**EVALUATION OF THE EFFECT OF A PLANT
ALKALOID (BERBERINE DERIVED FROM *BERBERIS*
ARISTATA) ON *T. VAGINALIS* IN VITRO**

By

GHADA ABDEL RAHMAN SAAD

M. B, B. Ch.

Demonstrator of Parasitology, Parasitology Department,
Faculty of Medicine, Ain Shams University

Thesis

*Submitted for the partial fulfillment
of*

Master degree of Parasitology

Supervised by

PROF. DR. SALWA AHMED SOFFAR

Professor of Parasitology, Parasitology Department, Faculty of
Medicine, Ain Shams University.

DR. DOREYA MOHSEN MAHMOUD

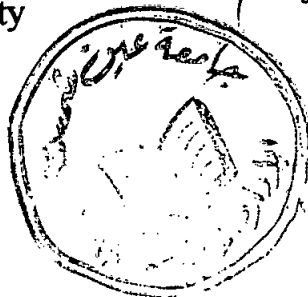

Assistant Prof. of Parasitology, Parasitology Department,
Faculty of Medicine, Ain Shams University.

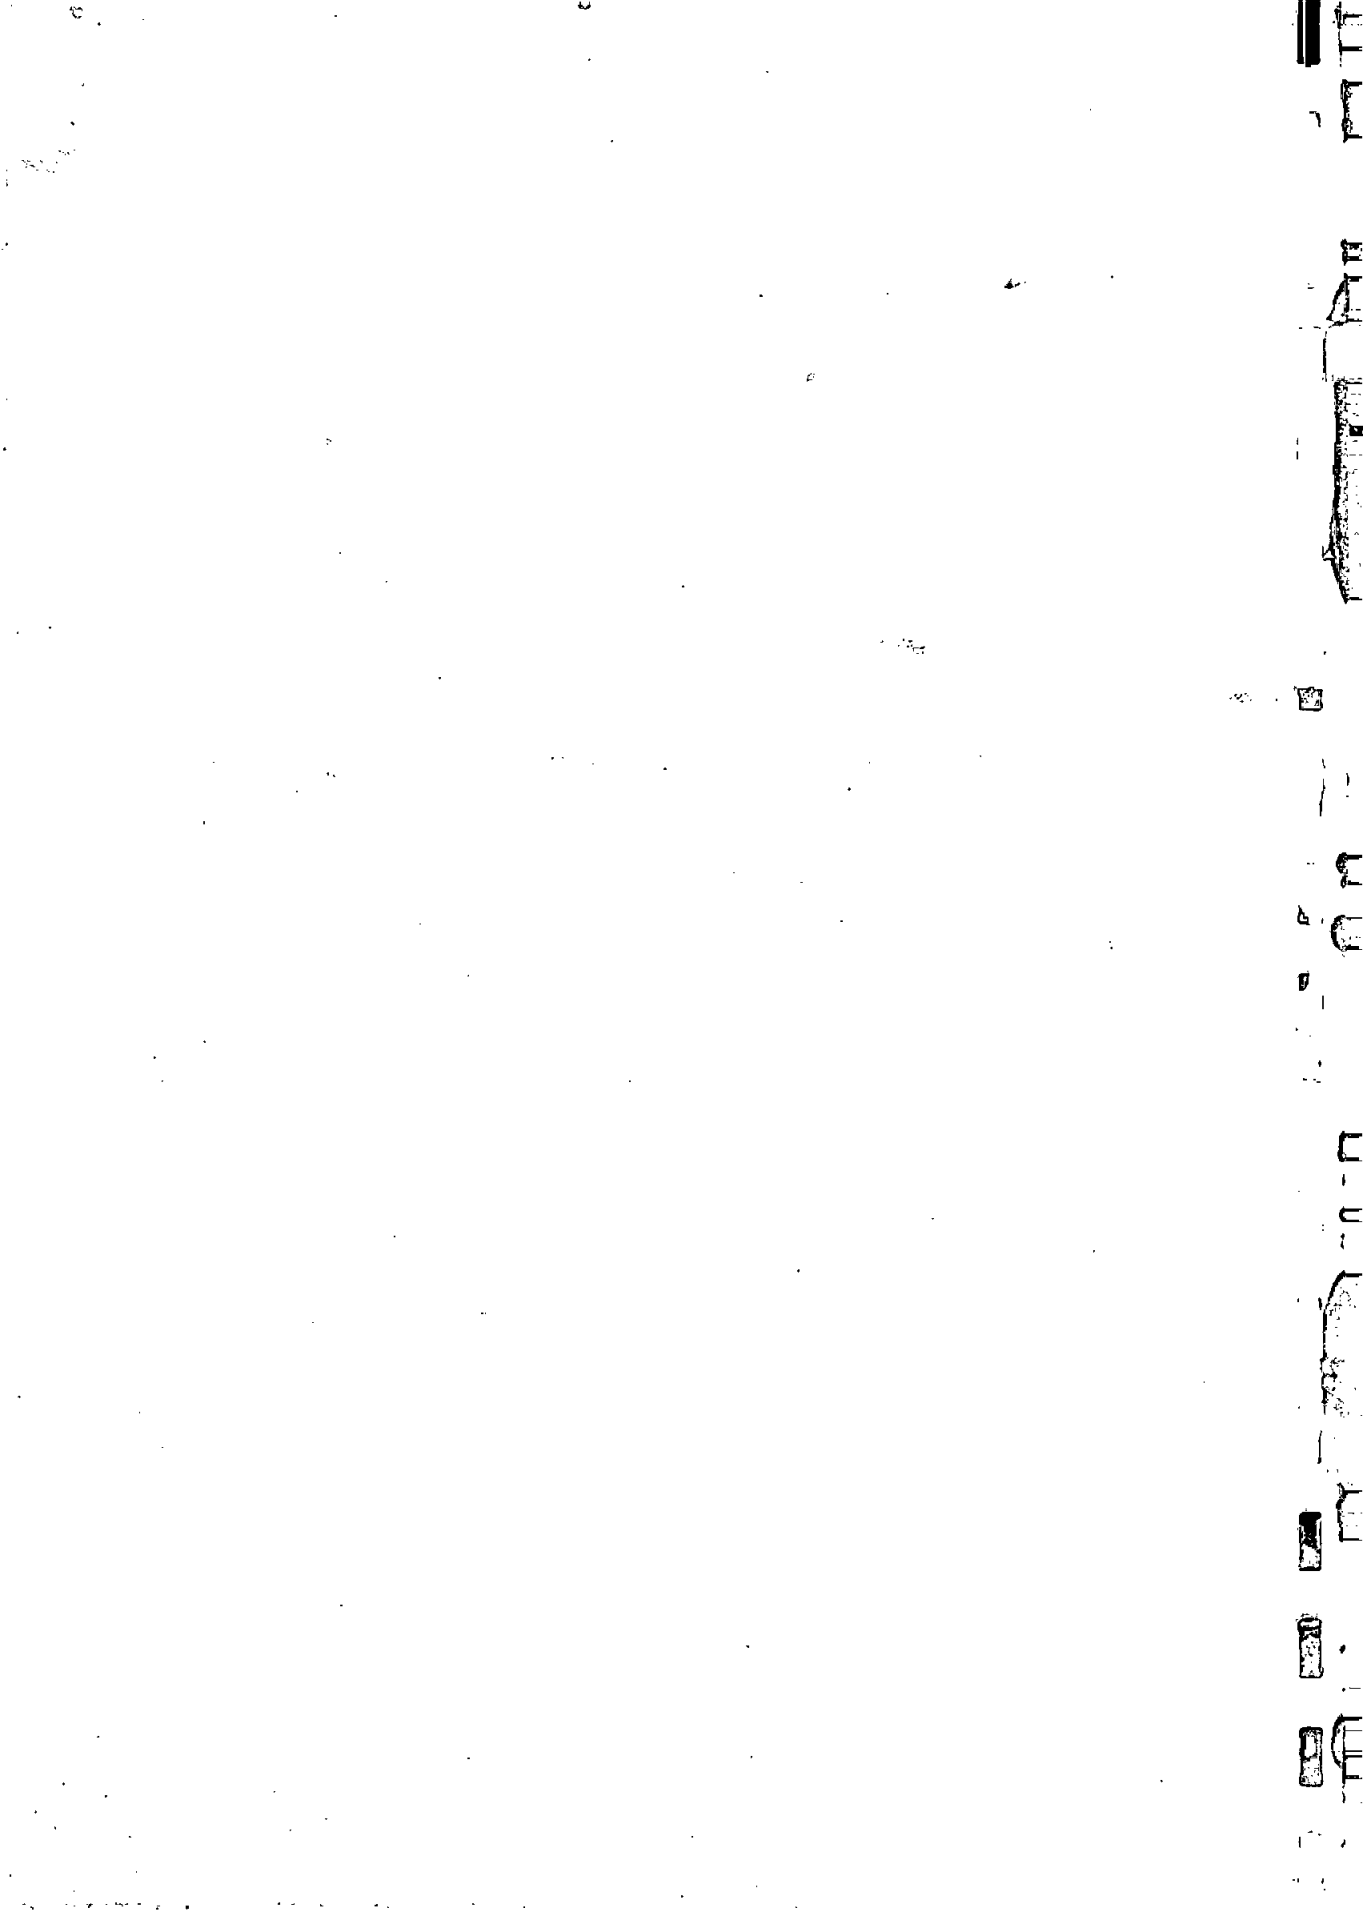

DR. SAHAR SAFWAT ABDEL AZIZ

Lecturer of Parasitology, Parasitology Department, Faculty of
Medicine, Ain Shams University.

Faculty of Medicine
Parasitology Department
Ain Shams University

2000

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

Acknowledgement

I would like to express my supreme gratitude and appreciation to Prof. Dr. Salwa Ahmed Soffar, Professor of Parasitology, Faculty of Medicine, Ain Shams University for the enormous effort she did in supervising this thesis, besides her precious help, constant guidance and sincere encouragement.

My special thanks and appreciation to Dr. Doreya Mohsen Mohamoud, assistant Prof. of Parasitology, Faculty of Medicine, Ain Shams University, for her guidance, assistance, generous cooperation, and meticulous supervision on every part of this thesis.

