SOME PHARMACOLOGICAL STUDIES ON DRUG RESIDUES

A Thesis presented By

Kamal El – Din Mahmoud El Refaey

M. V. Sc.
Zagazig University 1994

For the Degree of Philosopher Doctor
In Veterinary Sciences
(Pharmacology)

Under Supervision of

Dr.

Moustafa Abd El - Aziz Mohamed

Prof. Of Pharmacology

Fac. Vet. Med
Kafr El Sheikh
Tanta University

Dr.

Magdy Ibrahim Abd El-Aziz

Prof. of Pharmacology and head of Pharmacology and forensic Medicine Dep.
Fac. Vet. Med
Kafr El Sheikh
Tanta University

Dr.

Zakaria M. EZ El - Din

Senior Researcher
Animal Health Research Institute
Damietta branch

Submitted to

Tanta University
Faculty of Vet. Medicine Kafr El Sheikh
Department of pharmacology,
Forensic Medicine and Toxicology

2000

ACKNOWLEDGEMENT

The prayerful thanks to my

MERCIFUL ALLAH

Who gives me every thing I have

I would like to express my deepest gratitude, sincerest thanks to Prof. Dr. Moustafa Abd El- Aziz, professor of pharmacology, faculty of veterinary medicine, Tanta University (Kafr El - Sheikh Branch) for his valuable supervision, unfailing efforts, great support and continuos help throughout this work.

Wording is not enough to express my sincere respects and cardial gratitude to Prof. Dr. Magdy Abd El- Aziz, prof. of pharmacology, and head of the department, faculty of veterinary medicine. Tanta University for his kind supervision, great help, valuable suggestions, encouragement and assistance throughout the work .

Special thanks are given to Dr. Zakaria M. Ez El-Din, Senior researcher, animal health research institute , Damietta branch.

The author is greatly indebted to all members of pharmacology department, faculty of veterinary medicine, Tanta University.

I acknowledge the technical assistance provided by . Dr. Ali Maher Khalil, Dr. Soher R. Ghonim, and Dr. Ola Adel, animal health research institute, Damietta branch for their cooperation throughout the work .

I wish to thank Dr. Ibrahim A. El – Saedi and Dr. Lila Moustafa, animal health research institute, Dokki, Giza, for supplying the organisms needed for the practical work.

I thank Amoun Pharmaceutical Co. for providing enrofloxacin standard powder for the present study.

Dedication

to :

My faithful wife

My son, Ibrahim

My daughters, Engy, Ieven

and Eman; the roses of my life .

List Of Tables

Tables *Page*

(1) Concentrations (µg /ml) and average corrected values of inhibition zones (m.m) in phosphate buffer and non infected chicken serum for the standard curve of enrofloxacin *62*

(2) Serum concentration of enrofloxacin (µg/ml) following a single intravenous injection of 10 mg/kg b.wt. in non infected chickens *65*

(3) Pharmacokinetic parameters of enrofloxacin following a single intravenous injection of 10 mg/kg b.wt. in non infected chickens *67*

(4) Serum concentration of enrofloxacin (µg/ml) following a single oral administration of 10 mg/kg b.wt. in non infected chickens previously (15 days) given the same dose by single intravenous injection *69*

(5) Pharmacokinetic parameters of enrofloxacin following a single oral administration of 10 mg/ kg b. wt.in non infected chickens previously (15 days) given the same dose by single intravenous injection *71*

(6) Serum concentrations of enrofloxacin (µg / ml) in non infected chickens following a single oral and intravenous administration of 10 mg / kg b.wt. *72*

(7) Bioavilability of enrofloxacin in non infected chickens following a single oral dose of 10 mg/ kg b.wt. previously (15 days) given the same dose intravenously *74*

(8) Serum concentration of enrofloxacin (µg /ml) following a single intravenous injection of 10 mg/kg b.wt. in non infected chickens *76*

(9) Pharmacokinetic parameters of enrofloxacin following a single intravenous injection of 10 mg/kg b.wt. in non infected chickens *77*

(10) Serum concentration of enrofloxacin in µg / ml following a single intramuscular injection of 10 mg / kg b.wt. in non infected chickens previously (15 days) given the same dose by single intravenous injection *79*

(11) *Pharmacokinetic parameters of enrofloxacin following a single intramuscular injection of 10 mg / kg . b. wt. in non infected chickens previously given the same dose by a single intravenous injection.* *81*

(12) Serum concentrations of enrofloxacin in µg / ml in non infected chickens following a single intramuscular and intravenous injection of 10 mg/kg b.wt. *82*

(13) Bioavilability of enrofloxacin in non infected chickens following a single intramuscular injection of 10 mg/ kg b.wt. previously (15 days) given the same dose intravenously *84*

(14) Serum concentrations of enrofloxacin (µg/ml) during repeated oral administration of 10 mg / kg b.wt. once

daily for five consecutive days in non infected chickens 86

(15) Serum (µg/ml) and tissue (µg / g) concentration of enrofloxacin in non infected chickens following repeated oral administration of 10 mg/kg b.wt. once daily for five consecutive days 88

(16) Serum concentration of enrofloxacin in µg / ml during repeated intramuscular injection of 10 mg / kg b.wt. once daily for five consecutive days in non infected chickens 90

(17) Serum (µg / ml) and tissue(µg / g) concentration of enrofloxacin in non infected chickens following repeated intramuscular injection of 10 mg / k b.wt. once daily for five consecutive days 92

(18) Serum concentration of enrofloxacin in µg / ml following a single intravenous injection of 10 mg / kg b.wt. in experimentally infected chickens with M.g. strain 94

(19) Pharmacokinetic parameters of enrofloxacin following a single intravenous injection of 10 mg / kg b.wt. in experimentally infected chickens with M.g. strain 96

(20) Serum concentration of enrofloxacin (µg / ml) following a single oral administration of 10 mg/kg b.wt. in experimentally infected chickens with M. g. strain 98

(21) Pharmacokinetic parameters of enrofloxacin following single oral administration of 10 mg / kg b.wt. in experimentally infected chickens with M.g. strain 100

(22) Serum concentration of enrofloxacin in µg / ml in experimentally infected chickens with M.g. strain following a single intravenous and oral administration of 10 mg/kg b.wt 101
