

Identification of Bagasse degrading gene(s) in cellulolytic micro-organisms

Thesis

Submitted for Partial Fulfilment of Master Degree in
Microbiology

By

Mustafa Fathy Mustafa El-Bakary

B.Sc. (Microbiology, 2010)

Researching Assistant

Agricultural Genetic Engineering Research Institute (AGERI)

Agricultural Research Center (ARC)

Supervisors

Dr. Khaled Zakaria El Baghdady

Associate Professor of Microbiology

Microbiology Department, Faculty of Science

Ain Shams University

Dr. Amr Mohamed Ageez

Associate Professor of Molecular Biology

Agricultural Genetic Engineering Research Institute (AGERI)

Agricultural Research Center (ARC)

Microbiology Department

Faculty of Science

Ain Shams University

2019

Approval Sheet

Name: Mustafa Fathy Mustafa El-Bakary

Title: Identification of Bagasse degrading gene(s) in cellulolytic micro-organisms

Super visors

Dr. Khaled Zakaria El Baghdady

Associate Professor of Microbiology, Microbiology Department
Faculty of Science, Ain Shams University.

Dr. Amr Mohamed Ageez

Associate Professor of Molecular Biology,
Agricultural Genetic Engineering Research Institute (AGERI),
Agricultural Research Center (ARC).

Examination committee

Prof. Yehia Abd-El Monem Othman

Professor of Microbial Genetics, Botany Department,
Faculty of Science, Mansoura University.

Prof. Heba Abd-El Monem El-Refaay

Professor of Chemistry of Natural and Microbial Products,
National Research Center.

Dr. Khaled Zakaria El Baghdady

Associate Professor of Microbiology, Microbiology Department
Faculty of Science, Ain Shams University.

Dr. Amr Mohamed Ageez

Associate Professor of Molecular Biology,
Agricultural Genetic Engineering Research Institute (AGERI),
Agricultural Research Center (ARC).

Date 22/ 1 / 2019

Approval date / / 2019

University council approved / /

Declaration

**This dissertation has not been previously submitted for any
degree at this or at any other university**

Mustafa Fathy Mustafa El-Bakary

Acknowledgements

*Firstly, I would like to thank **Allah** for helping me to complete the present thesis.*

*I do not have the words to express my respectful to **Dr. Khaled Zakaria El Baghdady**, Associate Professor of Microbiology department, Faculty of science, Ain shams university, for his helping, encouragement, cooperation and valuable advices in each step of this thesis. I'm proud to be one of his students.*

*I am gratefully and sincerely thankful to my dear supervisor **Dr. Amr Mohamed Ageez**, Associate Professor, Genomics, Proteomics and Bioinformatics Facility, Agricultural genetic engineering institute, Agricultural research center, for his help, continuous support, valuable instructions and providing all requirements for the practical work, guidance from the start of the work. He is always patient and the best supervisor. I'm really proud to be one of his students.*

I would like to pay thanks to all staff members of microbiology department, Ain Shams University for their sincere help and support.

*A deep thanks to my colleagues, **Dr. Sameh Haikal, Dr. Fayrouz Hassan, Mr. Akram Hassan and Mrs. Abeer Muhamed** in Microbial Genetic Resources Department, National Gene Bank, Agricultural research center for their continuous helping.*

*I can't forget to thank my colleagues, **Mrs. Lamis Muhamed and Mrs. Nourhan Fouad**, Assistant researchers, Agricultural Genetic Engineering Institute, Agricultural research center, and **Mr. Muhammad Farag**, Assistant Lecturer, Botany Department, Faculty of Science, Ain Shams University for their helping and encouragement.*

*My deep appreciation goes to my whole family especially **my Dears Mother, Father and sister** for their continuous prayers, support and for everything they have done for me.*

*Finally, very especial thanks to **My Wife, Hajar** who has stood by me through my study and for her constant support and prayers; till the thesis was completed.*

