Date : 5/10/1997 .

ACKNOWLEDGEMENT

I thank **ALLAH** for his blessing on me to present this work.

I would like to express my deep gratitude to **Prof. Dr. Mohamed Sami Saber**, Prof. of Virology, Faculty of Vet. Med., Cairo University for his kind stimulating, planning and interest during the course of the present research work.

My Sincere appreciation is offered to **Dr. Mohamed Ahmed Mouaz**, Head of rinderpest department, Vet. Serum and Vaccine Research Institute, Abbassia, Cairo, for his guidance and procuring all facilities needed to accomplish this work. I wish to express all my appreciation to him for his helpful suggestions and advice. He has given me so much of his valuable time, experience and scientific knowledge.

I am greatly thanking **Dr. Mohamed Hassan Khodeir**, Head of Research department of pet animals vaccines for his valuable help and assistance during the conduction of this work.

I will not forget the encouraging support and enthusiasm given by **Dr. Ashraf Mohamed Abbass**. His excellent suggestions and criticism are greatly acknowledged.

I am also grateful to all **staff members** of rinderpest department, Veterinary Serum & Vaccine Research Institute, Abbassia, Cairo, for giving a hand whenever needed.

*This work was supported in part by a grant for scientific research sponsored by the **Egyptian Academy for Scientific Research and Technology** under a project entitled "Studies on rinderpest and peste des petits ruminants in Egypt and methods for control." The interest and suggestions of **Dr. Mohamed Ahmed Mouaz**, Director of the project are very much appreciated.*

Lastly but not least, thanks to every kind hand helped me to accomplish this work

Abber Mohamed Atya.

**Sincere thanks should be conferred to
Prof. Dr. Ahmed Daoud, Director of the
Veterinary Serum and Vaccine Research
Institute, Abbasia, Cairo, for guidance
supplying facilities for this work.**

TABLE OF CONTENTS

	Page
1. Introduction.	1
2. Review of Literature.	4
2.1. History of PPR.	4
2.2. Classification of PPPV.	13
2.3. Physico - chemical properties.	14
2.3.1. Size and morphology.	14
2.3.2. Genome structure of PPRV.	17
2.3.3. Physical and chemical stability.	19
2.3.3.1. Thermostability of the PPR virus.	19
2.3.3.2. Effect of radiation.	23
2.3.3.3. Effect of pH.	24
2.4. Biological properties.	24
2.4.1. Growth in cell cultures.	24
2.5. Relationship between PPRV and RPV.	32
2.6. Serological assays of peste des petits ruminants virus.	34
2.7. Immunity.	37

3. Material and methods.	45
3.1. Material.	45
3.1.1. Animals.	45
3.1.2. Serum.	45
3.1.2.1. Reference PPR hyperimmune serum.	45
3.1.2.2. Serum samples.	45
3.1.3. Viruses.	46
3.1.3.1. Rinder pest virus (RPV).	46
3.1.3.2. Peste de petits ruminants virus (PPRV).	46
3.1.4. Cell cultures.	46
3.1.5. Cell culture media, reagents & solutions.	47
3.1.5.1. Media.	47
3.1.5.1.1. Growth media.	47
3.1.5.1.2. Maintenance media.	47
3.1.5.2. Hanks' balanced salt solution (HBSS).	47
3.1.5.3. Trypsin solution (1:250).	47
3.1.5.3.1. Trypsin- versin solution.	48
3.1.5.4. Sodium bicarbonate solution.	48
3.1.5.5. Antibiotic solution.	48
3.1.5.6. Bovine serum.	48
3.1.5.7. Freezing solution.	48
3.1.6. Reagents for sterility test.	49

Contents

3.1.6.1. Media for testing the vaccine purity.	49
3.1.6.1.1. Thioglycolate media.	49
3.1.6.1.2. Soyabean casein digest medium.	49
3.1.6.1.3. Mycoplasma broth culture and agar.	49
3.1.6.1.4. Bacto sabourod agar	50
3.2. Methods.	50
3.2.1. sampling.	50
3.2.2. serum inactivaion.	50
3.2.3. Cell culture passages.	50
3.2.4. Maintenance and preservation of cell cultures.	51
3.2.5. Virus titeration.	51
3.2.6. Serum Neutralization Test (S.N.T.).	52
3.2.7. Preparation of PPR virus vaccine.	53
3.2.8. Identity test for PPRV virus vaccine.	53
3.2.9. Sterility testing of PPRV vaccine.	54
3.2.10. Estimation of virus content of PPRV vaccine.	55
3.2.11. Safety and efficacy tests in the inoculated goats with PPRV vaccine.	56
3.2.12. Safety and efficacy tests in the inoculated sheep with PPRV vaccine.	56
3.2.13. Sero-monitoring of the inoculated goats and sheep with PPRV vaccine.	57

Contents

3.2.14. Keeping quality of PPRV vaccine.	57
3.2.14.1. Thermostability of PPRV lyophilized vaccine at 56°C.	57
3.2.14.2. Thermostability of PPRV lyophilized vaccine at 37°C.	57
3.2.14.3. Thermostability of PPRV lyophilized vaccine at 25°C.	58
3.2.14.4. thermostability of PPRV lyophilized vaccine at 4°C.	58
3.2.14.5. Thermostability of PPRV lyophilized vaccine at -4°C.	58
3.2.14.6. Thermostability of PPRV lyophilized vaccine at - 20°C.	59
3.2.14.7. Thermostability of PPRV lyophilized vaccine at - 70°C.	59
3.2.14.8. Thermostability of the reconstituted PPRV vaccine at 4°C.	59
3.2.14.9. Thermostability of the reconstituted PPRV vaccine at 25°C.	59
