Personality Disorders

Among Alexandria University Students

Thesis

Submitted to The High Institute of Public Health

University of Alexandria

in partial fulfillment of the requirements for the

Degree of Master of Public Health

(Mental Health)

By

Walid Waguih El-Hosseiny

M.B.B.Ch. – Faculty of Medicine – University of Alexandria - 1995

DPH (Mental Health) - High Institute of Public Health - University of Alexandria - 1998

High Institute of Public Health

University of Alexandria

2003

SUPERVISORS

Dr. Mervat Wagdy Abu-Nazel

*Professor of Mental Health
High Institute of Public Health
University of Alexandria*

Dr. Nehad Hassan Mahdy

*Assistant Professor of Biostatistics
High Institute of Public Health
University of Alexandria*

Dr. Gehan Mohamed Mounir

*Assistant Professor of School Health
High Institute of Public Health
University of Alexandria*

ACKNOWLEDGEMENTS

I owe the most gratitude to **Professor Mervat W. Abu-Nazel**, Professor of Mental Health, High Institute of Public Health, University of Alexandria, whom I consider my mentor, for first of all encouraging me to proceed with the subject I had chosen and for patiently putting up with my anxieties and inability to be concise during the course of this thesis. I thank her for her immense support and profound expertise.

I could not thank **Dr. Nehad H. Mahdy**, Associate Professor of Biostatistics, High Institute of Public Health, University of Alexandria, enough for being so committed and extremely prompt, sacrificing her time to teaching me step by step all I know about statistics now, which I consider a great achievement. During data analysis her input enabled me to accomplish this work.

I am indebted to **Dr. Gehan M. Mounir**, Associate Professor of School Health, High Institute of Public Health, University of Alexandria, for the meticulous effort she has dedicated to the writing of this thesis. Without her encouragement and priceless advice, it would not have been the way it is today.

Finally, the students are the ones who made this study possible. Their helpfulness, willingly or otherwise, should not be in any way undermined.

List of Contents

Chapter		Page
I	Introduction	1
	Definition and models of personality	3
	The concept and definition of personality disorder	5
	Classification and features of personality disorders	9
	Assessment of personality disorders	18
	Magnitude of personality disorders	22
	Risk factors of personality disorders	25
	Impact of personality disorders	41
	Prevention of personality disorders	53
II	Aim of the work	65
III	Subjects and Methods	66
IV	Results	79
	Psychometric properties of the Arabic version of PDQ-4+	80
	Characteristics of the sampled university students	89
	Prevalence of personality disorders among the sampled students	92
	Socio-demographic risk factors	97
	Academic risk factors	112
	Personal risk factors (habits and leisure activities)	120
	Familial risk factors	123
	Medical, mental, and social network risk factors	135
	Results of the stepwise logistic regression analysis of risk factors	144
V	Discussion	147
	Psychometric properties of PDQ-4+	148
	Prevalence of personality disorders	152
	Risk factors	157
VI	Conclusions and Recommendations	182
VII	Summary	187
VIII	References	192
	Appendices	
	Protocol	
	Arabic summary	

List of Tables

Table		Page
I	Test-retest reliability and internal consistency of the Arabic version of the PDQ4+	83
IIa	Principal-components factor analysis with varimax rotation of the 12 personality disorder scales' sums of the PDQ-4+: communalities, eigen values and percent of variance	84
IIb	Factor loadings after factor analysis with varimax rotation of the sum of the 12 personality disorder subscales of the PDQ-4+ and sum of factor items for the sampled university students	85
III	Specificity and positive predictive value of the PDQ-4+ in relation to Clinical Significance scale (as a gold standard)	87
IV	Discriminant validity of the 12 personality disorder scales and the total score of the Arabic version of the PDQ-4+	88
V	Distribution of the sampled students according to their sociodemographic characteristics	90
VI	Distribution of sampled students according to the different types of personality disorders	95
VII	Distribution of personality-disordered students according to the frequency of personality disorder comorbidities encountered	96

