***EFFECT OF SULFUR APPLICATION ON THE MAIN
MORPHOLOGICAL, PHYSICAL, CHEMICAL, AND
MICROMORPHOLOGICAL PROPERTIES OF SOILS,
AND ON PRODUCTION OF SOME FIELD CROPS***

A Thesis

Presented to the Graduate School

Faculty of Agriculture, Alexandria University, El-Shatby

In Partial Fulfillment of the Requirements for the Degree of

MASTER OF SCIENCE

In

SOIL AND WATER SCIENCES

By

ABD EL-HADY KHAMIS ABD EL-HALIM

May 2001

B

15/4/01

***EFFECT OF SULFUR APPLICATION ON THE MAIN
MORPHOLOGICAL, PHYSICAL, CHEMICAL, AND
MICROMORPHOLOGICAL PROPERTIES OF SOILS,
AND ON PRODUCTION OF SOME FIELD CROPS***

Presented by

ABD EL-HADY KHAMIS ABD EL-HALIM

For the Degree of
MASTER OF SCIENCE
In
SOIL AND WATER SCIENCES

Examiners' Committee:

Prof. Dr. Refaat Ahmed H. Khalil

Professor of Soil Sciences,
Head of Soil Department,
Faculty of Agriculture,
El-Menofiya University.

Approved

R.A. Khalil

Prof. Dr. Nabil El-Husseiny Abdel-Hamid

Professor of Soil Sciences,
Soil & Water Sciences Department,
Faculty of Agriculture,
Alexandria University, El-Shatby.

Nabil

Prof. Dr. Moustafa Darwish Emara

Professor of Soil Sciences,
Soil & Water Sciences Department,
Faculty of Agriculture,
Alexandria University, El-Shatby.

M.D. Emara

Date: / /2001

Advisors' Committee:

Prof. Dr. Nabil El-Husseiny Abdel-Hamid (Senior Advisor).

Professor of Soil Sciences,
Soil & Water Sciences Department,
Faculty of Agriculture,
Alexandria University, El-Shatby.

Dr. Mohamed Esmat El-Fayoumy

Associate Professor of Soil Sciences,
Soil, Water and Environment Research Institute,
Agriculture Research Center,
Ministry of Agriculture.

Dr. Ashraf Mohamed Moustafa

Associate Professor of Soil Sciences,
Soil & Water Sciences Department,
Faculty of Agriculture,
Alexandria University, El-Shatby.

ACKNOWLEDGEMENT

The author wishes to express his thanks to **Prof. Dr. Mohamed H. El-Halfawy**, Head of Soil and Water Sciences Department, for his encouragement during the course of this study.

It is my pleasant duty to express my gratitude to **Prof. Dr. Nabil El-Husseiny**, Professor of Soil and Water Sciences for suggesting the problem, supervision the work, continuous support, guidance and for revision of the manuscript as well.

Special thanks and deep gratitude to **Dr. Mohamed E. El-Fayoumy**, Soil, Water & Environment Research Institute, Agric. Research Center, for his great help and assistance in the work, especially in the field study.

Thanks are also due to **Dr. Ashraf M. Moustafa**, Associate Prof. of Soil and Water Sciences for his attention, support and help, especially in the micromorphological study.

Thanks are also due to **Prof. Dr. Fawzy H. Abdel-Kader**, **Prof. Dr. Abdel-Hakim Gomaa** and **Dr. Mohamed Bahanssy** for their assistance, and to the staff members of Nubaria Agric. Res. Station, especially, **Prof. Dr. M. Attia**, **Dr. M. Azab**, **Dr. M. Atef**, **Dr. H. Khalefa**, **Dr. H. Ramadan**, **Dr. A. Aawad**, **Mr. H. Abdel-Latef**, **Mr. M. Said** and **Mr. A. Ismail**.

Finally, the writer wishes to express his deepest gratitude to his family, especially his **mother**, his **brothers**, his **fiancée**, and all his friends for their help, and patience.

