Robust Adaptive Signal Processing With Robotics

by

**Engineer: Waleed Mohammed Nabeel Mohammed
Sadek**

A Thesis submitted to the
Faculty of Engineering at Cairo University
in Partial Fulfillment of the
Requirements for the degree of
MASTER OF SCIENCE
in
ELECTRONICS & COMMUNICATIONS ENGINEERING

Under the Supervision of

Prof. Dr. Amin Mohammed Nassar
Professor of Electronics and
Communications department
Faculty of Engineering
Cairo university

Dr. Gamal Ahmed El-Sheikh
~~Doctor~~ of Electronics and
Communications department
Faculty of Engineering
MSA university

**FACULTY OF ENGINEERING, CAIRO UNIVERSITY
GIZA, EGYPT
2006**

Robust Adaptive Signal Processing With Robotics

by

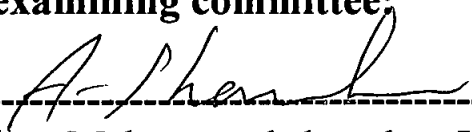

**Engineer: Waleed Mohammed Nabeel Mohammed
Sadek**

A Thesis submitted to the
Faculty of Engineering at Cairo University
in Partial Fulfillment of the
Requirements for the degree of
MASTER OF SCIENCE

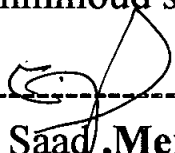

in

ELECTRONICS & COMMUNICATIONS ENGINEERING

Approved by the examining committee:

Prof.Dr. Abdelhallem Mahmmoud shousha , Member

Prof.Dr. Elsayed Mostafa Saad ,Member

Prof.Dr. Amin Mohammed Nassar , Advisor

**FACULTY OF ENGINEERING, CAIRO UNIVERSITY
GIZA, EGYPT
2006**

Contents

1 Introduction	1
1.1 Introduction	1
1.2 Literature review.....	1
1.3 Statement of the Problem.....	3
1.4 Purpose of the Present Work.....	4
1.5 Thesis Overview.....	5
1.6 Thesis Organization.....	6
2 Robotic and Sensory.....	7
2.1 Introduction.....	7
2.2 Sensory Independent Robot.....	7
2.2.1 Industrial Robot.....	7
2.2.2 Manipulator.....	7
2.3 Sensory Dependent Robots.....	9
2.3.1 Intelligent Robot.....	9
2.3.2 Sensory-Controlled Robot.....	9
2.3.3 Mobile Robot.....	9
2.4 Sensor.....	10
2.5 Robotic Sensors.....	10
2.6 Sensor Classification.....	11
2.6.1 Passive Sensors.....	11
2.6.2 Active Sensors.....	12
2.7 Sensor Prosperities.....	12
2.7.1 Resolution.....	12
2.7.2 Resposivity.....	13
2.7.3 Detectivity.....	13
2.8 Sensor with Robotics.....	13
2.8.1 Internal State Sensors.....	13
2.8.2 External Navigation Sensors.....	14
2.9 Sensing Noise.....	14
2.10 Robotic Sensor Products.....	15
2.10.1 Sharp GP2D02 and GP2D12 Infrared Range Sensor.....	15
2.10.2 Sharp GP2D05 and GP2D15 Infrared Proximity Sensors...	16
2.10.3 Thermal Sensors.....	16
2.10.4 Humidity Sensor.....	16
2.10.5 Vision Sensor.....	17
2.10.6 Photoelectric sensor.....	18
2.10.7 Laser Sensor.....	19
2.10.8 Pressure Sensor.....	19
2.11 Ultrasonic Sensor.....	20
2.11.1 Ultrasonic sensor typical applications.....	20
2.11.2 Ultrasonic Distance Sensor products.....	23
2.11.3 Ultrasonic sensor advantages and limitations.....	25
2.12 Looking Ahead.....	25
3 Adaptive Filters.....	27
3.1 Introduction.....	27

