Effect of Laser Radiation on Drug Release from Liposomes

A THESIS

*Submitted in Partial Fulfillment of the
Requirements for the Degree of
Master of Science
(PHYSICS)*

BY

Mostafa Ismaiel Omar Ibrahim
(B.Sc. Physics)

SUPERVISORS

Prof. Dr. Hasan. O. Nafie,
Prof. of Theo. Phys. Physics Department,
Faculty of Science, Zagazig University,
Benha Branch.

Dr. Mohammed. E. E Solite,
Lecturer of Phys,
Physics Department,
Faculty of Science, Zagazig
University, Benha Branch.

Dr. Reem. H. El-Gebaly,
Lecturer of Biophys.
Biophysics Department,
Faculty of Science,
Cairo University.

Dr. Maha F. M. Ali,
Lecturer of Pharmaceutics, Medical and
Biological Laser Application Department,
National Institute of Laser Enhanced Science
(NILES),
Cairo University.

2005

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا

إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ

عَرَفَهُمُ الْعِزَّةِ

سورة البقرة آية (٣٢)

Acknowledgment

First, gratitude and deeply thanks to our creator “Allah” who always helps and guides us.

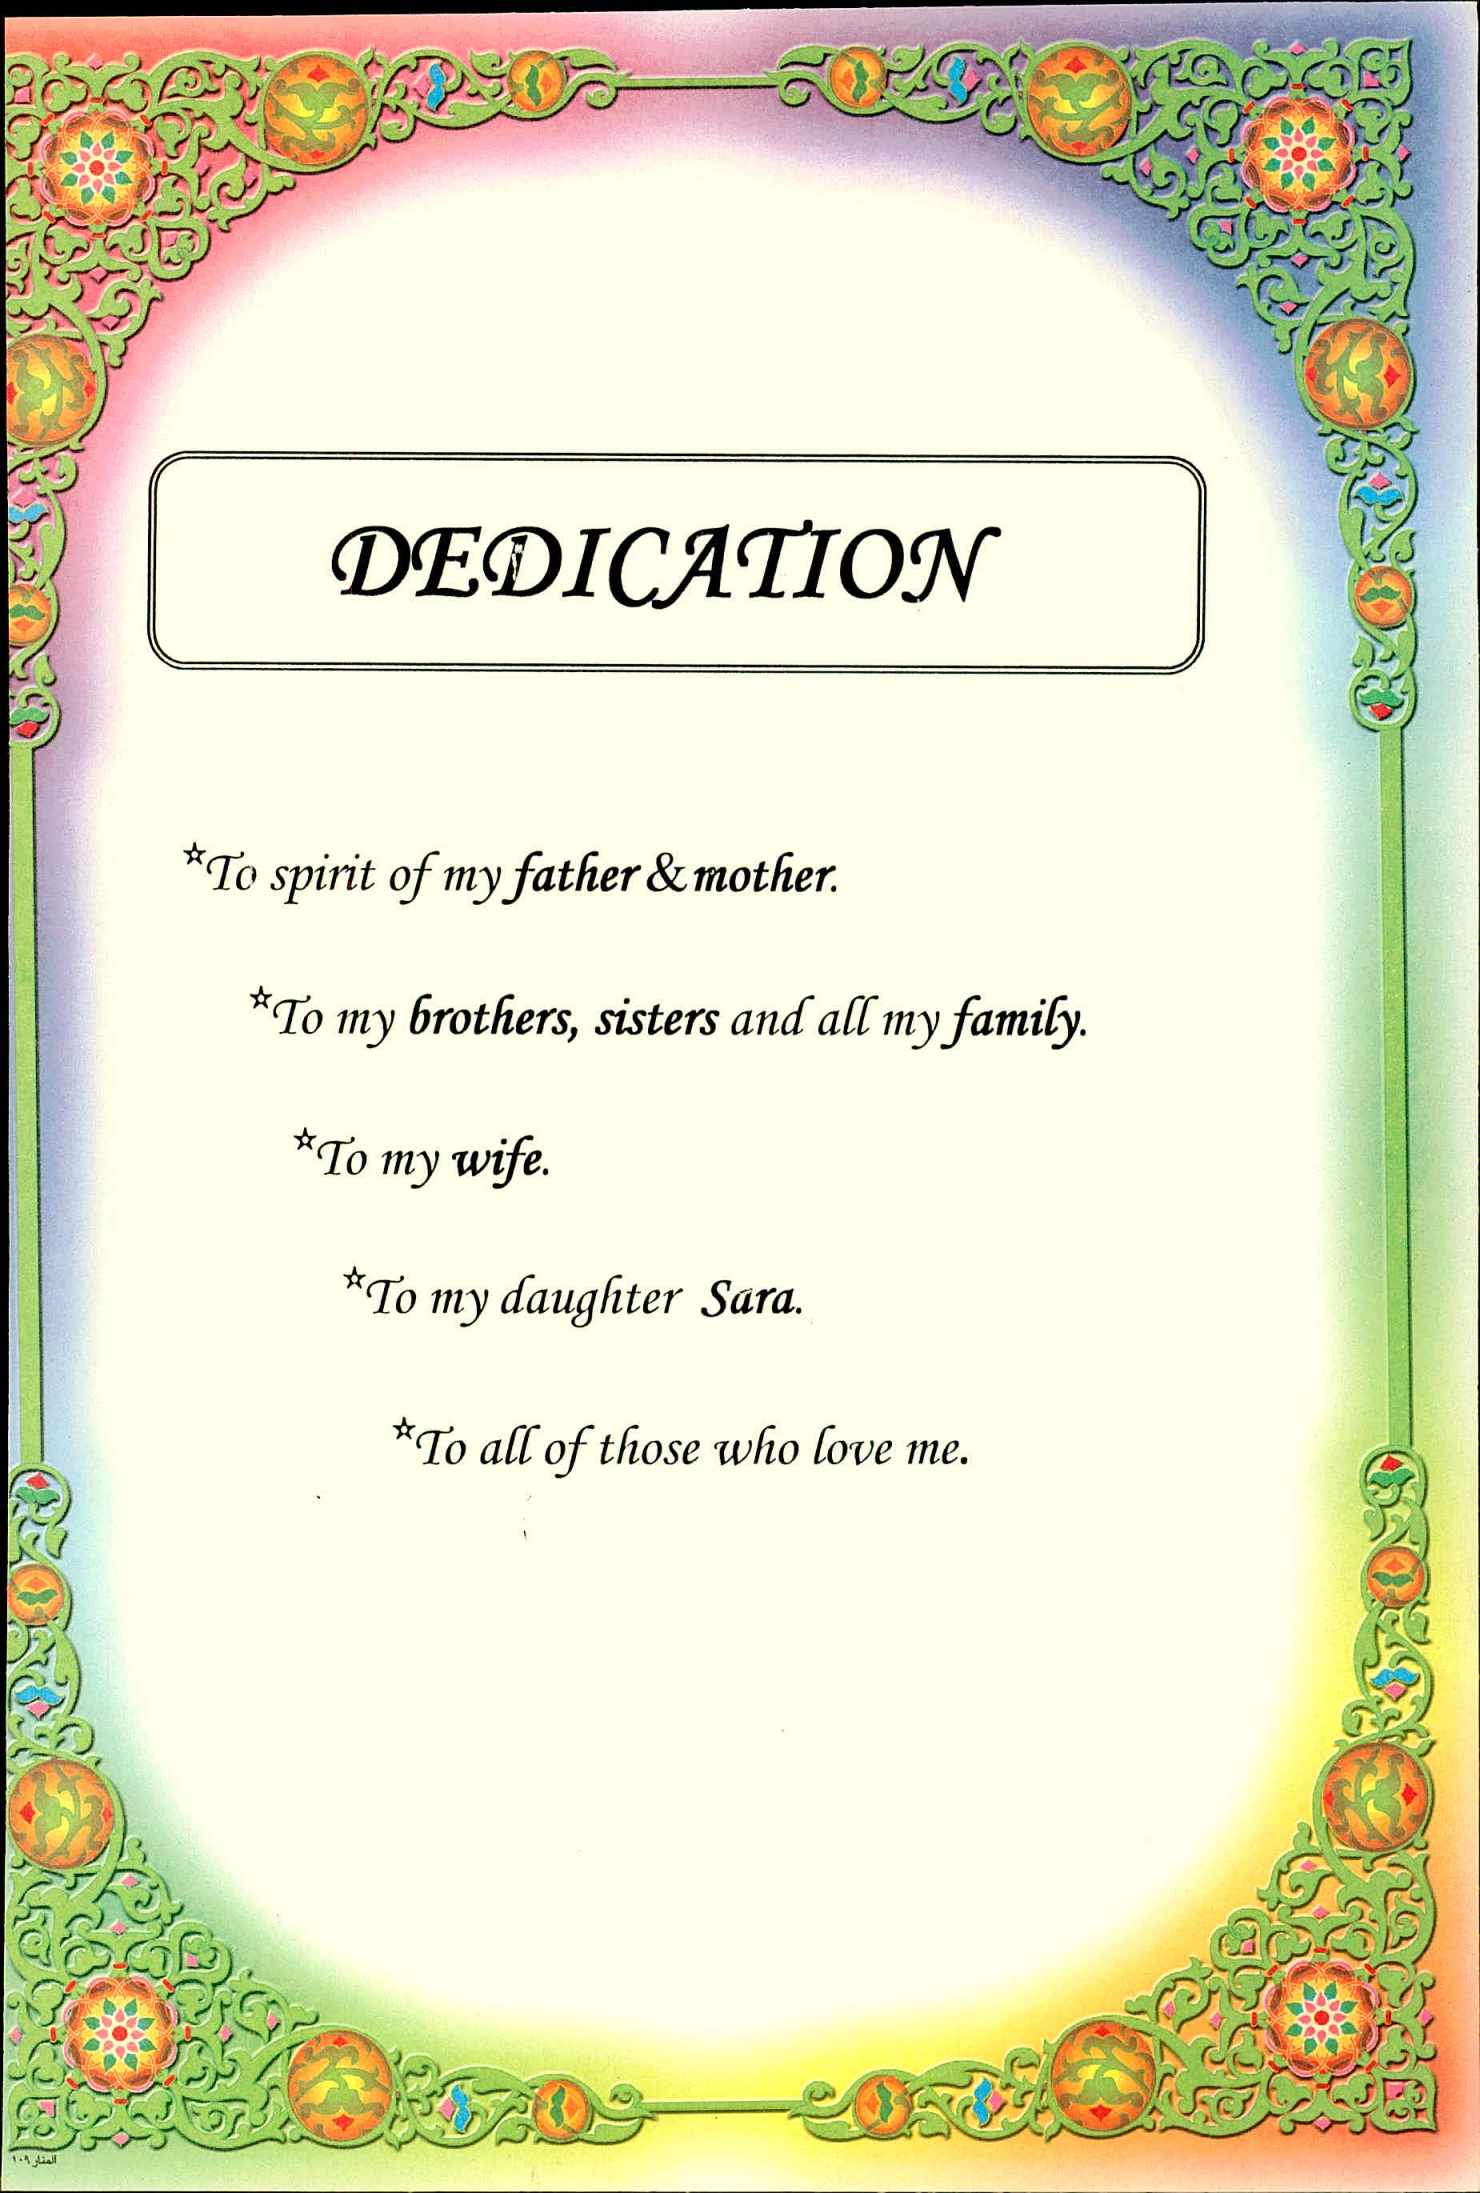

*I would like to express my deeply thanks, my sincere appreciation and gratitude to **Prof. Dr. H. O. Nafie**, Prof. Of theo. Phys., Physics Department, Faculty of Science, , Zagazige University, Benha branch, for helping, encouragement valuable guidance and generous supervision during this work. It is pleasure and honor to work under his supervision.*

