**HYDROCHEMICAL STUDIES FOR THE QUATERNARY
GROUNDWATER IN EL-TOR AREA AND ITS
VACCINATES, SOUTH SINAI, EGYPT**

Thesis

Submitted for the partial fulfillment of the degree of M.Sc.

(chemistry)

By

Ehab Zaghlool Hassan Hamouda

To

Chemistry Department

Faculty of Science

Benha University

Under the supervision of

Prof.Dr.Hassan Ali Dessouki

Prof of inorganic chemistry and Head
of chemistry Department, faculty of
science , Benha University

Prof.Dr.Alaa Elsyed Ahmed Amin

Prof. of analytical chemistry faculty of
science, Benha University

Dr.Mohammed Ahmed Gomaa
Associate Prof. and Head of hydrogeo-
chemistry Department, Desert Research
Center, Matariya, Egypt

Benha, 2006

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ
بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

الَّذِي جَعَلَ لَكُمُ الْأَرْضَ فِرَاشًا
وَالسَّمَاءَ بِنَاءً وَأَنْزَلَ مِنَ السَّمَاءِ مَاءً
فَأَخْرَجَ بِهِ مِنَ الثَّمَرَاتِ رِزْقًا لَكُمْ
فَلَا تَجْعَلُوا لِلَّهِ أَنْدَادًا وَأَنْتُمْ
تَعْلَمُونَ" {البقرة ٢٢}

صدق الله العظيم

HYDROCHEMICAL STUDIES FOR THE QUATERNARY
GROUNDWATER IN EL-TOR AREA AND ITS
VACCINATES, SOUTH SINAI, EGYPT

Submitted By

APPROVAL SHEET

HYDROCHEMICAL STUDIES FOR THE QUATERNARY GROUNDWATER IN EL-TOR AREA AND ITS VACCINATES, SOUTH SINAI, EGYPT

Submitted By

Ehab Zaghlool Hassan Hamouda

This thesis is approved by :

1- Prof. Dr. Gaber Mohamed AbuelResh

G.M. Abu. El. Resh

2- Prof. Dr. Mahmoud Sabry Mohamed

M.S. Rizk

3- Prof. Dr. Hassan Ali Dessouki

H.A. Dessouki

4- Dr. Mohamed Ahmed Gomaa

[Signature]

Notes

Before the preparation of thesis, the candidate had successfully passed the following courses:

- 1- Solid state chemistry.
- 2- Thermodynamic chemistry and non-ideal solutions.
- 3- Nuclear chemistry.
- 4- Advanced inorganic chemistry.
- 5- Instrumental analysis
- 6- Quantum chemistry and molecular spectroscopy theory.
- 7- English language

Head of Chemistry Department

HA. Dessouki

Prof.Dr.Hassan Ali Dessouki

ACKNOWLEDGMENT

Many thanks for allah. The author wishes to express his deep gratitude to **Prof.Dr. H.A.Dessouki**, Prof. of inorganic chemistry and Head of Chemistry Department , Faculty of Science , Benha University for the supervision of the present work.

Thanks are extended to **Prof.Dr. A.E.A.Amin**. Prof. of analytical chemistry, Faculty of Science , Benha University.

The author is greatly indebted to **Dr. M.A.Gomaa**, Associate prof. of hydrogeochemistry and head of the hydrogeochemistry Department, Desert Research Center, who planed and supervised all steps of this search.

Also, thanks for **Mr. M.A.Esa** and **Mr. H.A.EzzElden** for their help during this work. Thanks and deep gratitude are also to all staff members of Hydrgeochemistry Department of Desert Research Center.

CONTENTS

CONTENTES

INTRODUCTION

1- General outline	1
2- Previous work	2
3- Scope of the present work	4
3.1-The field activities	4
3.2- The laboratorial work	5

CHAPTER I : EXPERIMENTAL METHODS AND APPARATUS

I.1. -Total dissolved solids (TDS)	8
I.1. a- Evaporation method	8
I.1. b- Calculation method	8
I. 2. Specific electrical conductance (EC)	9
I. 3. Hydrogen ion concentration (pH)	9
I.4- Carbonate and bicarbonate	9
I.5-Chloride	10
I.6. Calcium and magnesium	11
I. 6.a - Total Hardness	11
I.6.b-Calcium Hardness	12
I.6.c- Magnesium Hardness	13
I.7- Sodium and potassium	13
I.7.a- Sodium	13
I. 7.b- Potassium	14
I.8-Sulphate	17
I.9-Silica	18
I.10-Nitrate	19
I.11-Bromide	20
I.12-Iodide	20
I.13-Iron - Manganese - Copper - Cadmium	20

CHAPTER II : GEOMORPHOLOGICAL, GEOLOGICAL AND HYDROGEOLOGICAL ASPECTS

II.1. Geomorphological and geological aspects	23
II.2. Hydrogeological setting.....	24

CHAPTER III : HYDROCHEMICAL ASPECTS

General outline	31
III.1. Groundwater salinity	32
III. 2. Hydrogen ion concentration	33
III. 3. Groundwater hardness	36
III.4. Groundwater alkalinity	38
III.5. Major components distribution	38
III.5.1. Distribution of calcium	41
III.5.2. Distribution of magnesium	42
III.5.3. Distribution of sodium and potassium	50
III.5.4. Distribution of carbonate and bicarbonate ..	51
III.5.5. Distribution of sulphate	59
III.5.6. Distribution of chloride	60
III.5.7. Distribution of silica	72
III.5.8. Distribution of nitrate	75
III.6. Major ions relationships	79
III.6.1. The hydrochemical coefficients	79
III.6.2. Groundwater chemical types	82
III.6.3. Hypothetical salt assemblages	83
III.7. The semi-logarithmic graph (Schoeller, 1962) ...	84
III.8. Piper's classification (Piper's , 1953)	90
III.9. Major ions salinity relationships	98
III. 10. Distribution of some minor and trace constituents	98
III.10.1. Distribution of iron	101
III.10.2. Distribution of manganese	101
III.10.3. Distribution of copper	102
III.10.4. Distribution of cadmium.....	102

III.11. Seawater interference	102
-------------------------------------	-----

Chapter IV: Evaluation of groundwater quality for different uses.

General outline	114
IV.1. Evaluation of groundwater for drinking and domestic uses	114
IV.2. Evaluation of groundwater for livestock and poultry uses	119
IV.3. Evaluation of groundwater for irrigation uses	122
IV.3.1 Total dissolved salts (TDS)	122
IV.3.2.Sodium adsorption ratio (SAR)	123
IV.3.3. Soluble sodium percentage (SSP)	126
IV.4. Evaluation of groundwater for industrial uses	127
Summary and conclusions	130
References	136
