**A Comparative Study into the Effect of Two Techniques of
Cavity Preparation on Microleakage and Interfacial
Micromorphology of Tooth-bonded Composite Resin
Restorative**

THESIS

Submitted to the Faculty of Oral and Dental Medicine, Cairo
University in Partial Fulfillment of the Requirements of the
Master Degree in Dental Surgery

(Operative Dentistry)

BY

EMAN A. ABOUAUF

B.D.S. Cairo University

Faculty of Oral and Dental Medicine

SUPERVISORS

Dr. Inas Mohy El-Din
Professor and Chairman of Operative Dentistry
Faculty of Oral and Dental Medicine
Cairo University

Dr Olaa Fahmy
Assistant Professor of Operative Dentistry
Faculty of Oral and Dental Medicine
Cairo University

Dr Maha Niazy
Lecturer of Operative Dentistry
Faculty of Oral and Dental Medicine
Al-Azhar University

DEDICATION

*To my parents, my husband and to
my specially beloved son*

ACKNOWLEDGMENT

I wish to express my gratitude and thanks to **Dr. Inas Mohy El-Din**, Professor and Chairman of Operative Dentistry, Faculty of Oral and Dental Medicine, Cairo University, for her fruitful opinions and precious enlightens.

Also I wish to thank **Dr. Olaa Fahmy**, Associate Professor of Operative Dentistry, Faculty of Oral and Dental Medicine, Cairo University, for her valuable instructions and patience, which were of extreme help for the progress of my work.

I wish to offer my thanks to **Dr. Maha Niazy**, Lecturer of Operative Dentistry, Faculty of Oral and Dental Medicine, Al-Azhar University, for her directive suggestions and help specially for the practical division of the study.

I would like to thank **Dr. Mohamed Riad Farid, Professor** of Operative Dentistry, Faculty of Oral and Dental Medicine, Cairo University, for his continuous support and generosity in providing many clinical facilities.

Finally I owe a special gratitude to my husband, Mr. Ahmed Taha for his endless support and encouragement.
