR OF STONE COLUMNS

by

Dahlia Hisham Hussein Hafez
B.Sc. in Civil Engineering 2000
Cairo University

A Thesis Submitted to the
Faculty of Engineering at Cairo University
in Partial Fulfillment of the
Requirements for the Degree of
MASTER OF SCIENCE
In
CIVIL ENGINEERING

Under the Supervision of

Prof. Dr. Mostafa El-Sayed Mossaad Dr. Hesham Abdel Wahed El Shazly

Prof. of Soil Mechanics and Foundation
Engineering, Faculty of Engineering
Cairo University

Associate Prof. of Soil and Structural
Dynamics,
Construction Research Institute

January 2003

ACKNOWLEDGEMENTS

I would like to express my deep gratitude to all whom assisted in the completion of this thesis among the faculty staff and my family.

I am very grateful to my supervisor Professor Mostafa E. Mossaad for his support and continuous encouragement. His remarkable devotion in his teaching and research work has inspired me to thrive for the best.

I would like to express my deepest gratitude to Dr. Hesham A. El-Shazly who continuously guided my studies in this research. I will always remember his sincere support, valuable reviewing and discussions.

I am also grateful to all staff members of the Soil Mechanics and Foundation Engineering Division. My special thanks go to Professor Magda M. Abdel Rahman for her encouragement and strong support. I would like also to extend my thanks to Professor Mamdouh A. Sabry, Professor Mostafa A. Keifa and Professor Amr Darrag for their concrete support and their help with data.

Finally, I would like to dedicate this thesis to all my family, especially my parents, and my husband as a slight return for their great support, patience and understanding. My deepest gratitude is to my little boy Hamza.

TABLE OF CONTENTS

ACKNOWLEDGEMENTS	i
TABLE OF CONTENTS	ii
LIST OF TABLES	vii
LIST OF FIGURES	viii
NOTATIONS	xv
ABSTRACT	xix
 CHAPTER 1 : INTRODUCTION	 1
1.1 PROBLEM STATEMENT	1
1.2 STUDY OBJECTIVES	1
1.3 SCOPE OF WORK	3
1.4 THESIS ORGANIZATION	3
 CHAPTER 2 : LITERATURE REVIEW	 5
2.1 INTRODUCTION	5
2.1.1 Definition	5
2.1.2 History	5
2.2 METHODS OF GRANULAR PILE CONSTRUCTION	6
2.2.1 Vibro-Compaction Method	6
2.2.2 Vibro-Replacement Method	6
2.2.3 Vibro-Compozer Method	9
2.2.4 Cased-Borehole Method	9
2.3 BEARING CAPACITY ANALYSES	11
2.4 SETTLEMENT ANALYSES	18
2.4.1 Greenwood Method	18
2.4.2 Priebe Method	18
2.4.3 Equilibrium Method	22

2.4.4	Incremental Method	23
2.4.5	Granular Wall Method	26
2.4.6	Numerical Methods	26
2.4.7	Estimation of Rate of Consolidation	28
2.5	SLOPE STABILITY ANALYSES	29
2.5.1	Profile Method	29
2.5.2	Average Shear Strength Method	30
2.5.3	Lumped Parameter Method	33
2.6	STONE COLUMN BEHAVIOR USING NUMERICAL METHODS	34
2.6.1	Performance of a Stone Column Foundation	34
2.6.2	Effect of Sand Piles on Stress Contours	37
2.6.3	Nonlinear Mechanism of Clay-Sand Column System	38
2.6.4	Spatial Analysis of Column Groups	39
2.6.5	Special Column Types	39
2.7	EXPERIMENTAL STUDIES OF STONE COLUMN BEHAVIOR	40
2.7.1	Laboratory Test Studies	40
2.7.2	Model Studies	42
CHAPTER 3 : EFFECT OF INSTALLATION PROCESS ON STONE COLUMNS – SOIL SYSTEMS		44
3.1	INTRODUCTION	44
3.2	LOAD TEST AND FIELD CONDITIONS	45
3.2.1	Project Description	45
3.2.2	Site Conditions	46
3.2.3	Stone Columns as an Improvement Technique	46