ACKNOWLEDGEMENT.....	
LIST OF FIGURES.....	ii
LIST OF PHOTOGRAPHS AND PHOTOMICROGRAPHS.....	iii
LIST OF TABLES.....	iv
I- INTRODUCTION.....	1
II- REVIEW OF LITERATURE.....	3
1- Natural Existence and Main Properties of Sulfur.....	3
2- Occurrence and Role of Sulfur in Soils.....	4
2.1- Forms of Sulfur in Soils.....	4
2.1.1- Forms of inorganic sulfur in soils.....	4
2.1.2- Forms of organic sulfur in soils.....	5
2.2- Sulfur as a Soil Amendment and its Forms.....	6
2.3- Sulfur Granule-Size and its Rate of Application.....	8
2.4- Transformations and Behavior of Sulfur in Soils.....	9
2.4.1- Mineralization of organic sulfur in soils.....	10
2.4.2- Oxidation of inorganic sulfur in soils.....	12
2.4.3- Reduction of inorganic sulfur in soils.....	15
3- Effect of Sulfur Application on Some Main Soil Properties..	16
3.1- Effect of Sulfur Application on Some Physical Properties of Soils.....	16
3.2- Effect of Sulfur Application on Some Chemical Properties of Soils.....	17
3.2.1- Effect on soil reaction (pH).....	17
3.2.2- Effect on the electrical conductivity of soils (EC.)....	19
3.2.3- Effect on sulfates and gypsum content in soils.....	20
3.3- Effect of Sulfur Application on Soil Micromorphology.....	20
4- Effect of Sulfur Application on Plant Growth and Nutrients Uptake.....	22
4.1- Effect of Sulfur Application on Plant Growth of Some Different Crops.....	22
4.2- Effect of Sulfur Application on Plant Growth of Wheat	24
4.3- Effect of Sulfur Application on Plant Growth of Corn	25
4.4- Effect of Sulfur Application on Plant Growth of Faba bean	26
4.5- Effect of Sulfur Application on Nutrients Uptake.....	27

III- MATERIALS AND METHODS.....	28
[I]- Field Work.....	28
1- The Field Experiment.....	28
1.1- Characteristics of the Experimental Site.....	28
1.2- The Experiment Design.....	30
1.3- Cultivated crops.....	31
1.4- Applied Fertilizers.....	32
1.5- Measured Crop Characters.....	32
2- Morphological and Hydrophysical Studies of Soils.....	33
2.1- Morphological Studies and Soil Sampling.....	33
2.2- Soil Cumulative Infiltration (Z, m)	33
2.3- Soil Bulk Density (Db, g/cm ³).....	34
2.4- Soil Hydraulic Conductivity (K _h , cm/hr).....	34
2.5- Plant Characters.....	34
[II]- Laboratory Work.....	35
1- The Laboratory Experiment.....	35
1.1- The Used Soil Samples.....	35
1.2- The Plastic Columns.....	36
1.3- Preparation of the Soil-Sulfur Mixtures.....	36
1.4- Packing of the Prepared Soil-Sulfur Mixtures.....	36
1.5- Wetting and Drying Cycles.....	37
2- Laboratory Studies and Analyses.....	38
2.1- Morphological Observations and Measurements for the Different sulfur Treatments.....	39
2.1.1- Morphological observations.....	39
2.1.2- Coefficient of linear extensibility (COLE).....	39
2.1.3- Percentage of vertical expansion and shrinkage (PVES).....	39
2.2- Physical Analysis.....	40
2.2.1- Particle size distribution.....	40
2.2.2- Soil bulk density (Db, g/cm ³).....	40
2.2.3- Total soil porosity (E, %).....	40
2.2.4- Soil hydraulic conductivity (k _h , cm/hr).....	40
2.3- Chemical Analysis of Soils and Plants.....	41
2.3.1- Electrical conductivity (EC, dS/m).....	41
2.3.2- Soil reaction (pH).....	41
2.3.3- Soluble cations and anions (meq/L)	41
2.3.4- Total carbonates (CaCO ₃ , %).....	42
2.3.5- Gypsum content (CaSO ₄ .2H ₂ O, %).....	42
2.3.6- The (SAR) and (ESP) values.....	42

