Faculty of Science

Chemistry Department

Synthesis of photocatalytic nanomaterials for production of clean alternative energy

A thesis submitted in partial fulfillment of the requirements for the degree of Doctor of Philosophy of Science in Chemistry

By

Karim Rabia' Diab Soliman

M.Sc. (2014)

Desert Research Center

Supervised by

Prof. Dr.

Saad Abd Elwahab.

Professor of Physical chemistry ,
Faculty of Science,

Ain Shams University

Prof. Dr.

Ahmed Mohamed Ali Youssef

Professor of Geophysics,

Desert Research Center

Ass. Prof.Dr

Heba Hassan El-Maghrabi

Ass.Prof. of Catalysis,

Egyptian Petroleum Research Institute

Dr.

Amr Ahmed Nada

Researcher of Material Science,

Egyptian Petroleum Research Institute

(2019)

Ain Shams UniveFrstity
Faculty of Science
Chemistry Department

Approval Sheet

Candidate: Karim Rabia' Diab Soliman

Degree: The Degree of Doctor of Philosophy of Science (Chemistry)

**Title : Synthesis of photocatalytic nanomaterials for
production of clean alternative energy**

Thesis supervised by:

Name	Position	Signature
Prof. Dr. Saad Abd El-Wahab Mohamed	Professor of Physical chemistry - Faculty of Science- Ain Shams University.	
Prof. Dr. Ahmed Mohamed Ali Youssef	Professor of Geophysics, Desert Research Center.	
Ass.Prof. Heba Hassan El-Maghrabi	Ass. Professor of Catalysis – Refining Department – Egyptian Petroleum Research Institute.	
Dr. Amr Ahmed Nada	Doctor of Material Science – Analysis and Evaluation Department- Egyptian Petroleum Research Institute.	

Head of Chemistry Department

Prof. Dr. Ibrahim Hosni Ali Badr

Ain Shams University

Faculty of Science

Approval Sheet

Degree: The Degree of Doctor of Philosophy of Science (Chemistry)

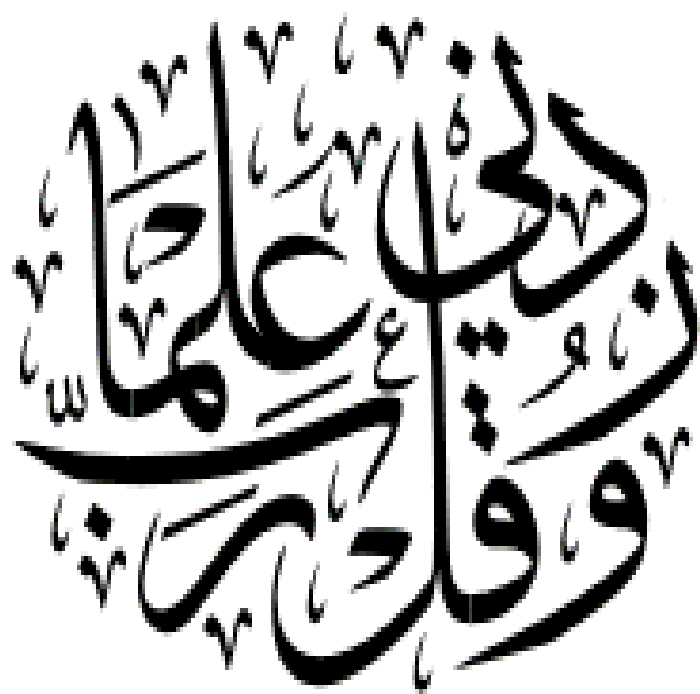

**Title : Synthesis of photocatalytic nanomaterials for
production of clean alternative energy**

Candidate: Karim Rabia' Diab Soliman

Thesis examination committee:

Name	Position	Signature
Prof. Dr. Saad Abd El-Wahab Mohamed	Professor of Physical chemistry –Faculty of Science- Ain Shams University.	
Prof. Dr. Ahmed Mohamed Ali Youssef	Professor of Geophysics, Desert Research Center.	
Prof. Dr. Yasser Mohamed Moustafa	Professor of Inorganic and Analytical Chemistry, Egyptian Petroleum Research Institute	
Prof. Dr. Mona Eid Mohamed	Professor of Radiation chemistry, The National Center for Radiation Research and Technology.	

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

صدق الله العظيم

Acknowledgment

Praise be to **Allah**, and deeply thankful to **Allah**, by the grace of whom the completeness and progress of this work was possible.

I would like to express my deepest thanks and gratitude to my supervisors **Prof. Dr. Saad Abd-Elwhab** Professor of Physical chemistry –Faculty of Science- Ain Shams University, for his kind Supervision, cooperation, and faithful help.

I would like to express my deepest gratitude, appreciation and respect to: **Prof. Dr. Ahmed Mohamed Ali Youssef** Professor of Geophysics, Desert Research Center, for his kind supervision, guidance support and constructive criticism.

