**CAIRO UNIVERSITY
INSTITUTE OF AFRICAN RESEARCH & STUDIES
DEPARTMENT OF NATURAL RESOURCES**

**SOME FACTORS AFFECTING PARASITES ON
POTENTIAL OF SOME TRICHOGRAMMA
PARASITOID SPECIES UNDER MASS
REARING CONDITIONS IN
EGYPT AND TUNISIA**

THESIS

**Submitted for the obtainment of Master of African Studies in
Natural Resources
(Animal Resources)**

By

SAAD ABDEL-KHALEK EBRAHIEM MOHAMED GAFFAR

B.Sc. Agric., Cairo Univ., 1996

Diploma in Natural Resources, 1999

Under The Supervision of

Prof. Dr. Wafai Z. Mikhail
Professor of Animal Resources,
Department of Natural Resources

Prof. Dr. Mahmoud E. El-Nagar
Vice-President, Agriculture
Research Center

2006

B

14101

APPROVAL SHEET

Title of Thesis: **SOME FACTORS AFFECTING PARASITES ON
POTENTIAL OF SOME TRICHOGRAMMA
PARASITOID SPECIES UNDER MASS REARING
CONDITIONS IN EGYPT AND TUNISIA**

Degree of M. Sc.: **Natural Resources (Animal Resources)**

Name of Student: **Saad Abdel-Khalek Ebrahiem Mohamed Gaffar**

This thesis for the M. Sc. degree has been approved by:

Prof. Dr. Zidan Hindy Abd El-Hamid Zidan Zidan ^{2.4}

Professor of pesticides chemistry and Toxicology, Faculty of
Agriculture, Ain-Shams University

Prof. Dr. Mahmoud E. El-Nagar Mahmoud El-Nagar

Vice-President, Agriculture Research Center

Dr. Ashraf Abd El-Salam Hendy Mangoud Ashraf Hendy
Senior Researcher, Plant Protection Research Institute,
Agricultural Research Centre.

Prof. Dr. Wafai Z. A. Mikhail Wafai
Professor of Animal Resources, Department of Natural
Resources

Committee in Charge

Date: /11/2006

ACKNOWLEDGEMENTS

ACKNOWLEDGEMENT

Firstly ultimate thanks to **God**.

The writer wishes to express his deep thanks to **Prof. Dr. Wafai Z. Mikhail**, Professor of Animal Resources, Department of Natural Resources, for suggesting the research work, kind supervision, his faithful encouragement, valuable advice and help during this study.

I am particularly grateful to **Prof. Dr. Mahmoud E. El-Nagar**, Vice-President, Agriculture Research Center, for his supervision and guidance during the progress of this study.

I am deep thanks due to **Prof. Dr. Mahmoud F. Tawfik**, Professor of Biological Control, Department of Plant Protection, Cairo University "Head of Center of Biological Control" for his faithful encouragement, valuable advice and help during this study.

Thanks are due to **Dr. Janean Pizzol**, INRA Antibes, and France for learning fundamental of parasitoids.

Special thanks are due to **my family** for their encouragement, patience and moral support.

Thanks are due to the **team work in Central Laboratory for Mass production of Trichogramma at El-Fayoum governorate**.

CONTENTS

	Page
I. INTRODUCTION.....	1
II. REVIEW OF LITERATURE.....	3
1. Egg laying and collection system.....	3
2. Economic importance and taxonomic status.....	12
2.1. Economic importance.....	12
2.2. Taxonomic status.....	13
3. Mass production of factitious hosts.....	17
3.1. Mass rearing of the laboratory hosts, <i>Sitotroga cerealella</i> Oliv. and <i>Ephestia kuehniella</i> Zeller.....	17
4. Mass production of <i>Trichogramma</i>	23
4.1. Effect of insect hosts.....	23
4.2. Effect of temperature.....	32
4.3 Effect of UV radiation on host eggs.....	47
III. MATERIAL AND METHODS.....	50
1. Mass rearing of <i>Ephestia kuehniella</i> Zeller.....	50
2. Mass rearing of <i>Sitotroga cerealella</i> (Oliver).....	53
3. Mass rearing of <i>Trichogramma</i>	60
3.1. Comparison between the daily productions of prey eggs of mechanical cardboard and the manual cardboard.....	61
3.2. Effect of temperature and hosts.....	61

3.3. Effect of UV radiation on eggs of <i>Sitotroga cerealella</i>	65
3.4. Effect of host of mass rearing and host fecundity for two generations.....	67
IV. RESULTS AND DISCUSSION.....	69
1. Development new modified machine for egg laying and collection for the mass production.....	69
2. Effect of temperature and host on some biological aspects of <i>Trichogramma brassicae</i> and <i>T. evanescens</i>	85
2.1. <i>Trichogramma brassicae</i>	85
2.2. <i>Trichogramma evanescens</i>	90
3. Comparison between the effect of temperature and host on some biological aspects of <i>T. brassicae</i> and <i>T. evanescens</i>	92
4. Effect of host of mass rearing and host fecundity on the fecundity for two generations of <i>Trichogramma</i> species at 25°C.....	95
4.1. <i>Trichogramma brassicae</i>	95
4.2. <i>Trichogramma evanescens</i>	99
5. Comparison between the effect of different hosts of mass rearing and host fecundity on the fecundity for two generations <i>T. brassicae</i> and <i>T.</i>	106