	Page
2.3.7- Protein content in crop grains (%).....	43
2.4- Micromorphological Studies	43
2.4.1- Preparation of soil thin sections.....	43
2.4.2- Microscopic description of soil thin sections.....	44
2.4.3- Photomicrography.....	44
IV- RESULTS AND DISCUSSION.....	45
1- Main Characteristics of the Used Soils.....	45
1.1- Soil of the Field Experiment.....	45
1.1.1- Morphological description of the initial soil.....	45
1.1.2- Main physical and chemical characteristics of soil of the field experiment.....	46
1.2- Soils of the Laboratory Experiment.....	48
1.2.1- The calcareous soil sample.....	48
1.2.2- The clay soil sample.....	48
2- Morphological Description of Some Soil Profiles After the Field Experiment.....	49
2.1- Morphological Description of Soil Profile No. (1).....	49
2.2- Morphological Description of Soil Profile No. (2).....	50
2.3- Morphological Description of Soil Profile No. (3).....	51
3- Effect of Sulfur Application on the Morphological Appearance and Some Morphological Measurements for Soils of the Laboratory Experiment.....	52
3.1- Effect on the Formed Morphological Features and Morphological Appearance of Soil Surface.....	52
3.2- Effect on Coefficient of Linear Extensibility (COLE).....	57
3.3- Effect on the Percentage of Vertical Expansion and Shrinkage of Soils (PVES).....	58
4- Effect of Sulfur Application on Some Physical Properties of Soils.....	60
4.1- The Field Experiment.....	60
4.1.1- Effect on the field bulk density (Db , g/cm^3) and total porosity (E , %) of soil.....	60
4.1.2- Effect on the field hydraulic conductivity of soil (K_h , cm/hr).....	62
4.1.3- Effect on the field cumulative infiltration rate of soil (Z , m/min).....	63
4.2- The Laboratory Study and Analyses.....	65
4.2.1- Effect on the laboratory bulk density (Db , g/cm^3) and total porosity (E , %) of soils.....	65

	<u>Page</u>
4.2.2- Effect on the laboratory hydraulic conductivity of soils (K_h , cm/hr).....	68
5- Effect of Sulfur Application on Some Chemical Proper- ties of Soils.....	68
5.1- The Field Experiment.....	68
5.1.1- Effect on electrical conductivity (EC, dS/m) of calcareous soil of the field experiment.....	68
5.1.2- Effect on soil reaction (pH) of calcareous soil of the field experiment	69
5.1.3- Effect on concentration of soluble sulfates (SO_4^{--} ,meq/L) in calcareous soil of the field experiment.....	72
5.1.4- Effect on gypsum content (%) in calcareous soil of the field experiment	73
5.2- The Laboratory Study.....	75
5.2.1- Effect on electrical conductivity (EC, dS/m) of soils of the laboratory experiment.....	75
5.2.2- Effect on soil reaction (pH) of soils of the laboratory experiment.....	78
5.2.3- Effect on concentration of soluble sulfates (SO_4^{--} ,meq/L) in soils of the laboratory experiment.....	78
5.2.4- Effect on gypsum content (%) in soils of the laboratory experiment.....	80
6- Effect of Sulfur Application on the Micromorphological Characteristics of Soils.....	81
6.1- Micromorphological Description of Sulfur Treated Calcareous Soil of the Field Experiment.....	81
6.2- Micromorphological Description of Sulfur Treated Calcareous Soil of the Laboratory Experiment	95
6.3- Micromorphological Description of Sulfur Treated Clay Soil of the Laboratory Experiment.....	109
7- Effect of Sulfur Application on Crop Yield and Crop Components.....	123
7.1- Effect of Sulfur Application on Wheat Yield and its Components.....	123
7.2- Effect of Sulfur Application on Maize Yield and its Components.....	127
7.3- Effect of Sulfur Application on Faba bean Yield and its Components.....	129
V- SUMMARY AND CONCLUIONS.....	132
VI - REFERENCES.....	142
- ARABIC SUMMARY.	

