Acknowledgement

First of all my great thanks to **ALLAH**, the most merciful, the most gracious, who helps me in all my life events, and provides me the well to accomplish this work.

I want to thank **Professor Dr. Hamdy Mohammed Abo Beeh**, the head of ^{The} Department of Surgery, Faculty of Medicine, El-Minia University, for his help, sincere encouragement and valuable advices.

It's a great pleasure to express my sincere gratitude to **Professor Dr. Mostafa Nagi El-Sanadiki**, professor of general and vascular surgery, Faculty of Medicine, El-Minia University, for his kindness, valuable advices and keen supervision. He enriched me with his vast experience and saved me from many difficulties.

I wish to express my sincere thanks and deepest gratitude to **Dr. Khalid Mohammed Mahran**, lecturer in general surgery, Faculty of Medicine. El-Minia University, for his constant support and valuable guides. It is a great honor for me to work under his supervision.

No word can express my deepest appreciation to **Dr. Moatasem Mohammed Ali**, Lecturer in General surgery, Faculty of Medicine, El-Minia University, for continuous indispensable advices, constant encouragement and kind sincerer help and for being like a grand brother during the steps of the current study.

Lastly I wish to express thanks to all my colleagues in the department of Surgery, Faculty of Medicine, El-Minia University, for their great help and sincere encouragement

LIST OF TABLES

Title	Page
Table (1): Demographic data of age and sex in group I.....	50
Table (2): Variation of age in group I.....	51
Table (3): Types of AVF in all patients.....	51
Table (4): Incidence of different complications.....	53
Table (5): Different types of the treatment of AVF complications.....	53
Table (6): Condition of veins as an accurate predictor of AVF complications..	55
Table (7): Fever as an accurate predictor of AVF complications.....	56
Table (8): History of diabetes mellitus in all patients.....	58
Table (9): Hypotension as an accurate predictor of AVF complications.....	59
Table (10): Demographic data of age and sex in group II.....	60
Table (11): Variation of age in group I.....	60
Table (12): Types of AVF in group II.....	61
Table (13): Duration of dialysis in all patients.....	63
Table (14): Follow up of group II.....	64
Table (15): Methods of treatment of complicated AVF in group II.....	64

LIST OF FIGURES

Title	Page
Figure (1): Aneurysmal malformation of AVF.....	28a
Figure (2): Impending rupture of AVF.....	28a
Figure (3): Incidence of sex in group I	50
Figure (4): Different types of AVF in patients with complications.....	52
Figure (5): Different methods of the treatment of AVF complications.....	54
Figure (6): Condition of veins with complications.....	55
Figure (7): ROC curve of sensitivity and specificity to fair or bad condition of veins with AVF complications.....	56
Figure (8): ROC curve of sensitivity and specificity of fever with AVF complications.....	57
Figure (9): Association of the complicated AVF with other diseases.....	57
Figure (10): ROC curve of sensitivity and specificity to diabetes mellitus with AVF complications.....	58
Figure (11): ROC curve of sensitivity and specificity of hypotension with AVF complications.....	59
Figure (12): Different types of AVF in control group.....	61
Figure (13): Condition of veins without complications.....	62
Figure (14): Association of non complicated AVF with other diseases.....	62