I would like to express my great thanks and sincere appreciation to **Ass .Prof. Heba Hassan El-Maghrabi** Ass.Prof. of Catalysis – Egyptian Petroleum Research Institute, for masterly supervision, keen interest throughout the present work and Valuable contributions and timely advice which shaped my thesis work.

I would like to express my special and heartfelt thanks to: **Dr. Amr Ahmed Nada** Researcher of Material Science –Egyptian Petroleum Research Institute, for his kind supervision, and I always say that he is not my friend but my brother. Once more I thank him for his patience in helping me complete this endeavor

Finally and most importantly, I would like to express my deepest gratitude and thanks to my dear father and my dear mother for their endless love, their sacrifices and unconditional moral support. I also like to express my heartfelt thanks to my wife, my children (Omar & Menna) and all my family for their encouragement and love.

Karim Rabia' Diab

1	INTRODUCTION AND LITERATURE REVIEW.....	1
1.1	Global energy crisis and climate changes	1
1.2	Renewable energy and types of renewable resources.....	2
1.3	Problems and challenges of renewable sources.....	4
1.4	Hydrogen as a future fuel.....	5
1.4.1	Advantages of hydrogen energy.....	6
1.4.2	The future of hydrogen.....	7
1.4.3	Hydrogen production.....	8
1.4.4	Hydrogen storage	9
1.4.5	Hydrogen transport and distribution	10
1.4.6	Hydrogen Safety.....	11
1.4.7	Hydrogen utilization.....	13
1.4.7.1	Hydrogen fuel cell	13
1.4.7.2	Hydrogen as fuel in internal combustion engines.....	16
1.5	Hydrogen is an ideal fuel in comparison with other fuels.....	17
1.6	The current problem of hydrogen and solution	19

1.7	Production of hydrogen from renewable resource	20
1.8	Definitions of photocatalysis and photocatalytic process	22
1.9	Fundamentals of photocatalytic water splitting	23
1.9.1	Photo-electrochemical reactions.....	25
1.9.2	Photochemical-cell reactions.....	26
1.10	TiO₂ as a photocatalyst	27
1.11	Limitations and disadvantages of photocatalyst	30
1.12	Strategies and recent advances in enhancement the photocatalytic performance	31
1.12.1	Mixed metal oxides for developed catalysts	34
1.12.1.1	Perovskites nanocomposite materials	34
1.12.2	Novel nanocomposite photocatalysts.	37
1.12.2.1	Properties of graphene	38
1.12.2.2	Graphene in photocatalysis.....	39
1.12.2.3	Mechanism of graphene in enhancement the activity of photocatalyst	41
2	MATERIALS AND METHODS	43

2.1 Chemicals and Materials	43
2.2 Experimental	43
2.2.1 Catalyst preparation	43
2.2.1.1 Preparation of NiTiO ₃ perovskite	43
2.2.1.2 Preparation of graphene oxide (GO)	45
2.2.1.3 Preparation of binary nanocomposites (NTGx)	45
2.2.2 Catalyst characterization	47
2.2.2.1 X-Ray Diffraction (XRD) analysis	47
2.2.2.2 Fourier-Transform Infrared Spectroscopy (FTIR)	47
2.2.2.3 Raman spectroscopy	47
2.2.2.4 Transmission Electron Microscopy (TEM)	47
2.2.2.5 BET surface area measurement	48
2.2.2.6 UV-Diffuse Reflectance spectrum	48
2.2.2.7 Photoluminescence(PL)	48
2.2.2.8 The photoelectric current (PEC)	48
2.2.2.9 The Electrochemical impedance Spectroscopy (EIS)	49

2.2.3. Photocatalytic activity measurement	49
3 RESULT AND DISCUSSION.....	51
3.1 First Part:.....	51
3.1.1 Characterization of the catalyst	51
3.1.1.1 Fourier transform infrared spectroscopy (FT-IR)	58
3.1.1.2 Raman spectroscopy	62
3.1.1.3 Transmission Electron Microscope (TEM).....	65
3.1.1.4 Diffuse Reflectance Spectroscopy (DRS).....	67
3.1.2 Photocatalytic activities of photocatalysts.....	71
3.2 Second Part.....	79
3.2.1 Characterization of the catalyst	80
3.2.1.1 X-ray powder diffraction (XRD)	80
3.2.1.2 Fourier transform infrared spectroscopy (FT-IR)	85
3.2.1.3 Raman spectroscopy	87
3.2.1.4 Transmission Electron Microscope (TEM).....	90
3.2.1.5 Elemental Mapping Analysis	91

3.2.1.6 The N ₂ adsorption-desorption isotherms	93
3.2.1.7 Diffuse Reflectance Spectroscopy (DRS).....	95
3.2.1.8 Photoluminescence (PL) spectra.....	98
3.2.1.9 The Photocurrent Measurement (PC)	100
3.2.1.10 Electrochemical Impedance Spectroscopy (EIS)	101
3.2.2 Photocatalytic activities of nanocomposites	103
