

Diabetic Retinopathy Vascular Density Maps Using Optical Coherence Topography Angiography

Thesis

*Submitted for Partial Fulfillment of Master
Degree in Ophthalmology*

By

Norhan Amr Hassan Omran

M.B.B.ch

Supervised by

Dr. Abd El-Rahman Gaber Salman

*Professor of Ophthalmology
Faculty of Medicine Ain Shams University*

Dr. Yousra Ahmed Thabet Farweez

*Assistant Professor of Ophthalmology
Faculty of Medicine Ain Shams University*

Dr. Passant Sayed Saif

*Lecturer of Ophthalmology Ophthalmology
Department, M.U.S.T University*

*Faculty of Medicine
Ain Shams University
Cairo-2019*

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قَالَ

لَسْبَدَانِكَ لَا عِلْمَ لَنَا
إِلَّا مَا عَلَّمْتَنَا إِنَّكَ أَنْتَ
الْعَلِيمُ الْعَظِيمُ

صدق الله العظيم

سورة البقرة الآية: ٣٢

Acknowledgements

First of all, thanks are all due to Allah for blessing this work until it has reached its end, as part of his generous help throughout our life.

*My profound thanks, respect and deep gratitude to **Prof. Dr. Abd El-Rahman Gaber Salman** Professor of Ophthalmology, Ain Shams University, for his fruitful advices and help throughout the work,*

*My deepest gratitude and appreciation to **Ass. Prof. Dr. Yousra Ahmed Thabet Farweez** Assistant Professor of Ophthalmology, Ain Shams University, for her fruitful assistance and valuable suggestions throughout the work,*

*Special thanks to **Dr. Passant Sayed Saif**, Lecturer of Ophthalmology, M.U.S.T University for her help and cooperation, without which this work could not be possible*

*Words cannot express how indebted I am to my **Dearest family, specially mam and dad** for their continuous support and prayer for me throughout my life.*

Last but not least my sincere thanks and appreciation to all patients participated in this study.

Norhan Amr

List of Tables

Table No.	Title	Page No.
Table (1):	BCVA expressed by LogMAR, Decimal and Snellen Equivalent.....	83
Table (2):	Demographic data.	88
Table (3):	Comparison group 1 (normal individuals), group2 (diabetic patients without diabetic retinopathy), group3 (diabetic patients with non proliferative diabetic retinopathy) & group 4 (diabetic patients with proliferative diabetic retinopathy) as regard Vision LOG MAR, age & IOP.	89
Table (4):	Post Hoc test displaying multiple comparisons within groups regarding Vision LOG MAR, age & IOP.....	90
Table (5):	Comparison group 1 (normal individuals), group 2 (diabetic patients without diabetic retinopathy), group 3 (diabetic patients with non proliferative diabetic retinopathy) & group 4 (diabetic patients with proliferative diabetic retinopathy) as regard foveal thickness (μm).....	92
Table (6):	Comparison group 1 (normal individuals), group 2 (diabetic patients without diabetic retinopathy), group 3 (diabetic patients with non proliferative diabetic retinopathy) & group 4 (diabetic patients with proliferative diabetic retinopathy) as regard superior para foveal thickness, inferior para foveal thickness, nasal para foveal thickness & temporal para foveal thickness.....	94

List of Tables Cont...

Table No.	Title	Page No.
Table (7):	Comparison group 1 (normal individuals), group 2 (diabetic patients without diabetic retinopathy), group 3 (diabetic patients with non proliferative diabetic retinopathy) & group 4 (diabetic patients with proliferative diabetic retinopathy) as regard superior choroidal thickness, inferior choroidal thickness, nasal choroidal thickness & temporal choroidal thickness.....	97
Table (8):	Post Hoc test displaying multiple comparisons within groups regarding superior choroidal thickness, inferior choroidal thickness, nasal choroidal thickness & tempo choroidal thickness.	98
Table (9):	Comparison group 1 (normal individuals), group 2 (diabetic patients without diabetic retinopathy), group 3 (diabetic patients with non-proliferative diabetic retinopathy) & group 4 (diabetic patients with proliferative diabetic retinopathy) as regard FAZ area, superior retinal density, inferior retinal density, nasal retinal density & temporal retinal density.	101
Table (10):	Post Hoc test displaying multiple comparisons within groups regarding FAZ area, superior retinal density, inferior retinal density, Nasal density & temporal density.	105

List of Tables Cont...

Table No.	Title	Page No.
Table (11):	Comparison group1 (normal individuals), group 2 (diabetic patients without diabetic retinopathy), group 3 (diabetic patients with non proliferative diabetic retinopathy) & group 4 (diabetic patients with proliferative diabetic retinopathy) as regard superior choroidal density, inferior choroidal density, nasal choroidal density & temporal choroidal density.	106
Table (12):	Post Hoc test displaying multiple comparisons within groups regarding superior choroidal density, inferior choroidal density, nasal choroidal density & temporal choroidal density.	107
Table (13):	Comparison group 1 (normal individuals), group2 (diabetic patients without diabetic retinopathy), group3 (diabetic patients with non proliferative diabetic retinopathy) & group 4 (diabetic patients with proliferative diabetic retinopathy) as regard their qualitative assessment.	110
Table (14):	Correlation between choroidal thickness (superior, inferior, nasal and temporal and choroidal density (superior, inferior, nasal and temporal).	111
Table (15):	Correlation between retinal thickness (superior para foveal, inferior para foveal inferior, nasal para foveal and temporal para foveal) and retinal density (superior, inferior, nasal and temporal).	111
Table (16):	Foveal thickness.	112

List of Tables Cont...

Table No.	Title	Page No.
Table (17):	Diagnostic accuracy of foveal thickness to differentiate between patients with proliferative diabetic patients and the rest of studied patients and controls.	113
Table (18):	Best cut off point for foveal thickness to differentiate between patients with proliferative diabetic patients and the rest of studied patients and controls.	113

List of Figures

Fig. No.	Title	Page No.
Figure (1):	The peri-papillary retina shows the cellular layers from internal.....	27
Figure (2):	Non proliferative diabetic retinopathy	43
Figure (3):	Clinically significant macular edema	47
Figure (4):	Schematic of a TDOCT system	59
Figure (5):	Schematic of a SDOCT system.....	60
Figure (6):	SD OCT cross-sectional image of a normal human macula	62
Figure (7):	(A) A healthy eye has a convex or bowl shape to the choroidoscleral interface (red line) an even distribution of large choroidal vessels in the nasal temporal plan, even continuum in choroidal vessel size (large – small from outer choroid to inner choroid).(B) An eye with nonproliferative diabetic retinopathy has an irregular, concave-convexconcave or S shape to the choroidoscleral interface (red line)	65
Figure (8):	The internal structure of choroid from the inner to the outer margin is visible, healthy fundus view with SS-OCT.....	67
Figure (9):	Normal choroidal thickness measurements.....	68
Figure (10):	Microaneurysm assessment using OCT angiography.....	75
Figure (11):	Intraretinal microcirculation and capillary nonperfusion.....	77
Figure (12):	OCT angiogram of an eye with nonproliferative diabetic retinopathy (NPDR) showing an enlarged foveal avascularzone (FAZ), enlarged intercapillary spaces, a few microaneurysms.....	79