*I would like to express my thanks to **Dr. M. E. Solite**, lecturer of physics, Physics Department, Faculty of Science, Zagazige University, Benha branch for generous supervision, valuable discussion, continuous support and encouragement interest.*

*I would like to express my thanks to **Dr. R. H. El-Gebaly**, lecturer of biophysics, Biophysics Department, Faculty of Science, Cairo University, for her continuous help, cooperation revision during this research work.*

*Grateful appreciation of thanks to **Dr. M. F. Mohammed**, lecturer of pharmaceuticals, medical and biological laser application department, National Institute of Laser Enhanced Science (NILES), Cairo University, for her continuous help, cooperation revision during this research work.*

*Also, so many thanks for Prof. **Dr. M. K. El-Mansy**, head of Phys, dept. and for all the staff members of the physics department, Faculty of Science, Benha University to their continuous help.*

DEDICATION

★ *To spirit of my father & mother.*

★ *To my brothers, sisters and all my family.*

★ *To my wife.*

★ *To my daughter Sara.*

★ *To all of those who love me.*

Contents

Introduction	1
Chapter I Literature Review	7
Chapter II Theoretical aspects	14
2.1-Dielectric Properties.....	14
2.2- Definitions and Basic Concepts	14
2.3- Dielectric Dispersion	16
2.3.1-Conductivity.....	16
2.3.1.1- Low frequencies (< 0.1 MHz).....	16
2.3.1.2- Frequency between 1-100 MHz.....	17
2.3.1.3- UHF and Microwave Frequencies (>100 MHz).....	17
2.4- Permittivity.....	18
2.5- Cole-Cole equation.....	21
2.6- Basic Properties of Liposomes.....	24
2.6.1- Composition and properties of liposomes	24
2.6.2- Classification of Liposomes	25
2.6.3- Stability of liposomes.....	27
2.6.3.1- Physical stability of liposomes.....	27
2.6.3.2- Chemical stability of liposomes.....	27
2.6.4- Liposomes as a Drug delivery system.....	28
2.6.5- Drug release from liposomes.....	28
2.6.6- Targeting Liposomes.....	29

2.7- Methotrexate (MTX).....	31
2.8- Laser.....	32
2.8.1- Generation of laser	33
2.8.2- Composition of Lasers	35
2.8.3- Characteristics of laser irradiation.....	35
2.8.4- Energy Fluence.....	36
2.8.5- Types of laser.....	36
Chapter III Materials and Methods.....	39
3.1- Materials	39
3.2-Equipment	40
3.3-Methodology.....	41
3.3.1- Preparation of Standard Calibration Curve of MTX.....	41
3.3.1.1- Scan for Excitation and Emission wavelengths	41
3.3.1.2- Calibration Curves of MTX.....	41
3.3.2- Preparation of MTX loaded liposomes.....	44
3.3.2.1- Method of preparation.....	44
3.3.3- Characterization of Prepared Liposomes.....	45
3.3.3.1- Encapsulation efficiency.....	45
3.3.3.2- Size Distribution.....	46
3.3.4- Laser Irradiation Facilities.....	46
3.3.4.1-Effect of Laser on Drug Release from Liposomes.....	46
3.3.4.2-Effect of Laser on Phase Transition Temperature.....	47
3.3.4.3-Effect of Laser on Molecular Stability of Liposomes.....	47
3.3.4.4-Dielectric Properties.....	47
3.3.5-Statistical methods and analysis for evaluation.....	48

Chapter IV Results.....	49
4.1Size Distribution.....	49
4.2-Encapsulation Efficiency.....	53
4.3-Effect of Laser on the Prepared Liposomes.....	53
4.3.1-Drug Release from Liposomes.....	53
4.3.1.1-Statistical Analysis of The Release Data.....	54
4.3.2- Phase transition measurements.....	57
4.3.3- Molecular Stability of MTX Loaded Liposomes.....	62
4.3.4- Dielectric measurements of Liposomes.....	67
Chapter V Discussion.....	77
References.....	82
Arabic Abstract
