## ACKNOWLEDGEMENT

First and foremost; thanks to Allah, The Master of the Universe, The Most Gracious and The Most Merciful.

I would like to express my deepest gratitude towards *Professor Dr. Ahmed El- Gohary* ; Professor and head of the Clinical Pathology Department, for his wise supervision, precious advice and unfailing support. Also, his ideas and guidance facilitated many of the difficulties encountered.

I am also indebted to *Dr. Enas El-Shaiekh* ; Assistant Professor of Community medicine , who devoted much of her precious time in planning and carrying out this work. Also, for her continuous advice and highest cooperation.

I would also like to express my appreciation to *Dr. Amal Sayed Ahmed* ; Lecturer of Clinical Pathology for her close follow-up of every stage of this research and her encouragement and patience. Also if it were not for her fine touches, this work would not have been in this form.

I would also like to express my appreciation to our colleagues in the clinical pathology department (doctors, technicians and workers) who help me in this study.

Special thanks to assistant prof. Asa Ljungh ; dept. of Infectious & Medical microbiology, Lund Univerisity, Sweden who provided the kits as gift to the clinical pathology department, Faculty of Medicine, Suez Canal University which was used in this research.
