INHIBIN: A NEW BIOLOGICAL MARKER IN OVARIAN CANCER

Essay

Submitted in Partial Fulfillment of Master Degree in
Clinical and Chemical Pathology

By

Eman Wasfy Wanees
M.B., B.Ch., Ain Shams University

Ain Shams University
2000

Acknowledgement

I would like to express my unlimited gratitude and deep appreciation to *Prof. Dr. Hany Sobhy Rufail*, Prof. of Clinical Pathology, Ain Shams University, for giving me the privilege of working under his supervision, and for his encouragement and eminent guidance and support.

My deepest thanks and sincere gratitude are due to *Dr. Ola Hamdy El-Demerdash*, Assist. Prof. of Clinical Pathology, Ain Shams University, for her gracious supervision and outstanding assistance in performing this work.

I would also like to thank *Dr. Mona Fathy Youssef*, Lecturer of Clinical Pathology, Ain Shams University, for her kind help and useful advices.

Lastly but not the least, I'm very thankful to my family for their great help and continuous encouragement.

Above all, thanks to *GOD* for termination of this work.

INTRODUCTION AND AIM OF WORK		1
REVIEW OF LITERATURE		
I. INHIBIN.....		3
A. Structure of Inhibin.....		3
B. Sources of Inhibin.....		9
C. Regulation of Inhibin.....		12
1- Regulation of Inhibin in Males.....		12
2- Regulation of Inhibin in Females:		13
a) During the menstrual cycle.....		15
b) During pregnancy.....		19
c) During lactation.....		20
D. Physiological Variations of Inhibin.....		21
1- At Puberty.....		21
2- In Adults:		21
a- In adult males.....		21
b- In adult females:		23
(i) During the menstrual cycle.....		23
(ii) During pregnancy.....		23
(iii) During lactation.....		24
(iv) During menopause and premenopause.....		25
3- In Old Age:		25
a- In old males.....		25
b- In old females.....		25
E. Methods of Assay of Inhibin.....		27
1- Bioassay:		27
a- In vitro bioassay.....		27
b- In vivo bioassay.....		28
2- Immunoassay:		28
a- Radioimmunoassay (RIA).....		28
b- Enzyme-linked immunosorbent assay (ELISA)		31

F. Reference Ranges of Inhibin.....	35
G. Clinical Significance and Possible Future Applications of Inhibin.....	36
1- Inhibin Levels During In Vitro Fertilization (IVF)	36
2- Inhibin in Abnormal Pregnancies.....	36
3- Inhibin as a Possible Endocrine Marker for Pre-eclampsia.....	37
4- Inhibin: A New Circulating Marker of Hydatidiform Mole.....	38
5- Inhibin as a Marker for Fetal Down's Syndrome	39
6- Inhibin and Male Fertility.....	40
7- Inhibin as a Tumor Marker.....	41
8- Inhibin as a Novel Hormonal Treatment for Prostatic Cancer.....	42
 II. OVARIAN CANCER.....	43
A- Epidemiology of Ovarian Cancer.....	43
B- Histological Types of Ovarian Cancer.....	46
C- Clinical Staging of Ovarian Cancer.....	57
D- Diagnosis of Ovarian Cancer.....	58
 III. INHIBIN in OVARIAN CANCER.....	63
A- Role of Inhibin in Diagnosis.....	63
B- Role of Inhibin in Staging and Prognosis.....	77
C- Role of Inhibin in Early Detection of Recurrence.....	80
D- Role of Inhibin in Monitoring Therapy.....	83
 SUMMARY	87
 REFERENCES	91
 ARABIC SUMMARY	

List of Abbreviations

Ab	: Antibody
ABP	: Androgen binding protein
AFP	: Alpha-fetoprotein
Ag	: Antigen
ALP	: Alkaline phosphatase
Alpha2M	: Alpha 2 macroglobulin
β -hCG	: β -subunit-human chorionic gonadotropin
CA-125	: Cancer antigen-125
CL	: Corpus luteum
EGF	: Epidermal growth factor
ELISA	: Enzyme-linked immunosorbent assay
FIGO	: The International Federation of Gynecology and Obstetrics
FSH	: Follicle stimulating hormone
FSP	: FSH-suppressing protein
GCT	: Granulosa cell tumor
GnRH	: Gonadotropin releasing hormone
HCG	: Human chorionic gonadotropin
IGF-1	: Insulin-like growth factor 1
IRMA	: Immunoradiometric assay
IVF	: In vitro fertilization
JGCT	: Juvenile granulosa cell tumor
Kd	: Kilodalton
LDH	: Lactate dehydrogenase
LH	: Luteinizing hormone
LHRH	: LH releasing hormone
MIS	: Müllerian inhibiting substance
PALP	: Placental alkaline phosphatase
PAP	: Prostatic acid phosphatase
PGs	: Prostaglandins
PI	: Prostatic inhibin
PIP	: Prostatic inhibin peptide
PSA	: Prostate specific antigen
RIA	: Radioimmunoassay
TGFs	: Transforming growth factors
TSH	: Thyroid stimulating hormone
WHO	: World Health Organization

1. The first part of the paper discusses the importance of the study of the history of the United States. It is argued that a knowledge of the past is essential for a full understanding of the present and for the development of a sound policy for the future. The author points out that the study of history is not only a means of satisfying a natural curiosity about the past, but also a means of developing a sense of responsibility for the future.

2. The second part of the paper discusses the importance of the study of the history of the United States. It is argued that a knowledge of the past is essential for a full understanding of the present and for the development of a sound policy for the future. The author points out that the study of history is not only a means of satisfying a natural curiosity about the past, but also a means of developing a sense of responsibility for the future.

3. The third part of the paper discusses the importance of the study of the history of the United States. It is argued that a knowledge of the past is essential for a full understanding of the present and for the development of a sound policy for the future. The author points out that the study of history is not only a means of satisfying a natural curiosity about the past, but also a means of developing a sense of responsibility for the future.