LIST OF FIGUERS

Fig(1): Natural transformations of sulfur in soils (after Paul and Clark, 1989).....	12
Fig(2):Location map for sites of the carried out field experiment, and of the collected soil samples.....	29
Fig(3):Schematic diagram illustrating the saturation process of the soil-sulfur mixtures in the plastic columns by capillarity .	37
Fig(4):Effect of sulfur application on coefficient of linear extensibility (COLE) for clay and calcareous soils.....	59
Fig(5):Effect of sulfur application on vertical expansion for clay and calcareous soils.....	59
Fig(6):Effect of sulfur application on vertical shrinkage for clay and calcareous soils.....	59
Fig(7):Effect of sulfur application on the field bulk density (D_b , g/cm^3) of calcareous soil of the field experiment.....	61
Fig(8):Effect of sulfur application on the field total porosity (E , %) of calcareous soil of the field experiment.....	61
Fig(9):Effect of sulfur application on the field hydraulic conductivity (K_h , cm/hr) of calcareous soil of the field experiment	61
Fig(10):Relation between elapsed time (min) and cumulative Infiltration (m) after 300 minutes for the different sulfur treatments of the field experiment.....	64
Fig(11):Effect of sulfur application on the cumulative infiltration (Z , m) for the different treatments of the field experiment	64
Fig(12):Effect of sulfur application on the laboratory bulk density (D_b , g/cm^3) of clay and calcareous soils.....	67
Fig(13):Effect of sulfur application on the laboratory total porosity (E , %) of clay and calcareous soils.....	67
Fig(14):Effect of sulfur application on the laboratory hydraulic conductivity (K_h , cm/hr) of clay and calcareous soils.....	67
Fig(15):Effect of sulfur application on electrical conductivity (EC , dS/m) of calcareous soil of the field experiment	71
Fig(16):Effect of sulfur application on pH of calcareous soil of the field experiment.....	71
Fig(17):Effect of sulfur application on concentration of soluble sulfates (SO_4^- , meq/L) in calcareous soil of the field experiment.....	74
Fig(18):Effect of sulfur application on gypsum content (%) in calcareous soil of the field experiment.....	74
Fig(19):Effect of sulfur application on electrical conductivity (EC , dS/m) of clay and calcareous soils of the laboratory experiment.....	77

Fig(20):Effect of sulfur application on pH of clay and calcareous soils of the laboratory experiment.....	77
Fig(21):Effect of sulfur application on concentration of soluble sulfates (SO_4^{2-} , meq/L) in clay and calcareous soils of the laboratory experiment.....	79
Fig(22):Effect of sulfur application on gypsum content (%) in clay and calcareous soils of the laboratory experiment.....	79
Fig(23):Effect of sulfur application on grain yield (ton/fed) of wheat crop.....	125
Fig(24):Effect of sulfur application on weight of 100 kernels (gm) of wheat crop.....	125
Fig(25):Effect of sulfur application on the average plant height (cm) of wheat crop.....	125
Fig(26):Effect of sulfur application on protein content (%) in grains of wheat crop.....	125
Fig(27):Effect of sulfur application on grain yield (ton/fed) of maize crop.....	128
Fig(28):Effect of sulfur application on weight of 100 kernels (gm) of maize crop.....	128
Fig(29):Effect of sulfur application on the average plant height (cm) of maize crop.....	128
