THE EXOCRINE PANCREATIC FUNCTION

**Submitted in Partial Fulfillment of the
Master Degree in Clinical Pathology**

66149

16.0756

E. F

Prof. Dr. Nasser Sadek Rezk,

pennerli

Lecturer of Clinical Pathology

2000

ACKNOWLEDGMENT

*It is a great pleasure to express my deepest appreciation and gratitude to **Prof. Dr. Nasser Sadek Rezk**, Professor of Clinical Pathology, Faculty of Medicine, Ain Shams University for his generous advice, continuous encouragement, faithful guidance and keen supervision which made completion of this work possible.*

*I would like to express my sincere appreciation to **Dr. Ghada Mohamed Sadek Sabbour**, Lecturer of Clinical Pathology, Faculty of Medicine, Ain Shams University for her valuable assistance, continuous advice and meticulous supervision. Her valuable advice and effort are unforgettable.*

*Special thanks and appreciation for **Dr. Eman Abd El-Moniam Al-Gawhary**, Lecturer of Clinical Pathology, Faculty of Medicine, Ain Shams University, for her kind advice, great support and valuable suggestions, she offered me a lot of her time and effort throughout the whole work.*

CONTENTS

Title	Page
• Introduction and Aim of The Work	1
• Review of Literature	3-73
I. Structure and Physiology of The Pancreas	3
II. The Exocrine Function of The Pancreas	5
III. Causes of Exocrine Pancreatic Dysfunction	8
IV. Cystic Fibrosis:	14
A) Genetics	15
B) Pathophysiology	17
C) Organ Involvement	19
D) Clinical Picture	23
E) Diagnosis	31
1. Laboratory	32
a) Sweat test	32
b) Pancreatic function tests	35
i) <i>Invasive</i>	36
ii) <i>Non invasive</i>	40
c) Neonatal screening	47
d) Prenatal diagnosis	48
2. Radiological	49
V. Pancreatic Elastase:	51
A) Types	51
B) Chemical Structure	51
C) Biosynthesis	54
D) Characters	55
E) Physiological Role	57
F) Pathological Role	58

G) Serum Elastase-1 Assay	59
H) Fecal Elastase-1 Assay	62
- Role of Fecal Elastase-1 in Diagnosis of Chronic Pancreatitis	63
- Role Fecal Elastase-1 in Diagnosis of Cystic Fibrosis	65
I) Methods of Assay	69
• Summary	75
• Conclusion	78
• References	79
• Arabic Summary.	

LIST OF ABBREVIATIONS

ABTS	: 2, 21-Azino-bis (3-ethylbenzathiozoline-6-sulphonic acid) diamonium salt.
Ac (Ala) ₃ OMe	: N-acetyl-L-alanyl-L-alanyl-L-alanine methyl ester.
AcTyrOEt	: N-acetyl-L-tyrosine ethyl ester.
BzTyrOEt	: N-benzoyl-L-arginine ethyl ester.
CFTR	: Cystic fibrosis transmembrane regulator.
CKK	: Cholecystokinin.
DIOS	: Distal intestinal obstruction syndrome.
NBT-PABA	: N-benzoyl-L-tyrosyl-P-aminobenzoic acid.
PBS	: Phosphate buffer saline.
PI	: Pancreatic insufficiency.
PS	: Pancreatic sufficiency.
RBB elastin	: Ramezol brilliant blue stained elastin.
RBB hide elastin	: Ramezol brilliant blue stained hide elastin.

LIST OF TABLES

Table No.	Title	Page
1	The chemical composition of the pancreatic juice	5
2	Exocrine pancreatic enzymes and their corresponding substrates	6
3	Hereditary and acquired causes of pancreatic dysfunction in childhood as well as their approximate frequencies	9
4	Incidence of cystic fibrosis in live newborns	15
5	Indications for performing sweat chloride assay	33
6	Relative proteolytic activity of human and porcine pancreatic elastase	56
7	The diagnostic value of serum elastase-1, amylase and pancreatic isoamylase in acute pancreatitis	60