3.2 Adaptive Filter Applications.....	27
3.3 Adaptive Filtering Problem.....	30
3.4 Filter Types for Adaptive Noise Cancellation.....	31
3.4.1 FIR Filters.....	31
3.4.2 IIR Filters.....	32
3.5 Updating Algorithms for the Filters.....	33
3.6 What is an Adaptive Algorithm?.....	33
3.7 Important factors for algorithms.....	34
3.8 Adaptive Filter Algorithms.....	36
3.8.1 Wiener Filters.....	36
3.8.2 Method of Steepest Descent.....	38
3.8.3 Least-Mean-Squares Algorithm.....	38
3.8.4 Recursive least squares Algorithm.....	39
3.9 The Algorithms of the Present Work	40
4 Adaptive Filter Design.....	41
4.1 Thesis Adaptive Filter Algorithms (LMS & RLS).....	41
4.2 Fixed Step-Size LMS Algorithm.....	42
4.3 Variable Step-Size LMS Algorithm.....	43
4.3.1 Variable Step-Size LMS Algorithm Method.....	43
4.3.2 Variable Step-Size LMS Algorithm Flowchart.....	45
4.4 RLS Algorithm.....	46
4.5 Results and Discussion.....	47
4.5.1 Algorithms Results.....	47
4.5.2 The Effect of the Filter Order	50
4.5.3 The Effect of the Input Noise Signal.....	56
4.5.4 Rate of convergence, Robustness and Stability.....	60
4.5.5 Variable step-size Parameter of LMS Algorithm.....	63
4.6 Comparison of the Adaptive Algorithms	64
4.7 Adaptive Algorithms for the Proposed Application.....	65
5 Adaptive Filter Application.....	68
5.1 Introduction.....	68
5.2 Ultrasonic Noise and Crosstalk.....	68
5.3 Application Overview.....	69
5.4 Application Results and Discussion.....	69
5.4.1 Application with Random Gaussian Noise (RGN).....	70
5.4.2 Input Signal conditions Effect.....	72
5.5 Comparison of the Proposed Application Algorithms	79
5.6 The Proposed System Block Diagram.....	80
6 Conclusion.....	81
6.1 Conclusion.....	81
6.2 Future Work.....	82

List of Tables

4.1: Filter tape weights change effect on the average error value.....	54
4.2: Input signal conditions change effect on the average error value.....	60
4.3: Adaptive algorithm performance factors.....	61
4.4: The rate of convergence of the adaptive algorithms.....	62
4.5: The missadjustment of the adaptive algorithms.....	62
4.6: Step-size parameter change versus tape weights change of LMS.....	63
4.7: Step-size parameter change versus SNR change of LMS.....	64
4.8: LMS and RLS comparison.....	64
4.9: Fixed step-size LMS and variable step-size LMS comparison.....	65
5.1: The rate of convergence of the application $N=200$, RGN SNR=5.865 dB.....	71
5.2: adaptive algorithms comparison of the application $N=200$, RGN SNR=5.865 dB...	72
5.3: The rate of convergence of the application $N=200$, WGN SNR=5 dB.....	74
5.4: adaptive algorithms comparison when application $N=200$, WGN SNR=5 dB.....	74
5.5: The rate of convergence of the application $N=200$, WGN SNR=1 dB.....	76
5.6: adaptive algorithms comparison when application $N=200$, WGN SNR=1dB.....	76
5.7: The rate of convergence of the application $N=200$, WGN SNR=0.5 dB.....	78
5.8: Adaptive algorithms comparison when application $N=200$, WGN SNR=0.5 dB..	78
5.9: Fixed step-size LMS algorithm with WGN at very low SNR values.....	79
5.10: Variable step-size LMS algorithm with WGN at very low SNR values.....	79
5.11: Application comparison.....	79