Abstract	
Introduction	1
Aim of work	4
1. Literature Review	5
1.1 Fossil fuels and their impacts	5
1.2 Agricultural wastes	5
1.3 Biofuel and agricultural wastes	7
1.4 Sugarcane bagasse (as agricultural waste)	9
1.4.1 Cellulose	12
1.4.2 Hemicellulose	14
1.4.3 Lignin	15
1.5 Pretreatment of lignocellulosic materials	16
1.5.1 Physical pretreatment	19
1.5.2 Chemical pretreatment	20
1.5.3 Physico-chemical pretreatment	22
1.5.4 Biological pretreatment	23
1.6 Cellulolytic microorganisms and its role in degradation of Agricultural wastes	24

1.6.1 Bacteria	25
1.6.2 Actinobacteria	26
1.6.3 Fungi	27
1.7 Enzyme sets for Biodegradation of plant cellulose	28
1.7.1 Exoglucanases (FPase)	28
1.7.2 Endoglucanases (CMCase)	29
1.7.3 β -glucosidases	30
1.8 Endoglucanase genes in cellulose degrading microorganisms	31
2 Materials and Methods	33
2.1 Materials	33
2.1.1 Samples	33
2.1.2 Microbial isolates	34
2.1.3 Culture media	34
2.1.4 Reagents, buffers and chemicals	39
2.2 Methods	44
2.2.1 Samples preparation for microbial isolation	44
2.2.2 Preliminary (qualitative) determination of cellulase activity for isolated microorganisms	45
2.2.3 Quantitatively determination of cellulase activity of isolated microorganisms	45
2.2.3.1 Pretreatment of sugarcane bagasse	45
2.2.3.2 Cellulase production from isolated	46

cellulolytic microorganisms	
2.2.3.3 Enzymes Assays of isolated cellulolytic microorganisms	46
2.2.3.3.1 Exoglucanase assay (FPase assay)	47
2.2.3.3.2 Endoglucanase assay (CMCase assay)	48
2.2.4 Optimization of cultivation conditions of the potent isolates	49
2.2.4.1 Optimization of incubating temperature	49
2.2.4.2 Optimization of incubating time	50
2.2.4.3 Induction strength of cellulase production by different carbon sources	50
2.2.5 Genomic DNA extraction of the potent isolates	50
2.2.6 Polymerase chain reaction (PCR)	51
2.2.6.1 16S rRNA gene amplification from the potent bacterial and actinobacterial isolates	51
2.2.6.2 18S rRNA gene and ITS region amplifications from the potent fungal isolate	52
2.2.6.3 Endoglucanase gene of the potent bacterial isolate	52
2.2.6.4 Endoglucanase gene of the potent actinobacterial isolate	53
2.2.6.5 Endoglucanase gene of the potent fungal isolate	53

2.2.7 DNA sequencing	55
3.9. Phylogenetic analysis	55
3 Results	56
3.1 Isolation of microorganisms from different sources	56
3.2 Preliminary (qualitative) determination of cellulase activity for isolated microorganisms	57
3.3 Quantitatively determination of cellulase activity of isolated microorganisms	61
3.3.1 Exoglucanase assay (FPase assay)	61
3.3.2 Endoglucanase assay (CMCase assay)	64
3.4 Optimization of growth conditions for cellulolytic enzymes production	68
3.4.1 Effect of incubating temperature	68
3.4.2 Effect of incubating time	71
3.5 Cellulase production using different cellulose sources	74
3.6 Identification of the potent isolates	77
3.7 Phylogenetic trees of identified isolates	83
3.7.1 Phylogenetic tree of PB1 and TA1 isolates	83
3.7.2 Phylogenetic tree of S4 isolate	86
3.8 Identification of endoglucanase gene	88
3.8.1 Phylogenetic tree of glu gene from <i>Bacillus pumilus</i>	91

3.8.2 Phylogenetic tree of eglS gene of <i>Streptomyces rochei</i>	92
3.8.3 Phylogenetic tree of eglb gene of <i>Aspergillus flavus</i>	93
5 Discussion	95
Summary	102
Conclusion	104
References	105
