Acknowledgement

First and foremost thanks to God.

I would like to express my deepest gratitude to the supervisors of this work:

*To the memory of **Prof. Dr. Yassin Abd EL-Ghaffar**, Professor of Medicine, Ain Shams University "Pioneer of Hepatology" for suggesting the idea of this study and invaluable support and assistance throughout this work. Without his deep interest and faithful guidance, this study could not have been possible. Moreover, his ideality, fatherly attitude, taught me a lot, not only in medical practice but also in life.*

***Prof. Dr. Ahmed Abbass Raouf**, Professor and Chairman of Biochemistry Department; Menoufiya University, for his meticulous supervision of every item, and valuable advices throughout this work.*

***Prof. Dr. Saleh Mahmoud saleh**, Professor and Chairman of Internal Medicine Department, Liver institute Menoufiya University, who kindly guided my steps and led my way with his continuous encouragement to accomplish this study.*

*I wish also to thank **Dr. Eman Ahmed Rewisha**, Lecturer of Internal Medicine, Liver Institute Menoufiya University, who had helped me in all steps of this work.*

God bless all the patients who were participated in this study.

I wish also to thank all those who had helped me in accomplishing this work.

Essam. M. Omer
