

Quality Control of Olive Leaf Extract and Discrimination between Different Cultivars Cultivated in Egypt Using Multivariate Data Analysis

A thesis submitted to

Faculty of Pharmacy, Ain Shams University

In Partial Fulfilment of the Requirements for the Degree of

Master in Pharmaceutical Sciences (Pharmacognosy)

By

Eman Mahmoud Ibrahim Kabbash

Bachelor Degree of Pharmaceutical Science (2012)

Faculty of Pharmacy, Ain Shams University

Under the supervision of

Sherweit Hamed El Ahmady, Ph.D.

Professor of Pharmacognosy

Faculty of Pharmacy, Ain Shams University

Zeinab Talat Abd El Shakour, Ph.D.

Associate Professor of Pharmacognosy

National Organization for Drug Control and Research

Iriny Mohsen Mansour Ayoub, Ph.D.

Lecturer of Pharmacognosy

Faculty of Pharmacy, Ain Shams University

Department of Pharmacognosy

Faculty of Pharmacy, Ain Shams University

Cairo, Egypt

(2019)

Acknowledgments

In the beginning, I would like to thank Allah; without His virtue, I would have never been able to accomplish this work. Thanks Allah for giving me knowledge that I pray I could get a chance to pass on to others.

I would like to express my gratitude to my supervisors: **Prof. Sherweit El-Ahmady**, Professor of Pharmacognosy, Faculty of Pharmacy, Ain Shams University, for the encouragement, the help and being the reason to love Phytochemistry, since I was a college student. **Assoc. Prof. Dr. Zeinab Talat**, Associate Professor of Pharmacognosy, National Organization for Drug Control and Research, for her continuous encouragement, unlimited help and scientific support throughout this work especially in the LC/MS data analysis part. **Dr. Iriny Ayoub**, Lecturer of Pharmacognosy, Faculty of Pharmacy, Ain Shams University, for her great effort and patience for supervising this work. No words can express how thankful I am to all of you.

Members, colleagues and professors of the Department of Pharmacognosy, Ain Shams University. **Dr. Haidy Gad** for her help with the chemometrics work and support. My deep thanks to **Dr. Abdul-Rahman Roshan**; who never held back any information, especially in the multivariate data analysis part.

Members, colleagues and professors at the National Organization for Drug Control and Research. My indefinite thanks to **Dr. Amal Koura**; Former Head of Phytochemistry Laboratory at (NODCAR), for her continuous encouragement and great support.

Greatest thankful are also due to **Prof. Michael Wink**, Professor of Biology, Head of Biology Department, Institute of Pharmacy and Molecular Biotechnology, Heidelberg University, Germany, for hosting LC/MS analysis in his laboratory.

. My family and my greatest support. I would like to thank my mother for the endless support, love, care and nourishment she has always been a true helping hand throughout my life may god bless her. I'd like to thank my husband for being my backbone, understanding and extremely supportive. I'd like to thank my brother for being my true guidance, he is not only my brother he has been the father figure in my life.

Finally, I would like to dedicate this thesis to my late Father, may his soul rest in peace.

Eman Mahmoud Kabbash, 2011

Table of Contents

List of Tables	iii
List of Figures	iv
List of Abbreviations	viii
Introduction	1
Aim of work	4
Review of Literature	5
A. Reported phytochemical constituents in <i>O. europaea</i> L.	5
1. Secoiridoids reported in <i>Olea europaea</i> L.	5
2. Phenolic compounds reported in <i>Olea europaea</i> L.....	7
3. Lignans reported in <i>Olea europaea</i> L.	8
4. Triterpenes reported in <i>Olea europaea</i> L.....	9
5. Miscellaneous compounds	10
B. Biological activities reported for <i>O. europaea</i> L	19
Taxonomy	24
Materials and Methods	30
A. Materials	30
1. Plant Material.....	30
2. Reagents, Solvents and Apparatus	30
2.1. Extracts preparation	30
2.3. Polyphenols assay	31
2.4. Flavonoids assay	31
2.5. HPLC assay.....	31
2.6. HPLC-PDA-ESI/MS/MS analysis	31
2.7. <i>In-vitro</i> assay of antioxidant activity	31
3. Authentic Reference Standards	32
4. Software	32
B. Methods	32
1. Extracts preparation	32

