بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

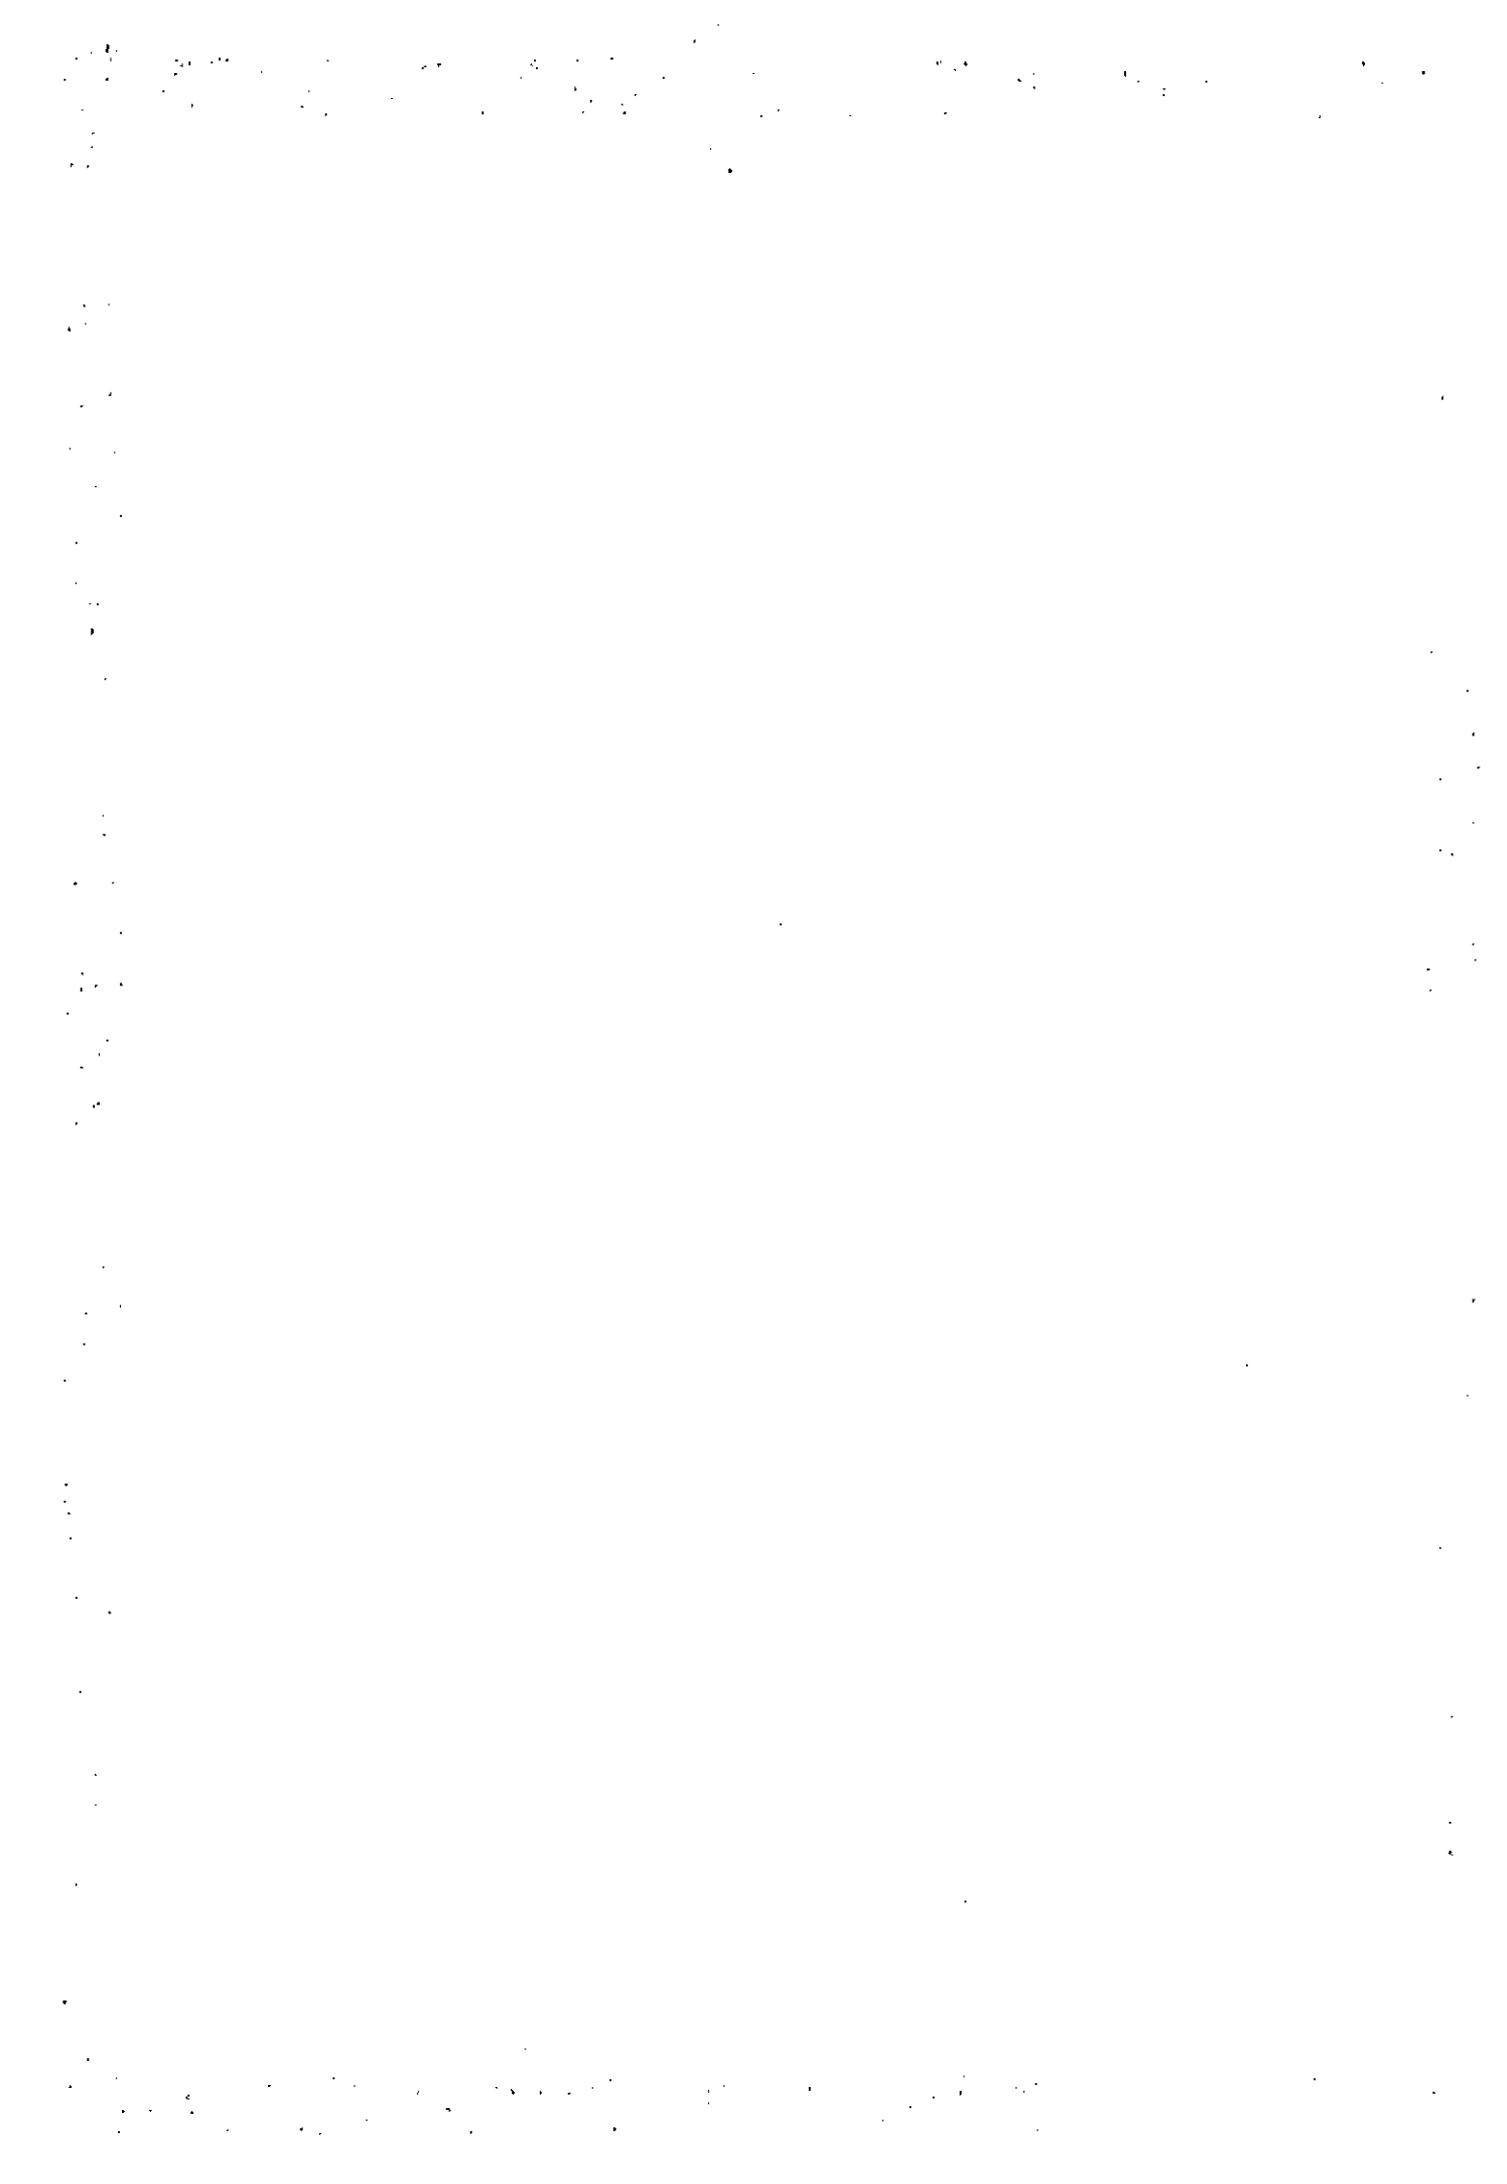

قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا

إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ

سورة البقرة

الآية (٣٢)

## ACKNOWLEDGEMENT

First, I would like to express my deepest gratitude and thanks to ALLAH whose magnificent help was the main factor in accomplishing this work.

Express my sincere gratitude to my Prof. Dr. Soheir Sayed Ebou El-Ella Professor of pediatric - Faculty of Medicine - Menoufiya University for her instructive supervision, experienced guidance and for provision to make the completion of this work possible.

I acknowledge with much gratitude Prof. Dr. Fahima Mohamed Hassan Professor of pediatric - Faculty of Medicine - Menoufiya University who spent much time effort and careful supervision and revision of this work to become a great help for us.

My great thanks to Dr. Mohamed Said Mostafa Professor of Clinical Pathology Liver Institute - Menoufiya University for his great effort in interpretation and careful supervision of this work.

