**SYNTHESIS AND CHARACTERIZATION OF
SOME SUPER ABSORBING POLYMERS AND
SOME OF THEIR APPLICATIONS.**

A Thesis

Submitted to the Faculty of Science, Menoufia
University for the Degree of Doctor of Philosophy of Science
in Chemistry (Organic Chemistry)

By

ESAM EL-DEN SOBHY EL- SAFY

M.Sc. Organic Chemistry(1997)

Supervisors

Ibrahim Fathy Zeid
Prof. Dr. Ibrahim Fathy Zeid

Prof. of Organic Chemistry
Department of Chemistry
Faculty of Science, Menoufia
University

الآية ٢١ سورة الحديد
القرآن الكريم

ACKNOWLEDGEMENT

First of all, I do thank Allah for all the gifts he has given me.

The author wishes to express his sincerest appreciation and deepest gratitude to Prof. Dr. Ibrahim Fathy Zeid, Professor of Organic Chemistry, Department of Chemistry, Faculty of Science, Menoufia University.

I would like also to express my deepest gratitude to Prof. Dr. Fahima M. Hellaly, Professor of Polymer Chemistry, Department of Polymers and Pigments, NRC for her help and many valuable discussions.

The author is also indebted to Dr. Nadia A. Rizk, Associate Professor of Polymer Chemistry, Department of Polymers and Pigments, NRC for suggesting and supervising the research project, valuable discussions and continuous guidance and encouragement throughout the course of this work.

I would like to express my deepest gratitude to Dr. Bothaina M. Abd-El-Hady, Associate Professor of Polymer Chemistry, Department of Polymers and Pigments, NRC for supervising the research work and fruitful suggestions during this work.

My grateful thanks also go to Dr. Mervat. M. Ibrahim, Associate Professor at the Department of Radiation Chemistry, National Center for Radiation and Technology, Nasr City, Cairo, Egypt for cooperating sincerely irradiating the prepared hydrogels by γ -radiation.

ABBREVIATIONS

Am	: Acrylamide
AmNaA	: Acrylamide-sodium acrylate
MEA	: Monoethanol amine
DEA	: Diethanol amine
TEA	: Triethanol amine
KGy	: Kilo Gray

CONTENTS

	Page
AIM OF WORK	
SUMMARY	i-iii
Part I: Synthesis of acrylamide- sodium acrylate copolymers by 1- γ -radiation 2- free radical polymerization	
CHAPTER 1: INTRODUCTION	1-7
CHAPTER 2: LITATUREER REVIEW	8
2.1. Synthesis of hydrogels by gamma radiation	8-11
2.2. Synthesis of hydrogels by free radical polymerization	12
2.2.1. Acrylamide hydrogels	12
2.2.2. Acrylic acid hydrogels	13
2.2.3. Acrylates hydrogel	13
2.2.4. Vinyl alcohol hydrogels	14
2.2.5. Application of hydrogels	14
CHAPTER 3: MATERIALS AND METHODS	16
3.1. Materials	16
3.2. Expermental techniques	18
3.2.1. Hydrogel preparation	18
3.2.2. Preparation of sodium acrylate	18
3.2.3. Alkaline hydrolysis	18
3.2.4. Metal salt solutions	19
3.2.5. Cultvation medium	19
3.2.6. Assay medium	19
3.2.7. Total counts of bacteria and fungi	19
3.2.8. Assay procedure	19
3.2.9. Swellability	20
3.3. Methods	21
3.3.1. Infrared spectra	21
3.3.2. Thermal analysis	21
3.3.3. X- ray diffraction	21
3.3.4. Electron Microscope	21

	Page
3.3.5. Scanning Electron Microscope	21
3.3.6. UV- reflectance spectroscopy	21
3.3.7. Effect of different salt concentrations on the degree of prepared hydrogels	22
3.3.8. Released ions from prepared hydrogels	22
CHAPTER 4: RESULTS AND DISCUSSION	23
4.1.Synthesis of acrylamide- sodium acrylate hydrogel using gamma radiation	23
4.1.1. The parameters effecting the properties of hydrogel	23
4.1.2. Infrared spectra	28
4.1.3. TGA	36
4.1.4. Behavior of AmNaATEA hydrogel towards organic solvents	36
4.1.5. Alkaline hydrolysis of hydrogel	40
4.1.6. Effect of different saline solutions	43
4.2. Synthesis of crosslinked of acrylamide – sodium acrylate hydrogel by free radical polymerization	46
4.2.1. Factors affecting the properties of the hydrogel	46
4.2.2. Infrared spectra	54
4.2.3. TGA	54
4.2.4. Behavior of hydrogel towards organic solvents	60
4.2.5.Effect of increasing different salt concentrations on the swelling gels	60
Conclusions	63
Part II: Complexing of copper, manganese and iron by prepared hydrogels and evaluation of some prepared hydrogels on microorganisms	
CHAPTER 5: Complexing of copper, manganese and iron by prepared hydrogels	64
5.1. INTRODUCTION	64
5.2. LITERATURE REVIEW	67
5.3.RESULTS AND DISCUSSION	71
5.3.1.Complexing of copper, manganese and iron by hydrogel prepared by gamma radiation	71
5.3.1.1. Effect of metal ion concentrations	71
5.3.1.2. Effect of time of immersion	73