Table		Page
VIII	Distribution of sampled university students according to personality disorder and age	99
IX	Distribution of sampled university students according to personality disorder and sex	100
X	Distribution of sampled university students by different types of personality disorder and sex	101
XI	Distribution of sampled university students according to personality disorder and educational level of parents	104
XII	Distribution of sampled university students according to personality disorder and work of the mother	105
XIII	Distribution of sampled university students according to personality disorder and family size	106
XIV	Distribution of sampled university students according to personality disorder and socio-economic level	107
XV	Distribution of sampled university students according to personality disorder and the social status of parents	109
XVI	Distribution of sampled university students according to personality disorder and living arrangement	111
XVII	Distribution of sampled university students according to personality disorder and the college they attend	113

Table		Page
XVIII	Distribution of sampled university students according to personality disorder and the reason for choice of college	114
XIX	Distribution of sampled university students according to personality disorder and difficulties experienced in college	118
XX	Distribution of sampled university students according to personality disorder and academic achievement	119
XXI	Distribution of sampled university students according to personality disorder and leisure activities	121
XXII	Distribution of sampled university students according to personality disorder and smoking and psychoactive substance abuse	122
XXIII	Distribution of sampled university students according to personality disorder and parental history of chronic medical illness or psychiatric problem	125
XXIV	Distribution of sampled university students according to personality disorder and parental impulsivity	126
XXV	Distribution of sampled university students according to personality disorder and their parents' unacceptable behaviour	127
XXVI	Mean, standard deviation, and median values of EMBU scores of sampled university students according to personality disorder.	130

Table	Page
XXVII Distribution of sampled university students according to personality disorder and parental disciplinary styles	131
XXVIII Distribution of sampled university students according to personality disorder and perceived intrafamilial conflicts.	133
XXIX Distribution of sampled university students according to personality disorder and chronic medical conditions	137
XXX Distribution of sampled university students according to personality disorder and history of psychiatric problems	138
XXXI Distribution of sampled university students according to personality disorder and history of childhood behavioural problems	139
XXXII Distribution of sampled university students according to personality disorder and history of abuse	142
XXXIII Mean and standard deviation, and median values of PSR scores of sampled university students according to personality disorder	143
XXXIV Results of stepwise logistic regression analysis of significant variables related to personality disorder among university students (general model)	145
XXXV Results of stepwise logistic regression analysis of significant familial and, psychological and medical variables related to personality disorder among university students	146

List of Figures

Figure		Page
1	Percent distribution of the sampled students according to their total scores on the PDQ-4+	94
2	Distribution of sampled university students according to personality disorder and social status of parents	110
3	Distribution of sampled university students according to personality disorder and the reason for choice of college	115
4	Distribution of sampled university students according to personality disorder and consistency of parental discipline	132
5	Distribution of sampled university students according to personality disorder and perceived intrafamilial conflicts	134
6	Distribution of sampled university students according to personality disorder and history of conduct disorder	140

List of Acronyms and Abbreviations

ADHD	Attention deficit hyperactivity disorder
AIDS	Acquired immunodeficiency syndrome
BZ	Benzodiazepines
CAT	Cognitive analytic therapy
CBT	Cognitive behavioural therapy
CD	Conduct disorder
CI	Confidence interval
CVS	Cardiovascular
DSM	Diagnostic and statistical manual
DBT	Dialectical behaviour therapy
ECA	Epidemiological catchment area
EEG	Electroencephalogram
EMBU	Egna Minnen Beträffande Uppfostrén "My Memories of Upbringing" questionnaire
GAD	Generalised anxiety disorder
GAF	Global assessment of functioning
HIV	Human immunodeficiency virus
ICD	International classification of diseases
IQ	Intelligence quotient
K	Kappa
LL	Lower limit
MAOI	Monoamine oxidase inhibitor
No./n	Number
ODD	Oppositional defiant disorder