List of Figures

1.1: Robotic system.....	3
1.2: The purpose of the present study.....	4
2.1: Manipulator or automatic arm.....	7
2.2: Manually manipulator.....	7
2.3: Sharp PG2D02 Infrared.....	15
2.4: Temperature sensor.....	16
2.5: Humidity sensor.....	16
2.6: Vision sensors.....	17
2.7: Photoelectric sensor.....	18
2.8: Laser sensor.....	19
2.9: Pressure sensors.....	19
2.10: Ultrasonic sensor operation.....	20
2.11: Mobile robot with ultrasonic sensor.....	22
2.12: Devantech SRF04 Ultrasonic Range Finder.....	23
2.13: Assembled ultrasonic sensor.....	24
2.14: Open ultrasonic sensor.....	24
2.15: Ultrasonic sensors.....	25
3.1: An adaptive filter applied to the problem of system identification.....	28
3.2: Illustration of an automatic adaptive algorithm.....	30
3.3: FIR filter realization by direct-form.....	31
3.4: IIR filter for $M=N$	32
3.5: The factors of the adaptive algorithm performance.....	34
3.1: An adaptive filter applied to the problem of system identification.....	28
4.1: Adaptive filter structure block diagram.....	41
4.2: Fixed step-size LMS flowchart.....	43
4.3: variable step-size LMS flowchart.....	45
4.4: RLS algorithm flowchart.....	46
4.5: Fixed step-size LMS desired filter input and output signals.....	48
4.6: Variable step-size LMS desired filter input and output signals.....	48
4.7: RLS algorithm desired filter input and filter output signals.....	49
4.8: Error signal of Fixed step-size LMS at tape weights20.....	49
4.9: Error signal of Variable step-size LMS at tape weights20.....	49
4.10: Error signal of RLS algorithm at tape weights20.....	50
4.11: Error signal of Fixed step-size LMS at tape weights10.....	50
4.12: Error signal of Variable step-size LMS at tape weights10.....	51
4.13: Error signal of RLS algorithm at tape weights10.....	51
4.14: Error signal of Fixed step-size LMS at tape weights40.....	51
4.15: Error signal of Variable step-size LMS at tape weights40.....	52
4.16: Error signal of RLS algorithm at tape weights40.....	52
4.17: Error signal of Fixed step-size LMS at tape weights70.....	52
4.18: Error signal of Variable step-size LMS at tape weights70.....	53
4.19: Error signal of RLS algorithm at tape weights70.....	53
4.20: Error signal of Fixed step-size LMS at tape weights100.....	53

4.21: Error signal of Variable step-size LMS at tape weights100.....	53
4.22: Error signal of RLS algorithm at tape weights100.....	54
4.23: Error signal of Fixed step-size LMS with White Gaussian Noise SNR=10.....	56
4.24: Error signal of Variable step-size LMS with White Gaussian Noise SNR=10 dB...	56
4.25: Error signal of RLS with White Gaussian SNR=10 dB.....	56
4.26: Error signal of Fixed step-size LMS with White Gaussian SNR=5 dB.....	57
4.27: Error signal of Variable step-size LMS with White Gaussian SNR=5 dB.....	57
4.28: Error signal of RLS with White Gaussian Noise SNR=5 dB.....	57
4.29: Error signal of Fixed step-size LMS with White Gaussian Noise SNR=2 dB.....	58
4.30: Error signal of Variable step-size LMS with White Gaussian Noise SNR=2 dB.....	58
4.31: Error signal of RLS with White Gaussian Noise SNR=2 dB.....	58
4.32: Error signal of Fixed step-size LMS with White Gaussian Noise SNR=1 dB.....	59
4.33: Error signal of Variable step-size LMS with White Gaussian Noise SNR=1 dB.....	59
4.34: Error signal of RLS with White Gaussian Noise input noisy signal SNR=1 dB.....	59
4.35: MSE of Fixed step-size LMS algorithm.....	61
4.36: MSE of Variable step-size LMS algorithm.....	61
4.37: MSE of RLS algorithm.....	62
4.38: Comparison of noise attenuation in dB.....	66
5.1: Error signal of Fixed step.....	70
5.2: MSE of Fixed step.....	70
5.3: Error of Variable step.....	71
5.4: MSE of Variable step.....	71
5.5: Error signal of Fixed step.....	72
5.6: MSE of Fixed step.....	73
5.7: Error signal of Variable step.....	73
5.8: MSE of Variable step.....	73
5.9: Error signal of Fixed step.....	74
5.10: MSE of Fixed step.....	75
5.11: Error signal of Variable step.....	75
5.12: MSE of Variable step.....	75
5.13: Error signal of Fixed step.....	76
5.14: MSE of Fixed step.....	77
5.15: Error of Variable step.....	77
5.16: MSE of Variable step-size LMS at tape weights200, WGN SNR=0.5 dB.....	77
5.17: The proposed system block diagram.....	80
