# The Effect of Low Level Diode Laser Bio Stimulation on Healing of Sub- epithelial Connective Tissue Graft Following Treatment of Localized Gingival Recession

**(A Randomized Controlled Clinical trial)**

*Thesis*

Submitted to Department of Oral Medicine, Periodontology, Oral Diagnosis and Radiology, Faculty of Dentistry, Ain Shams University, in partial fulfillment of the requirements of the Master's Degree in Oral Medicine, Periodontology, and Oral Diagnosis

*Presented By*

**MARWA EL-DESOUKY HELAL**

B.D.S., Faculty of Oral and Dental Medicine, Future University, 2011

*Supervisors*

**ASSOC. PROF. MOHAMED SHERIF EL MOFTY**

Associate Professor of Oral Medicine, Periodontology and Oral Diagnosis, Faculty of Dentistry, Ain shams University
Vice Dean Post-graduates Affairs, Faculty of Dentistry Nahada University

**DR. DOAA ADEL KHATTAB**

Lecturer of Oral Medicine, Periodontology and Oral Diagnosis
Faculty of Dentistry, Ain Shams University

FACULTY OF DENTISTRY
AIN SHAMS UNIVERSITY

# *Dedication*

I am grateful to *My Precious family; My Father, Mother, Sister and Brother* since without their, love, guidance, encouragement, special support and care, I wouldn't have been what I am today. No words could express my love, appreciation and gratitude towards the sweetened persons in my life "***My mother and father"***. God bless you my beloved family.

To My ever Supporting ***Sister and Brother*** for their love, encouragement and care. I love both of you more than you could imagine.

# Acknowledgment

*Thanks to "Allah" for providing me the strength and the power to accomplish this work successfully.*

I would like to express my deep gratitude to my dear supervisor **Assoc. Prof. Dr/ Mohamed Sherif El Mofty,** Associate Professor of Oral Medicine, Periodontology and Oral Diagnosis, Faculty of Dentistry - Ain Shams University, Vice Dean Post-graduates Affairs, Faculty of Dentistry Nahada University for his valuable guidance, tremendous efforts, continues supports, patience, motivation and encouragement in getting me much better to finalize this work. It was a great honor to work under his supervision.

I also express my deepest thanks and appreciation to **Dr/ Doaa Adel Khattab,** Lecturer of Oral Medicine, Periodontology and Oral Diagnosis Faculty of Dentistry, Ain Shams University who generously gave me time to fill in the forms used in this work. This study would have never been completed without her supervision, great help, valuable advice, excellent scientific knowledge and constant support.

I owe special thanks to all ***staff members, my colleagues,*** **my graduated students** and **my friends** for their love, support, and help.

Last but not least, great thanks to **My Patients** for trusting me.

# List of Contents

| Title | Page No. |
|---|---|
| List of contents | I |
| List of Tables | II |
| List of Figures | III |
| List of Abbreviations | IV |
| Introduction | 1-2 |
| Review of Literature | 3-38 |
| Aim of the Study | 39 |
| Subjects and Methods | 40-60 |
| Results | 61-81 |
| Case Presentations | 82-89 |
| Discussion | 90-98 |
| Conclusions | 99 |
| Recommendations | 100 |
| Summary | 101-103 |
| References | 104-126 |
| Arabic Summary | 127-131 |

# List of tables

| Table No. | Title | Page No. |
|---|---|---|
| **1** | Miller Classification 1985 | **7** |
| **2** | Cortellini and Bissada Classification 2018 | **9** |
| **3** | Mean (± SD) Values of Visual Analogue Scale (VAS) Score for both Control and Laser Groups at ifferent Time Periods | **63** |
| **4** | Mean (± SD) Values of Number of analgesic & Patient's Satisfaction for both Control and Laser Groups at different time Periods | **64** |
| **5** | Mean (± SD) Values of Plaque Index (PI) & Gingival Index (GI) for both Control and Laser Groups at different time Periods | **67** |
| **6** | Mean (± SD) Values of Probing Pocket Depth (PPD) & Clinical Attachment Level (CAL) for both Control and Laser Groups at different time Periods | **69** |
| **7** | Mean (± SD) Values of Recession Height (RH), Recession Width (RW), Keratinized Tissue Width (KTW) & Anatomical papilla for both Control and Laser Groups at different time Periods | **72** |

| | | |
|---|---|---|
| **8** | Mean (± SD) Values of Percentage of Root Coverage (RC) & Root Coverage Esthetic Score (RES) for both Control and Laser Groups at different time Periods | **75** |
| **9** | Mean (± SD) Values of Laundry Wound Healing Index (WHI) for both Control and Laser Groups at different time Periods | **77** |
| **10** | Mean (± SD) Values of Post-operative Bleeding Score for both Control and Laser Groups at different time Periods | **78** |
| **11** | Mean (± SD) Values of Gingival Phenotype for both Control and Laser groups at different time Periods and % Difference between Baseline and After 6 months | **80** |

# List of Figures

| Fig. No. | Title | Page No. |
|---|---|---|
| **1** | Post- operative Image after Scaling by 1 month | **43** |
| **2** | Clinical Images Showed **a.** Patient Standardization Method using Panoramic Cephalometric **b**. Tripod Components | **45** |
| **3** | Clinical Pictures Showed **a. S**plinting Composite Material in Interdental Contact area in Recipient site **b.** Oblique Sub-marginal Incisions **c.** Split- Full- Split thickness Flap **d.** Mobilizing Soft tissue with A Horizontal Supra-periosteal Incision. | **47** |
| **4** | Clinical Images Showed **a.** Placing Tin Foil (Patron) in the Recipient site **b.** Donor site Preparation by Tracing Four incision Lines with the help of Patron **c.** 4 Incision lines were traced on Palatal area **d.** De-epithelized the traced area that Corresponding to the Grafted area | **49** |
| **5** | Clinical Images Showed **a**. 1st incision on the Palate was Perpendicular to the long axis of the teeth 2 to 3 mm apical to the Gingival margin with the 2nd incision Parallel to the long axis of the teeth, 1 to 2 mm apical to the first incision **b.** Removing the graft from the Palate as A-traumatically as possible**.** | **50** |

| | | |
|---|---|---|
| | **c&d.** Uniform thickness of the Graft with measurement (Length X Width) **e.** Palatal Stent was ready on the Cast **f.** Periopack was placed on fitting surface of the Palatal Stent to be applied on area where the Graft was harvested. | |
| **6** | Clinical Images Showed **a.** Placing the graft on the Recipient site **b.** Modified Coronal Sling Sutures on Composite interdentally to facilitate CAF | **52** |
| **7** | Clinical Images Showed **a.** Lasotronix device with Bio-stimulating Handle **b.** Laser Application on Donor Palatal site **c.** Laser Application on Recipient site **d**. Placement Palatal Stent with Perio- pack after Laser Applications | **53** |
| **8** | Bar Charts represented VAS & Number of Analgesic for both Groups | **65** |
| **9** | Bar & Pie Charts represented Patient's Satisfaction for different Groups | **65** |
| **10** | Bar Charts represented PI & GI for different Groups | **68** |
| **11** | Bar Charts represented PPD & CAL for both Groups | **70** |
| **12** | Bar Charts represented RH & RW for different Groups | **74** |
| **13** | Bar Charts represented KTW & Anatomical Papilla for both Groups | **74** |
| **14** | Pie Charts represented Percentage of RC & RES for different Groups | **76** |
| **15** | Bar Charts represented Landry Wound Healing Index & Post-operative Bleeding of the Palate for different Groups | **78** |
