« ويسئلونك عن الروح
قل الروح من أمر ربي
وما أوتيتم من العلم إلا قليلاً »

صدق الله العظيم

(سورة الأسراء الآية ٨٥)

ACKNOWLEDEGMENT

Thanks to **GOD** who granted me the ability to fulfil the work of this thesis.

I would like to express my supreme gratitude and appreciation to Prof. Dr. Mohammed Abdel-Rahman Mousa, Professor and Head of Internal Medicine, Faculty of Medicine, Ain Shams University, for his close supervision and encouragement during this study.

I would also like to express my grate fullness and respect to Dr. Magdy Farrag El-Sayed, Assistant Professor of Internal Medicine, Faculty of Medicine, Ain Shams University, for his cooperation, helping, continuous guidance and valuable instructions throughout this work.

I would also like to express my deep thanks and respect to Dr. Adel Mohammed Saeid, Lecturer of Chest Diseases, Faculty of Medicine, Ain Shams University, for his close supervision, valuable guidance, and meticulous instructions and revision throughout this work.

I would also like to thank all patients, technicians and nurses for their kind help to accomplish this work.

The indispensable support of my family stays beyond any thanks.

CONTENTS

*INTRODUCTION AND AIM	(1)
OF THE WOREK	
*REVIEW OF LITERATURE:	(3)
Systemic lupus erythematosus:	(3)
-History	(3)
-Definition	(4)
-Epidemiology	(4)
-Pathogenesis	(5)
-Pathology	(8)
-Clinical manifestation	(9)
-Activity of the disease	(18)
-Diagnosis of SLE	(22)
-Investigation of SLE	(25)
Pleuro-pulmonary manifestation of SLE	(32)
- Pleuro-pulmonary manifestation subgroups	(34)
-Association of Sarcoidosis & amyloidosis	(48)
-Drug-induced SLE pulmonary disease	(48)
-Mixed Connective Tissue Disease Syndrome	(50)
-Evaluation of SLE patients with lung disease	(51)
-Prognosis of SLE	(55)
Bronchial hyper-reactivity(BHR)	(57)
-Definition	(57)
-Mechanism of hyper-reactivity	(58)
-Bronchial provocation test	(69)
-Methacholine inhalation challenge	(70)
-Measurement and interpretation of broncho-provocation challenge	(73)
Bronchial hyper-reactivity and upper airways involvement in SLE	(76)

*SUBJECTS AND METHODS	(89)
*RESULTS	(96)
*DISCUSSION	(113)
*SUMMARY AND CONCLUSION	(122)
*RECOMMENDATIONS	(125)
*REFERENCES	(126)
*ARABIC SUMMARY	

LIST OF TABLES

Table NO	Title	Page
(1) Review of literarure		
1	UCH middle sex scoring system of SLE disease activity	21
2	The revised criteria of the ACR for diagnosis of SLE	23
3	Sensitivity and specificity of various immunological test for SLE	26
4	Causes acute respiratory illness in SLE	33
(2) Subjects and methods		
1	Order, colour, concentration and cumulative dose of methacholine during provocation	95
(3) Results		
1	Collective laboratory data of the 20 SLE patients	96
2	Collective clinical data of the 20 SLE patients	97
3	Collective laboratory data of the 20 healthy control	98
4	Collective spirometric values of the 20 SLE patients	99
5	Collective spirometric values of the 20 healthy controls	100
6	Comparison between cases and control as regards the age/year	101
7	Comparison between cases and control as regards the laboratory data	

Table NO	Title	Page
Cont.. (3) Results		
8	Comparison between cases and controls as regards the spirometric values	102
9	Comparison between cases and controls as regards the total cumulative inhalation unit(CIU) of methacholine	102
10	Comparison between cases and controls as regards the result of methacholine provocation test	103
11	Number of positive cases to methacholine challenge test at each concentration of methacholine	103
12	Total concentration and cumulative inhalation unit(CIU)of methacholine for each of the patients group	104
13	Comparison between cases and control groups as regards the ACR criteria for diagnosis SLE	105
14	Comparison between group1 (+ve cases) and group2(-ve cases) as regards the age/year	106
15	Comparison between group1 (+ve cases) and group2(-ve cases) as regards the laboratory data	106
16	Comparison between group1 (+ve cases) and group2(-ve cases) as regards the spirometric values	107
