

**Assessment of Severely Atrophied
Anterior Maxillae 3D Reconstruction
Using Autogenous Retromolar Cortical
Shell and Composite Particulate Grafts**

A thesis

submitted to the Faculty of Oral and Dental Medicine

(Ain Shams university)

for partial fulfillment of the

Doctorate Degree of Oral and Maxillofacial surgery

By

Mostafa Mahmoud Azab

B.D.S. (2004)

M.Sc. (2013)

Ain Shams University

(2019)

Supervisors

Prof. Mohammed Diao Zein EL-Abdien

Professor of oral and maxillofacial surgery

Faculty of Oral and Dental medicine

Ain shams University

Prof. Waleed Ragab EL-Beialy

Professor of oral and maxillofacial surgery

Faculty of Oral and Dental medicine

Cairo University

Ass. Prof. Amr Amin Ghanem

Assistant Professor of oral and maxillofacial surgery

Faculty of Oral and Dental medicine

Ain shams University

بسم الله الرحمن الرحيم

" وعلمك ما لم تكن تعلم وكان فضل الله عليك عظيماً "

صدق الله العظيم

سورة النساء الآية 113

Dedication

*To my family; father, mother and sisters
for their inspiration for me to be the
best.*

*To my wife who supports me in every
step throughout our life.*

To my beloved son.

*To my supervisors who helped me to
succeed and supported me during my
study.*

Acknowledgments

*First and foremost to **ALLAH**, goes all my deepest gratitude and thanks for achieving any work in my life.*

This thesis would not have been possible without the guidance and the help of several individuals who in one way or another contributed and extended their valuable assistance in the preparation and completion of this work,

*I find that words are simply inadequate, they merely represent only a symbol of my deepest gratitude and appreciation to my brother & dear friend, **Dr. Ramy Heikal**, Lecturer of Oral and Maxillofacial Surgery, National Institute of Oncology, Cairo University. His generous help, support, kindness and humanity, not only in this work, but also in all aspects of my life will never cease to amaze me.*

*It gives me great pleasure to express my deepest thanks and profound respect to **Dr. Kareem El Tabarany**, Assistant lecturer of Oral Radiology, Faculty of Oral and Dental*

Medicine, Modern University for Technology and Information, for his meticulous scientific effort in this work,

*I would also like to pay tribute to **Dr. Ahmed Hazem** and **Dr. Abanoub Selim** Assistants Lecturer of Oral and Maxillofacial Surgery, Faculty of Oral and Dental Medicine, Future University in Egypt, for their scientific cooperation, great efforts and encouragement.*

*Last but not least I would like to express my gratitude to all my **Professors, colleagues and friends** in the Department of Oral and Maxillofacial Surgery, Faculty of Oral and Dental Medicine, Future University in Egypt, for being outstanding advisors and for their constant encouragement, support, and invaluable suggestions.*

List of Tables

Table		Page
1	Misch and Judy classification (Division A)	7
2	Misch and Judy classification (Division B)	8
3	Misch and Judy classification (Division C)	8
4	Minimum, maximum, mean & STD of crestal bone width.	62
5	Minimum, maximum, mean & STD of middle bone width.	64
6	Minimum, maximum, mean & STD of apical bone width.	66
7	Minimum, maximum, mean & STD of bone height.	68
8	Mean & STD of new crestal bone width.	70
9	Mean & STD of total ridge volume.	72
10	Mean & STD of graft volume.	73

List of Figures

Figure		Page
1	Seibert classification of ridge deformities.	4
2	Lekholm and Zarb classification.	5
3	Cawood and Howell classification.	6
4	(SmartBone®) composition.	17
5	Study models on articulator.	29
6	Bone caliper used to measure bone width of alveolar ridge at 3 levels (crestal, mid-way and apical).	30
7	Pre-operative CBCT evaluation.	31
8	General anesthesia, nasotracheal intubation and inhalational anesthesia.	32
9	Local anesthesia articaine 4% and adrenaline 1:100,000 administration for hemostasis.	32
10	Three incision line at recipient site.	33
11	Full thickness mucoperiosteal flap reflection.	33
12	Retro-molar incision to expose donor site.	34
13	Micro-saw and disc kit used to make cortical cuts.	35
14	Two vertical cuts at donor site.	36
15	Two horizontal cuts on superior and inferior border of the block graft.	36
16	Chisel and mallet to obtain the block graft.	37
17	Block graft after separation from donor site.	38
18	Splitting of the block graft.	38
19	Cortical shells after splitting.	39
20	Fenestration of the recipient site.	40
21	Fixation of cortical shell with micro screws.	41
22	Trimming of sharp edges.	41
23	Cortical shell after milling.	42
