ACKNOWLEDGEMENT

Praise is to **Allah**, the Merciful, the Compassionate for all the countless gifts I have been offered of these gifts; those assigned to give precious hands that enabled me to fulfill this study. Some of them will be cordially acknowledged.

Words are never enough to convey my sincere gratitude towards a great professor, tender father and very close friend. With appreciation, I express my great indebtedness to **Prof Abd El-Hamid I. Guinena**, professor of Community Medicine, Faculty of Medicine, Assiut University, who generously offered his sincere guidance, constructive criticism, meticulous help, effective impetus and indispensable support through revising the text. The accomplishment of this work could have never reached its destination without his supervision.

I very much acknowledge **Prof. Nawal M. Soliman**, Professor of Community Health Nursing, Faculty of Nursing, Ain Shams University, for her sincere directions and continuous support all through this study.

I express my deepest thanks to **Dr Sawsan M. Alaa El-Din**, Lecturer of community Health Nursing, Faculty of Nursing Assiut University, for her extra-ordinarily great help and support during the conduction of this work, Her meticulous revision, creative comments and generous advice were essential for all milestones of development for this work.
