APPROVAL SHEET

Demographic and Socio Economic Factors Affecting Bone Density

By

Fatchia Ahmed Abd El-Monem El Halawany

This thesis for M.Sc. degree in biostatistics, department of biostatistics & demography, institute of statistical studies and research, Cairo university, has been approved by:

Name:

Prof. Hesham Hassan Makhlouf _____

Professor at Demography& Biostatistics

Institute of Statistical Studies and research

Cairo University

Mr. Saad Zaghloul Amin _____

Consultant at Cairo Demographic Center

Prof. Youssef Mostafa Magoub _____

Professor at Demography& Biostatistics

Institute of Statistical Studies and research

Cairo University

To My Family

Those Who Suffered A Lot

Acknowledgment

Before all, I should express my deep thanks to ***God***, without his great blessing I would never accomplish my work.

I would like to express my sincere gratitude and deep appreciation to ***Professor Mohamed Naguib***, Demography & Biostatistics Department, Institute of Statistical Studies and Research; Cairo University for his precious supervision, valuable experiences, generous help and continuous meticulous guidance; I stand in great debt for all what he did.

I am deeply indebted and grateful to ***Professor Youssef Mahgoub,*** Demography & Biostatistics Department; Institute of Statistical Studies and Research; Cairo University, For his precious supervision, without his vast experience, knowledge, help, support and sympathetic attitude, this work would not have been possible and would have never come to light.

I wish to express my deep thanks to ***Professor Hoda Abd El-Fattah Hassn***, Dean of National Institute of Nutrition. ***Professor Farouk Shahin***, the E-dean of National Institute of Nutrition, for the provision of all facilities and data required for this work. A special thanks for their unlimited help and cooperation during my work.

I would like also to tender my sincere gratitude and thankfulness to ***Professor Moataza Rashed,*** Professor of nutrition, National Institute of Nutrition for the grate efforts and valuable comments she gave me.

Deep gratitude is to all members of National Institute of Nutrition; especially ***Dr.Abdel Rahman A. Kamel,*** for their great help, valuable support, precious advice and friendly attitude.

I am also greatly indebted to ***Professor Kadria El-khamisy*** Manager of the Natural Medicine Department in Mataria Educational Hospital, for her valuable advice and continuous encouragement she allowed me to complete this work.

I would like to thank all members of Computer Center, Faculty of Pharmacy, Cairo University, especially ***Professor Dr. Samir El Moghazy***, the Head of the computer center for their great help, valuable support, precious advice and friendly attitude.

Finally, I don't forget to introduce the best thanks for my family, the Soul of my father, **my mother**, my husband ***Engineer Khaled Abd-Alla***, my son and my daughter for their unlimited support and patience during the difficult times of this work.

Special thanks for my sister ***Engineer Amira El Halawany***, who introduced the presentation of my work.

- List of Figures III
- List of Appendices IV
- Abstract 1

Chapter 1 (Introduction) 3

1.1 Introduction 3

1.2 The importance of the study 5

1.3 Scope of the study: 8

1.4 Definitions and concepts of osteopenia and osteoporosis 8

1.5 Objectives of the study: 10

1.6 Methodology 11

1.6.1 Sampling Design and data source: 11

1.6.2 Data collection: 12

1.6.3 Data handling and Statistical Analysis: 12

Chapter 2 (Literature review) 13

2.1. Prevalence of osteoporosis and low bone mass 13

2.2. Risk factors affecting low bone mass 14

2.2.1. Demographic and Socio economic factors 18

I. Demographic factors 18

a) Age 18

b) Gender 21

c) Residence (geriatric homes & geriatric clubs or free living) 24

d) Race and Ethnicity 25

II. Socioeconomic factors **26**
a) Marital Status and Hip Fracture Risk 26
b) Education 27
c) Occupation 28
d) Income 28
2.2.2 Life Style and Nutrition assessments 29
a) 1. Dietary calcium intake 30
a) 2. Vitamin D 34
b) Physical activities 35
c) Sun exposure 38
d) Caffeine Consumption 39
1.Tea drinking 40
2.Coffee drinking 41
e) Carbonated beverages 43
f) Smoking 43
g) Spiritual drink 46
II. Nutritional assessment 47
2.2.3. Female reproductive history 50
i) Menopause 50
ii) Pregnancies 52
iii) History of breast feeding 53
iv) Use of contraceptives 56
2.3. Critical Review 59
2.4. Conceptual framework: 61

Chapter 3 (Prevalence of bone states and risk factors affecting bone density)..... 64

3.1 Descriptive 64

3.2 Prevalence of bone states 64

i) Gender.....64

ii) Age 67

iii) Marital status.....72

iv) Level of education 75

v) Occupation history 78

vi) Residence (geriatric homes or free living).....80

vii) Geographical areas.....85

3.3 Nutritional assessments.....87

3.4 Life style assessments on bone mass density 90

3.5 Effect of female reproductive history on bone mass density .100

3.6 Risk factors affecting bone density 103

Chapter 4 (Results and Discussion) 111

4.1. Prevalence of osteoporosis and low bone mass 111

a) Gender..... 112

b) Age.....113

c) Marital status.....113

d) Education 114

e) Occupation history.....114

f) Residence (geriatric homes & geriatric clubs or free living)115

g) Geographical areas (in Greater Cairo)..... 115

h) Body Mass Index (BMI).....115

4.2. Effect of the previous life style of the elderly.....117

4.3. Effect of female reproductive history 121

4.4. Risk factors affecting low bone mass 123

Chapter 5 (Conclusion and Recommendations)..... 126

5.1. Conclusion..... 126

5.2. Recommendations 128

Summary..... 131
