Head of Chemistry Department Faculty of Science – Ain Shams University

Firstly my great thanks in the beginning and the last to Allah the most merciful by the grace of whom, this work came to the light.

I would like to express my gratitude to my supervisor, **Prof. Dr.**Mostafa M. H. Khalil, Professor of Inorganic and Analytical Chemistry,
Faculty of Science, Ain Shams University, for giving me the opportunity to
work in this field and for giving me the chance to be one of his students. His
guidance helped me in all the time of research and writing of this thesis. I
could not have imagined having a better advisor and mentor for my Doctor of
Philosophy of Science study. He did not only guide this work and find time to
discuss it with me but also gave me the confidence to express my ideas freely.
His leadership, support, attention to details, hard work have set an example I
hope to match some day. Actually he was more than a supervisor, he was a
teacher who inspired me and pushed me forward.

Words are not enough to describe my deep thanks to **Pof. Dr. Heba Ibrahim Abd El-Moaty,** Professor of Medicinal and Aromatic Plants
Department, Desert Research Center, for suggesting the program of this
work, her guidance and supervision in the course of the work, and for her
stimulating criticisms and help in the preparation of the thesis

I would like to express my deep thanks and gratitude to **Dr. Eman H. Ismail** Professor of Inorganic, Faculty of Science, Ain Shams, for her invaluable help and support throughout the course of this work.

I would like to express my deep thanks and gratitude to **Dr Dina Yehia Sabry**, Associate Professor of Inorganic Chemistry, Faculty of Science, Ain Shams University for her invaluable help and support throughout the course of this work.

I would also like to thank my Colleagues in the Chemistry Department, Faculty of Science, Ain Shams University for their help.

Finally, I want to express my sincere and great thanks to my Familly, especially my parents for their continuous support, spiritual help and patience all over my life and my brothers, wife of my elder brother for their encouragement and support during my work.

Abstract	X
SUMMARY.	xi
Chapter I: Introduction	
1.1 Introduction.	1
1.2 A brief history of nanoparticles.	5
1.3 Classification of nanoparticles Properties of nanoparticles.	8
1.3.1 Classification of nanoparticles according to composition	8
2 Classification of Nanomaterials according to dimension 7.1.	9
.3 Classification of Nanomaterials according to Morphology 7.	11
1.4 Properties of nanoparticles	11
1.4.1.Nanoparticles and surface effects	12
1.4.2 Size effects	13
1.4.3 Origin of surface plasmon resonance in noble metal	14
nanoparticles.	
1.5 Metallic nanoparticles	19
1.5.1Silver anoparticles.	19
1.5.2 Gold nanoparticles	20
1.6 General synthetic routes of metallic nanoparticles	22
1.7 Methods for synthesize of metallic nanoparticles	23
1.7.1Chemical Methods of preparation	25
1.7.2 Physical methods	29
1.7.3Biological Synthesis of Metal Nanoparticles via Plants	30
1.8 Synthesis of silver and gold nanoparticles using plant extracts.	32
1.9 Phytochemicals having antioxidant activity.	41
1.10 The plants in theis study	45
1.9.1 Ephorbia dendroides antioxidant.	45
1.10.2. Moricandia nitens antioxidant.	46
1.10.3 Pituranthos tortuosus antioxidant.	47

AIM OF THE Work	50
CHAPTER II: MATERIALS AND METHODS	51
2.1 Material.	51
2.2 Analytical instruments.	51
2.2.1 UV–visible spectral analysis.	52
2.2.2 Transmission electron microscopy (TEM)	52
2.2.3 X-Ray Diffraction	52
2.2.4 Fourier transform infrared spectroscopy.	52
2.2.5 Thermogravimetric analysis	53
2.2.6 Dynamic Light Scattering (DLS).	53
2.3 Preparation of water extract	53
2.4 Preparation of 70% ethanol extract	54
2.5 Preparation of chloroform extract.	54
2.6 Synthesis of gold nanoparticles.	55
2.7 Anti-diabetic potential Evolution.	55
2.8 Helicobacter pylori activity assay.	56
2.9 Cytotoxicity assay	57
2.10.Phytochemical Studies.	58
2.10.1.1 Steam distillation for volatile oils	58
2.10.1.2 Test for glycosides and/or carbohydrates (Molish's test)	58
2.10.1.3 Test for saponins.	59
2.10.1.4 Preparation of water extract for further screening.	59
2.10.1.5 Test for alkaloids.	59
2. 10.2.1 Investigation of Flavonoids	60
CHAPTER III Synthesis of gold nanoparticles using Euphorbia	69
dendroides extracts.	
3. 1 Synthesis of gold and silver nanoparticles using Euphorbia	69
dendroides water extract.	
3.1.1The phytochemical screening	70
3.1.2 UV–visible spectroscopy, TEM Studies.	71
3.1.2.1 Effect of concentration of Euphorbia dendroides aerial parts	71
extract	
3.1.2.2 Effect of contact time.	77
3.1.2.3 Effect of temperature	79
3.1.2.4 Effect of pH	82
3.1.5 Fluorescence spectra of AuNPs.	87
3.1.6 X-Ray diffraction study.	88
3.1.7 Fourier transforms infrared spectroscopy (FTIR):.	91