I would like to express my deepest thanks to Dr. Sahar Safwat Abdel Aziz, Lecturer of Parasitology, Faculty of Medicine, Ain Shams University, for her enormous effort, indispensable assistance, and sincere help for revision and fulfillment of this work.

I am deeply grateful to Prof. Dr. Magda El-Sayed Azab, Professor and Head of Parasitology Department, Faculty of Medicine, Ain Shams University for her assistance and precious help in providing the samples needed for this work.

Special words of thanks go to Dr. Hala Salah Ismial El-Wakil, Lecturer of Parasitology, Faculty of Medicine, Ain Shams University, who gave me free use of the materials

needed for this work, and for her assistance during culture maintenance .

Last but not least, I would like to thank all members of the Parasitology Department, Faculty of Medicine, Ain Shams University for their kind help.

List of Tables and Figures

Table (1) :	Antigens of <i>T. vaginalis</i> and their characteristics. _ _ _	18
Table (2) :	Differential diagnosis of vaginal discharge. _ _ _	20
Table (3) :	The mean count of <i>T. vaginalis</i> organisms in tubes of culture media after exposure to various concentrations of BS in comparison to control tubes on 3 successive days. _ _ _ _	99
Table (4) :	The mean count of <i>T. vaginalis</i> organisms previously exposed to various concentrations of BS upon reculture in drug free culture tubes in comparison with control tubes. _ _ _ _	100
Table (5) :	The mean count of <i>T. vaginalis</i> organisms in tubes of culture media after exposure to various concentrations of metronidazole in comparison to control tubes on 3 successive days. _ _ _ _	101
