

**THE EFFECT OF FINISHING TOOLS
AND FINISHING TIME ON SURFACE
ROUGHNESS OF BULK FILL
COMPOSITE**

**Thesis submitted to the Operative dentistry
Department, faculty of dentistry , Ain Shams University
, in partial fulfillment of the requirements of Master
degree in Operative Dentistry**

By

Fatma Othman Ali Alfeitouri

B.D.S., (2001)

Benghazi University(Libya)

Faculty of Dentistry

Ain Shams University

2019

supervisors

Dr .Moktar Nagy Ibrahim
Professor of Operative Dentistry
Faculty of Dentistry
Ain Shams University

Dr. Omaima Hassan Ahmed Ghallab
Professor and Head of Operative Dentistry Department
Faculty of Dentistry
Ain Shams University

Dr.Mohammed Salah
Assistant Professor of Biomaterial
Faculty of Dentistry
Ain Shams University

بسم الله الرحمن الرحيم

((وعلمك ما لم تكن تعلم وكان فضل الله

عليك عظيما))

صدق الله العظيم

سورة النساء آية (١١٣)

Acknowledgment

First of all, I thank **Allah** for his great support in accomplishing this work .

All my gratitude to my professor, advisor ,role-model; **Professor Dr. Mokhtar Nagy**. You had always been and always will be an example to follow. I will try to follow your lead. May God rest your kind soul.

I would like to express my sincere thanks and deep gratitude to Dr. **Omaima Hassan Ghallab**. Professor and Head of Operative Dentistry department . Faculty of Dentistry .Ain Shams University, who helped me immensely and for her unending support and moral courage on daily basis.

I would also like to express my deepest thanks and appreciation to Dr. **Mohammed Salah** Assistant Professor of Biomaterial .Faculty of Dentistry .Ain Shams University

Finally ,thanks to all staff members of Operative dentistry department, Faculty of dentistry ,Ain Shams University.

Dedication

To my mother ,my family and my children for their love and support.

Arabic Summary.....

List of Tables

Table number	Title	PageNo
1	Material, description, composition, shade, manufacturer and lot number	29
2	Finishing systems, description, composition, manufacturer and lot number	30
3	The Levels of The study	34
4	Interaction between the variables of study	34
5	Two -way ANOVA for the effect of finishing techniques, finishing time and interaction between them	42
6	One-way between-groups analysis of variance (ANOVA) for the effect of different finishing and polishing techniques on surface roughness of bulk fill resin composite	45
7	Independent sample t-test for the effect of finishing time on surface roughness of bulk fill resin composite	47
8	summary table	48

List of figures

Figure No.	Title	Page No.
1	Bulk fill resin composite (X-tra fil) Voco)	29
2	Diamond abrasive , superfine, (okodent)	31
3	Carbide finishing bur	31
4	Jiffy abrasive, silicone -impregnated rubber polishers	31
5	Stem polishing discs	32
6	Specimen grouping for surface roughness evaluation	33
7	The specially constructed split Teflon mold	36
8	Bulk fill resin Composite was placed in the mold	36
9	The under surface of the specimens marked using a permanent marker	38
10	Specimens placed on solid metal cylinder that was fixed by double sided adhesive tape on digital balance to standardized the pressure during finishing	39
11	Profilometer	39
12	Environmental Scanning electron microscope	40
13	Placement of specimens in Environmental Environmental scanning electron microscope	40
14	Bar chart for the effect of finishing techniques on surface roughness of bulk fill resin composite	46

List of figures

Figure No.	Title	Page No.
15	Bar chart for the effect of finishing time on surface roughness of bulk fill resin composite	48
16	SEM photo micrographs of x-trafill surface control(groups) (500×) : (a)immediate,(b)delay (after 24hours)	49
17	SEM photomicrographs of x-trafill surface after finishing with Extra fine diamond+ Jiffy rubber polishers(500×) (a)immediate(b)after24hours	49
18	SEM photomicrographs of x-trafill surface after finishing with carbide +Jiffy rubber polishers(500×) (a)immediate (b)after 24 hours.	50
19	SEM photomicrographs of the surface of x-trafill after finishing with diamond +stem polishing discs(500×), a)immediate and b) after 24 hours	50
20	SEM photomicrographs of the surface of x-trafill after finishing with carbide+ stem polishing discs(500×)a- immediate. b-after 24 hours .	51
