Self- Learning Package Related to
Patient Safety Goals and its effect on
Nurse Interns' Performance and
Awareness
of Patient Safety Culture

Thesis

*Submitted for Partial Fulfillment of the Requirements of
the Doctorate Degree in Nursing Sciences
(Nursing Administration)*

Under Supervision of
Prof. Dr. Mona Mostafa Shazly

***Professor and Head of Nursing Administration Department
Faculty of Nursing - Ain Shams University***

Prof. Dr. Samah Faisal Fakhry

*Professor of Nursing Administration
Faculty of Nursing, Ain Shams University*

Dr. Nema Fathy Saad

*Assist. Professor of Nursing Administration
Faculty of Nursing - Ain Shams University*

Faculty of Nursing

Ain Shams University

2018

Acknowledgment

My thanks are submitted first to Allah, who gave me the strength and ability to achieve this work.

I do express my profound respect and thanks to Prof. Dr.

Mona Mostafa Shazly, Professor and Head of Nursing Administration Department, Faculty of Nursing, Ain Shams University for her help, constant support, constructive criticism, and valuable supervision during the course of this work.

My deep appreciation and gratitude are addressed to Prof.

Dr. Samah Faisal Fakhry, Professor of Nursing Administration, Faculty of Nursing, Ain Shams University for her guidance, supervision, and generous advice, which were essential for completing this work.

My thanks are also extended to Dr. Nema Fathy

Saad, Assist. Professor of Nursing Administration, Faculty of Nursing, Ain Shams University for her guidance, supervision, and generous advice, which helped in achieving this work.

A special acknowledgment is due to all the nurse interns who participated in this work for their cooperation and help.

✉ *Laila Ahmed Abdel Hamid*

List of Tables

Table	Title	Page
	Tables of Subjects and Methods	
I	The study subjects distribution	59
II	The 12 dimensions of patient safety culture with 42 items	61
III	The five (IPSGs) procedures with 83 items	63
IV	Reliability	66
	Tables of Results	
1	Demographic characteristics of nurse interns in the study sample (n=110)	74
2	Nurse interns' knowledge related to patient safety, International patient safety goals (IPSGs) and patient safety culture throughout the study phases.	76
3	Nurse interns' awareness of patient safety culture throughout the study phases.	79
4	Overall view of patient safety among nurse interns throughout the study phases	82
5	Overall comments regarding patient safety among nurse interns before the intervention (n=110)	83
6	Nurse interns' performance of IPSG I (accuracy of patient identification when giving medication) throughout study phases	84
7	Nurse interns' performance of IPSG I (accuracy of patient identification when giving blood or blood products) throughout study phases	85
8	Nurse interns' performance of IPSG I (accuracy of patient identification when taking blood and other specimens) throughout study phases	88
9	Nurse interns' performance of IPSG II (improving the effectiveness of	90
