LOW-IF HIGH IMAGE-REJECTION MIXER

B10110

By

Mohammed Kamal Abl-Elrahman Ali

B.Sc. in Electronics and Communications Engineering – Cairo University,
Fayoum Branch

A Thesis Submitted to the
Faculty of Engineering at Cairo University
in Partial Fulfillment of the
Requirements for the Degree of
Master of Science

in
Electronics and Electrical Communications Engineering

Acknowledgements

First of all, I would like to thank **Dr. Aly Ezzat** for his great advices and effective discussions that were very helpful. I learnt a lot of things that I could not learn without his help.

I indeed appreciate **Dr. Heba shawky** for her support. She was very helpful; she helped me to understand a lot of technical points and supported me with a lot of papers I needed. Really, a lot of thanks to her. Thanks to **Eng. Hisham abdelazez** who supported me with a papers that I needed. Thanks to **Eng. Khaled Hosny** who helped me to understand some points in Matlab and recover my syntax errors. Thanks to my friends who encouraged me.

Thanks to my **mother** who helped me with her kind words and prays. Thanks are not enough for my wife **Amaal** who spent nights awake with me while studying, she was not only my great support but she made me start struggling to finalize this work. I could not have finished this thesis without her support, this work is specially for her.

Firstly and finally thanks to "**ALLAH**" who gave us the ability to think and understand.
