**EXPRESSION OF "CD54 AND CD62L"
BY LYMPHOID CELLS IN ACUTE
LYMPHOBLASTIC LEUKEMIA
IN CHILDREN**

Thesis submitted to
Faculty of Medicine, University of Alexandria
in partial fulfillment of requirements of the
Master Degree of Pediatrics

By

Eman Abdel Hamid Moustafa Farag
MBBCh, Alex.

Visiting Resident of Pediatrics,
Alexandria University Children's Hospital

Department of Pediatrics
Faculty of Medicine
University of Alexandria

SUPERVISORS

Dr. Fayez M. Hafez Labib

Professor of Pediatrics

*Faculty of Medicine,
University of Alexandria*

Dr. Zenab M. Morad

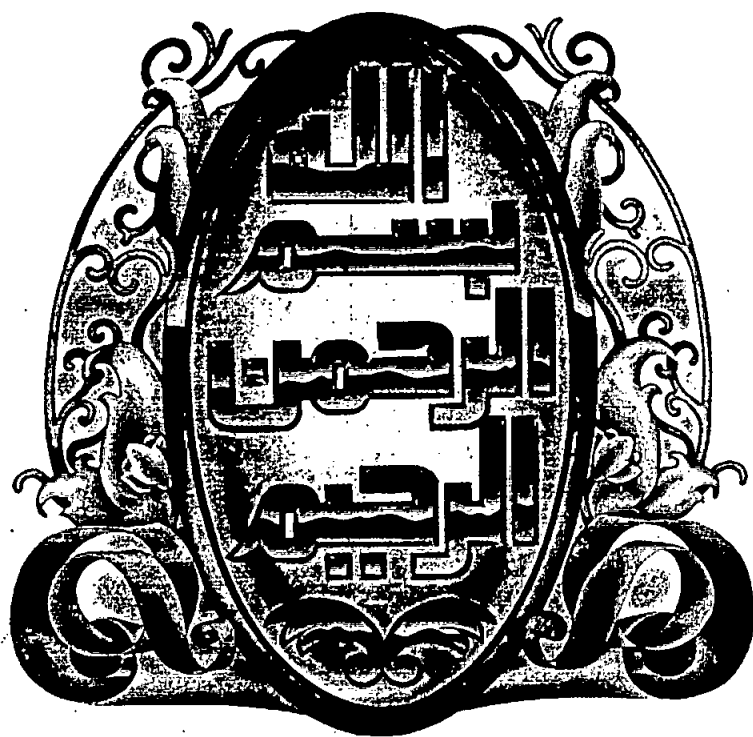

Assistant Professor of Clinical Pathology

*Faculty of Medicine,
University of Alexandria*

Dr. Hoda M. A. Hassab

Assistant Professor of Pediatrics

*Faculty of Medicine,
University of Alexandria*

ACKNOWLEDGEMENT

I wish to acknowledge, with sincere appreciation, my gratitude to Dr. Fayez M. Hafez, Professor of pediatrics. Faculty of Medicine. University of Alexandria. He kindly supervised this work. Without his sincere guidance and meticulous supervision, this work would have not been accomplished.

My deep thanks are also extended to Dr. Hoda M Hassab, Assistant professor of Pediatrics, Faculty of Medicine University of Alexandria, who kindly and patiently helped me.

I am greatly indebted to Dr. Zeinab M. Mourad, Assistant professor of Clinical Pathology, Faculty of Medicine University of Alexandria. Her criticism of the practical work revealed many valuable points.

My thanks go to Professor Mohamed I Kamel, professor in the Community Medicine Department, for his help in the statistical analysis of the results.

Finally, I would like to acknowledge all the leukemic children who volunteered to share in this research. I hope that this work will improve their future.

Table of Contents

Chapter	Title	Page
I	Introduction.....	1
II	Aim of the work.....	28
III	Subjects and methods.....	29
IV	Results.....	35
V	Discussion.....	58
VI	Conclusion.....	71
VII	Recommendations.....	72
VIII	Summary.....	73
IX	References.....	78
	Appendix.....	
	Arabic Summary.....	

List of Tables

Table	Title	Page
I	Structure and functions of selectin adhesion receptors	7
II	Immunoglobulin supergene adhesion receptors	12
III	Adhesion molecules of integrin family	16
IV	Immunologic subclasses of acute lymphoblastic leukemia (ALL)	26
V	Age, sex, and residence of acute lymphoblastic leukemic children and their controls	36
VI	Biochemical laboratory investigations of acute lymphoblastic leukemic children and their controls	40
VII	Blood picture of acute lymphoblastic leukemic children (before and after remission) and their controls	41
VIII	Bone marrow blast cells of acute lymphoblastic leukemic children before and after remission	43
IX	Expression of CD54 and CD62L on mononuclear cells of acute lymphoblastic leukemic children (before and after remission) and their controls	45
X	Serum level of sL-selectin of acute lymphoblastic leukemic children (before and after remission) and their controls	49
XI	Cellular expression and sL-selectin levels by sex, and clinical findings of acute lymphoblastic leukemic children	51
XII	Correlation among cellular expression and sL-selectin and the studied parameters of acute lymphoblastic leukemic children before remission	52
XIII	Cellular expression of CD54 and CD62L and the serum level of sL-selectin by T-ALL, B-ALL and C-ALL	54
XIV	Factors affecting outcome of acute lymphoblastic leukemic children	55
XV	Significant risk predictors of mortality of acute lymphoblastic leukemic children	57
