ACKNOWLEDGMENTS

My gratitude first of all is due to ALLAH for giving me inspiration and ability to introduce this work.

It is my great pleasure to write my acknowledgments to those who have assisted me during the preparation and development of this work. In the first place, I have always thank them for their cooperation which put me in such standard, I may say a modest standard of efficiency in my studying, hear I would like to pause to write a few words of grateful tribute to all of them.

I would like to acknowledge my sincerest gratitude and thankfulness to Prof. Tarek Saadawi, for his encouragement and remarkable advice during my staying in CCNY for four years. Also, I want to Thank Prof. Mohamed Abdel-Megied and Dr. Mostafa-Sami M. Mostafa for their continuous encouragement during preparation and finishing of this thesis.

Also, I would like to thank Dr. Hamed Nassar for his helping during preparation of this thesis.

My thanks are expanded to Prof. F. T. Abdel-Haleem, dean of faculty of Science, Minia University, Prof. A. Mourad, of faculty of Science, Minia University Vice Dean and Prof. A. M. Abdel-Hafez Head of Mathematics Department. And all staff and colleagues in mathematics department for their help.
