

The Influence of Finishing Techniques and Different Beverages on the Color Stability of Bulkfill Resin Composite

Thesis submitted to Operative Dentistry Department,
Faculty of Dentistry, Ain Shams University, in partial
fulfillment of the requirements of Master degree in
Operative Dentistry

BY

Nora Ahmed Salah El dine

B.D.S.

Faculty of Dentistry,

Ain Shams University (2011)

2019

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

(قالوا سبحانك لا علم لنا إلا ما علمتنا إنك انت العليم الحكيم)

سورة البقرة آية (32)

Supervisors

Dr. Omaila Hassan Ahmed Ghallab

Professor and Head of Operative Dentistry Department

Faculty of Dentistry

Ain Shams University

Dr. Marwa Mohamed Wahsh

Associate Professor of Fixed Prosthodontics

Faculty of Dentistry

Ain Shams University

Acknowledgement

I thank **Allah** for giving me the strength, guide and support to do this research.

I am greatly honored to express my deep gratitude to **Dr. Omaina Hassan Ghallab**, Professor of Operative Dentistry, Faculty of Dentistry, Ain Shams University, for her endless support and guidance. I benefited greatly from her great experience and vast knowledge throughout the research work.

I would like to express my sincere thanks to **Dr. Marwa Mohamed Wahsh**, Associate Professor of Crown and Bridge, Faculty of Dentistry, Ain Shams University, for her truly valuable guidance and continuous support.

Dedication

This work was dedicated to:

My beloved parents, for their utmost help, support and guidance.

My adorable sister and brother, for their help and support.

My colleagues at Operative Dentistry Department, Ain Shams
University for their continuous help.

List of Tables

Table number	Table Title	Page number
1	Name, material type and manufacturer of the tested resin-based composites	49
2	Finishing and polishing tools, description, composition, manufacturer and their lot number	51
3	Staining solutions used in study	53
4	Factorial design of the study	55
5	Interactions between the variables of the study	55
6	Three-Way ANOVA for the effect of type of resin composite material, finishing tool and beverage type on the color change of resin composite material (ΔE) and their interaction	67
7	Means and standard deviations for the effect of type of resin composite material on color change of resin composite material (ΔE) for all tested groups	68
8	Means and standard deviations for the effect of finishing tool on color change of resin composite material (ΔE) for all tested groups	70
9	Means and standard deviations for the effect of beverage type on color change of resin composite material (ΔE) for all tested groups	71
10	Three-Way ANOVA for the effect of type of resin composite material, finishing tool and beverage on lightness parameter of color of resin composite material (ΔL) and their interaction	72
11	Means and standard deviations for the effect of type of resin composite material on ΔL for all tested groups	73
12	Means and standard deviations for the effect of finishing tool on ΔL for all tested groups	75
13	Means and standard deviations for the effect of beverage type on ΔL for all tested groups	76

Table number	Table Title	Page number
14	Three-Way ANOVA for the effect of type of resin composite material, finishing tool and beverage type on redness-green parameter of color of resin composite material (Δa)	77
15	Means and standard deviations for the effect of type of resin composite material on Δa for all tested groups	78
16	Means and standard deviations for the effect of finishing tool on Δa for all tested groups	79
17	Means and standard deviations for the effect of beverage type on Δa for all tested groups	81
18	Three-Way ANOVA for the effect of type of resin composite material, finishing tool and beverage type on yellowness-blueness parameter of color of resin composite material (Δb)	82
19	Means and standard deviations for the effect of type of resin composite material on Δb for all tested groups	83
20	Means and standard deviations for the effect of finishing tool on Δb for all tested groups	85
21	Means and standard deviations for the effect of beverage type on Δb for all tested groups	86

List of Figures

Figure number	Figure Title	Page
1	CIELAB Color Space	28
2	(a) Nanohybrid resin composite Filtek Z250XT (3M) , (b) Bulkfil resin composite Filtek Bulkfil (3M)	50
3	Soflex finishing and polishing discs (From left to right: Medium, fine, superfine)	52
4	Extrafine finishing diamond stone(Mani)	52
5	Optionestep polisher (Kerr, USA)	52
6	Specimen grouping for color evaluation	54
7	Disassembled and assembled Teflon mould	57
8	(a) Filtek Z250XT resin composite specimens, (b) Filtek Bulkfil resin composite specimens	57
9	Finishing of the resin composite specimen with extrafine finishing diamond stone	60
10	Polishing of the resin composite specimen with OptiOnestep disc	60
11	Finishing of the resin composite material with Soflex disc	61
12	(a) (b) Resin Composite specimens immersed in Cola on the left and Coffee on the right	61
13	(a) (b) VITA Easyshade Advance 4.0	64
14	Bar chart for the effect of resin composite material type on color change of resin composite (ΔE) for all tested groups	69
15	Bar chart for the effect of finishing tool on color change of resin composite material (ΔE) for all tested groups	70
16	Bar chart for the effect of beverage type on color change of resin composite material (ΔE) for all tested groups	71
17	Bar chart for the effect of type of resin composite material on ΔL of resin composite for all tested groups	74
18	Bar chart for the effect of finishing tool on ΔL for all tested groups	75
19	Bar chart for the effect of beverage type on ΔL of resin composite material for all tested groups	76

Figure number	Figure Title	Page
20	Bar chart for the effect of type of resin composite material on Δa for all tested groups	78
21	Bar chart for the effect of finishing tool on Δa for all tested groups	80
22	Bar chart for the effect of beverage type on Δa for all tested groups	81
23	Bar chart for the effect of type of resin composite material on Δb for all tested groups	84
24	Bar chart for the effect of finishing tool on Δb for all tested groups	85
25	Bar chart for the effect of beverage type on Δb for all tested groups	86
26	SEM photomicrograph of FiltekZ250XT resin composite material (a)finished against mylar strip (Control), (b) finished with Sof-Lex discs, and (c) finished with extrafine diamond stone + Opti1step micropolisher	87
27	SEM photomicrograph of Filtek Bulkfill (a) finished against mylar strip (control),(b)finished with Sof-Lex and (c)finished with extrafine diamond stone + Opti1step micropolisher	88
