**COMPARATIVE STUDY BETWEEN C.T. SCANNING,
M.R.I AND ECHOGRAPHY IN DIAGNOSIS OF ORBITAL
DISEASES**

THESIS

*SUBMITTED FOR PARTIAL FULLFILLMENT
OF THE REQUIRMENT FOR MD DEGREE IN OPHTHALMOLOGY*

BY

HESHAM M. F. EL MAZAR, MB, Bch, Msc.
ASSISSTANT LECTURER OF OPHTHALMOLOGY
MENOUFIYA UNIVERSITY

SUPERVISED BY

PROF. DR. IAN T. JACKSON
PROF. AND DIRECTOR OF INSTIUTE FOR CRANIOFACIAL AND
RECONSTRUCTIVE SURGERY, SOUTHFIELD, MI, USA.

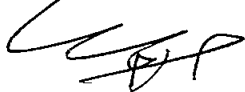

PROF. DR. SAID AHMED GOMAA
PROFESSOR OF OPHTHALMOLOGY
ALEXANDRIA UNIVERSITY

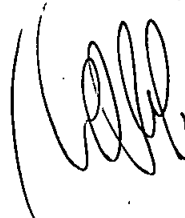

PROF. DR. SABER HAMED ELSAYED
PROFESSOR OF OPHTHALMOLOGY
HEAD OF OPHTHALMOLOGY DEPT
MENOUFIYA UNIVERSITY

PROF. DR. HASSAN G. FARAHAT
ASSIS. PROF. OF OPHTHALMOLOGY
MENOUFIYA UNIVERSITY

PROF. DR. MOUSTAFA K. NASSAR
ASSIS. PROF. OF OPHTHALMOLOGY
MENOUFIYA UNIVERSITY

2002

B 15120

Acknowledgment

I am deeply thankful to *Allah* by the grace of home this work was possible.

I would like to express my deepest gratitude and appreciation to *Prof. Dr. Ian T. Jackson* Prof. and Director of Institute for Craniofacial and Reconstructive Surgery, Southfield, MI, USA For giving me the privilege of working under his supervision, his precise advice and unlimited support that have honored this work.

I wish to express my deep appreciation and gratitude to *Prof. Dr. Said Ahmed Gomaa* Prof. of ophthalmology, Alexandria University for his sincere help and great effort, which made it possible for this thesis to be completed.

I would like to express my deep appreciation and gratitude to Prof. *Dr. Saber Hamed ElSayed*. Prof. and Head of Ophthalmology Dept., Menoufiya University for his encouragement and support through out the work in this thesis.

I would like also to extent my gratitude and appreciation to *Prof. Dr. Hassan G. Farahat* Assist. Prof. of Ophthalmology, Menoufiya University for his sincere help and great effort, which made it possible for this thesis to be completed

I am much obliged and grateful to *Prof. Dr. Moustafa K. Nassar* Assist. Prof. of Ophthalmology, Menoufiya University for his sincere help and great effort, which made it possible for this thesis to be completed

Finally, I would like to thank *Prof. Dr. Frank Nesi* Prof. of Ophthalmology, Wayne State University and Director of Ophthalmic Plastic and Reconstructive Surgery, William Beaumont Hospital, Royal Oak, MI, USA for his great help and support

Hesham El Mazar, MB, Bch, Msc

Introduction	1
Aim of the work	2
Anatomy of the orbit	3
Orbital Imaging	22
Orbital lesions	69
Orbital Surgery	124
Patients and Methods	130
Results	138
Discussion	222
Summary	238
Conclusion	240
References	241
Arabic Summary	263

List of Figures

Figure No. And Description	Page No.
Figure 1. Transview of globe and optic nerve demonstrating major orbital dimensions and relationships	3
Figure 2. Direct lateral and anteroposterior view of the bony orbit,	4
Figure 3. Tenon's capsule and anterior orbital structures and septa	12
Figure 4. Direct lateral view of the extra ocular muscles	14
Figure 5. Lateral view with excision of lateral rectus to demonstrate arteries of the orbit	16
Figure 6. Superior view of the venous system in the orbit	17
Figure 7. Lateral view of the orbit	20
Figure 8. Transview of the major sinus structures	21
Figure 9. Diagram of Ultrasound transducer	23
Figure 10. Physical characteristics of sound waves in diagnostic echography	24
Figure 11. Orbital echographic examination techniques	28
Figure 12. B-scan of the normal orbit in axial orientation	29
Figure 13. A-scan image of normal orbit	30
Figure 14. Physical principles of Computed tomography.	32
Figure 15. Relative position of the head and the direction of the X-ray beam for direct coronal scanning of the orbit	34
Figure 16. Axial computed tomography of the mid orbit, the globe and optic nerve.	41
Figure 17. Coronal Ct scans at level of midface and orbits	43
Figure 18. Spinning proton nuclei	45
Figure 19. Orientation of spinning nuclei	47
Figure 20. Radiofrequency signal.	49
Figure 21. Axial MRI scans through the mid orbit	54
Figure 22. Coronal MRI scans through the anterior portion of the orbit	57
Figure 23. Echographic classification of orbital tumors	70
Figure 24. Orbital location of various common tumors as seen on CT	71
Figure 25. Anterior orbitotomy	125
Figure 26. Transconjunctival medial orbitotomy	125
Figure 27. Lateral orbitotomy	126
Figure 28. Limited trans cranial orbitectomy	126
Figure 29. Repair of orbital floor fracture	127
Figure 30. Enucleation	128
Figure 31. Evisceration	128
Figure 32. Orbital exenteration	129
Figure 33. Orbital decompression	129