2. Phytochemical analysis.....	32
2.1. Ultraviolet Spectroscopic Analysis for <i>O. europaea</i> L. Cultivars Leaf Extracts.....	32
2.2. Quantitative Determination of Total Polyphenol Content of <i>O. europaea</i> L. Cultivars Leaf Extracts in Autumn and Spring.....	33
2.3. Quantitative Determination of Total Flavonoid Content of <i>O. europaea</i> L. Cultivars Leaf Extracts in Autumn and Spring.....	34
2.4. HPLC Assay of Oleuropein Content of <i>O. europaea</i> L. Cultivars Leaf Extracts in Autumn and Spring.....	34
2.5. HPLC-PDA-ESI/MS/MS Based Metabolomics of <i>O. europaea</i> L. Cultivars Leaf Extracts in Autumn and Spring.....	35
3. <i>In vitro</i> Assay of Antioxidant Activities of <i>O. europaea</i> L. Cultivars Leaf Extracts by DPPH Radical Scavenging Method.....	36
Results and Discussion.....	
Part 1: Phytochemical Analysis.....	38
Chapter 1: Ultraviolet Spectroscopic Analysis for <i>O. europaea</i> L. Cultivars Leaf Extracts.....	38
Chapter 2: Quantitative Determination of Total Polyphenol Content of <i>O. europaea</i> L. Cultivars Leaf Extracts in Autumn and Spring.....	43
Chapter 3: Quantitative Determination of Total Flavonoid Content of <i>O. europaea</i> L. Cultivars Leaf Extracts in Autumn and Spring.....	48
Chapter 4: HPLC Assay of Oleuropein Content of <i>O. europaea</i> L. Cultivars Leaf Extracts in Autumn and Spring.....	54
Chapter 5: HPLC-PDA-ESI/MS/MS Based Metabolomics of <i>O. europaea</i> L. Cultivars Leaf Extracts in Autumn and Spring.....	59
Part 2: <i>In vitro</i> Assay of Antioxidant Activities of <i>O. europaea</i> L. Cultivars Leaf Extracts by DPPH Radical Scavenging Method.....	89
Conclusions.....	95
Recommendations.....	97
Summary.....	98
References.....	103
Appendix.....	
Arabic summary.....	

List of Tables

Table 1: Traditional uses of <i>O. europaea</i> L. different parts	1
Table 2: Iridoids, secoiridoids and secoiridoid glycosides reported in <i>O. europaea</i> L. various parts.....	6

List of Abbreviations

Abbreviation	
ABTS	2,2'-azino-bis(3-ethylbenzothiazoline-6-sulphonic acid)
AE	Autumn extracts
ANN	Artificial Neural Networks
BBCE	Bovin brain capillary endothelial cells
BHT	Butylated hydroxy toluene
DPPH	2,2-diphenyl-1-picrylhydrazyl
EDA	Exploratory Data Analysis
EIC	Extracted ion chromatogram
ESI	Electospray ionization
EVOO	Extra virgin olive oil
FA	Factor analysis
GC/MS	Gas chromatography coupled to mass spectrometry
HCA	Hierarchical Cluster Analysis
HPLC	High performance liquid chromatography
HPLC/ESI-MS/MS	High-performance liquid chromatography-electrospray ionisation tandem mass spectrometry
HPLC/UV-vis	High performance liquid chromatography with ultraviolet visible detector
HRI	Horticulture Research Institute
KNN	<i>k</i> -nearest neighbours
LC/MS	Liquid chromatography/Mass spectrometry
LDA	Linear Discriminate Analysis
MVA	Multivariate analysis
NMR	Nuclear magnetic resonance
OLE	Olive leaf extract
PCA	Principal Component Analysis
PCR	Principal Component Regression
PDO	Protected designation of origin
PGI	Protected geographical origin
PLS	Partial Least Square
PLS-DA	Partial Least Squares Discriminate Analysis
PPh	Polyphenol content
RDA	Retro-Diels-Alder reaction
SE	Spring extracts
SIMCA	Soft Independent Modelling of Class Analogy
TF	Total flavonoids
TIC	Total Ion Chromatogram
Trolox	6-hydroxy-2,5,7,8-tetramethylchroman-2-carboxylic acid
UPLC-QTOF-MS	Ultra-high performance liquid chromatography-quadrupole time-of-flight mass spectrometry

Introduction