Table (6) :	The mean count of <i>T. vaginalis</i> organisms previously exposed to various concentrations of metronidazole upon reculture in drug free culture tubes in comparison with control tubes. _ _ _	102
Table (7) :	The mean count of <i>T. vaginalis</i> organisms in tubes of culture media after exposure to various concentrations of BS in comparison to mean count of organisms in tubes exposed to various concentrations of metronidazole. _ _ _ _	103

Table (8) :	Percentage of motility and viability of <i>T. vaginalis</i> on exposure to different concentrations of BS in comparison to control tubes on 3 successive days. — — — — —	105
Table (9) :	Percentage of motility & viability of <i>T. vaginalis</i> on exposure to different concentrations of metronidazole in comparison to control tubes on 3 successive days. — — — — —	107
Fig., (1) :	Structure of <i>T. vaginalis</i> . — — — — —	8
Fig., (2) :	Chemical structure of Metronidazole. — — — — —	34
Fig., (3) :	Chemical structure of berberine sulphate. — — — — —	41
Fig., (4) :	Curve illustrating relationship between various concentrations of BS and count of <i>T. vaginalis</i> in culture. — — — — —	108
Fig., (5) :	Curve illustrating relationship between various concentrations of metronidazole and count of <i>T. vaginalis</i> in culture. — — — — —	109
Fig., (6) :	Curve illustrating relationship between various concentrations of BS and percentage of motility of <i>T. vaginalis</i> . — — — — —	110
Fig., (7) :	Curve illustrating relationship between various concentrations of BS and percentage of viability of <i>T. vaginalis</i> . — — — — —	111