My great thanks to Dr. Fady Mohamed El Gendy Ass. Prof. of Pediatric Faculty of Medicine - Menoufiya University for his mastery teaching, meticulous supervision and guiding during the practical part of the work.

My deepest thanks and best wishes to my parents and all my family for supporting me to introduce this work to help my patients.

---

List of tables	I-II
List of figures	III-IV
Abbreviation	V-VI
<b>Introduction</b>	1-2
<b>Aim of work</b>	3
<b>Review of Literature</b>	4-67
Diabetes mellitus	4
Classification of DM	5-10
IDDM	10
Etiology of IDDM	10
Incidence of IDDM	15
Diagnosis of DM	17
Basis of managements of IDDM	24
Complication of DM	29-42
Insulin like growth factors	43-57
Insulin like growth factor and growth in diabetes mellitus	58-67
<b>Material and methods</b>	68-76
<b>Results</b>	77-118
<b>Discussion</b>	119-130
<b>Summary &amp; Conclusion</b>	131-133
<b>Recommendation</b>	134-135
<b>References</b>	136-163
<b>Arabic summary</b>	٣-١

## List of tables

<b>Tables of the review</b>	<b>Page</b>
Table (1): The modification of the NDDG/WHO classification scheme according to the etiology.	5
Table (2): Approximate relative risk for IDDM associated HLA-DR haplotype	11
Table (3): criteria for the diagnosis of diabetes mellitus.	17
Table (4): Criteria for evaluating the standard oral glucose tolerance test.	19
Table (5): The insulin preparations	26
Table (6): Stages of retinopathy.	38
Table (7): Characteristics of urinary albumin excretion in different phases of diabetic nephropathy.	39
Table (8): Classification of Sex Maturity Stages in Girls.	67
Table (9): Classification of Sex Maturity Stages in Boys.	67

### *Tables of the results.*

Table (1): The Comparison between the studied groups as regards the age (years).	85
Table (2): The demographic data of the studied groups according to the sex and the pubertal stage.	85
Table (3): Distribution of the studied groups according to the family history of diabetes mellitus and the consanguinity.	89
Table (4): The Comparison between the studied groups as regards the Weight (Kg) and the height (Cm).	90
Table (5): Distribution of the studied groups according to the weight percentile and the height percentile.	93
