DESIGN AND PERFORMANCE OF CUTTING TOOLS OF CHOPPING MACHINES OF AGRICULTURAL CROP RESIDUES

by

RABIE AHMAD HABIB

B.Sc., Mech. Eng., Tishreen University, Syria, 1990

M.Sc., Mech. Power Eng., Cairo University, Egypt, 1999

**A Thesis Submitted to the
Faculty of Engineering at Cairo University
In Partial Fulfillment of the
Requirements for the Degree of
Doctor of Philosophy**

In

MECHANICAL ENGINEERING

Under Supervision of

Prof. Dr. Ali A. Khattab
Professor of Mechanical Design
Mechanical Design & Production Dept.
Faculty of Engineering
Cairo University

Prof. Dr. Gamal El deen M. Nasr
Professor of Agricultural Engineering
Agricultural Engineering Dept.
Faculty of Agriculture
Cairo University

Dr. Badr S. Azzam
Assist. Professor of Mechanical Design
Mechanical Design and Production Dept.
Faculty of Engineering
Cairo University.

Sayed M. Metwally

LIST OF CONTENTS

List of contents	iv
Abstract	ix
Nomenclature	xv
Acknowledgment	xiv
List of figures	xvi
List of tables	xxi

CHAPTER 1: REVIEW OF LITERATURES

1.1 Introduction	1
1.2 Background Overview	5
1.2.1 Description of plant materials	5
1.2.1.1 Structure	5
1.2.1.2 Mechanical and physical properties	6
1.2.2 Cutting machines	7
1.2.2.1 Definitions	9
i. Cutting tool	9
ii. Counter-shear	9
iii. Configuration of cutting tool	10
1.2.3 Theory of cutting process	13
1.2.4 Edge and wedge forces of the cutting process	13
1.2.5 Previous studies	16
1.2.5.1 Physical and mechanical properties of plant material	16
1.2.5.2 Energy requirement	18
1.2.5.3 Performance	20
1.2.5.4 Theoretical study and Other Operational Factors	23
1.2.5.5 Utilization of agricultural crop residues	25
i. Compost production	26
ii. Animal feeding production	26
iii. Energy production	26

iv. Wood Manufacture	27
v. Unconventional bricks	27

CHAPTER 2: TREORETICAL ANALYSIS OF AGRICUTURAL CUTTING PROCESS

2.1 Introduction	28
2.2 Methods of Cutting Plant Material	28
2.3 Force Analysis of Cutting process	29
2.3.1 Cutting with counter-shear	30
2.4 Energy Requirement of Cutting Process	36

CHAPTER 3: IMPACT CUTTING PROCESS INERTIA “FREE CUTTING”

3.1 Introduction	39
3.2 Force Analysis of Free Cutting Process	40
3.2.1 Bending Force	42
3.2.2 Tension force	42
3.2.3 Cutting force	43
3.2.4 Equivalent mass	43
3.3 Cutting Knife Velocity	45
3.3.1 Special cases	46
i. Free cutting of semi-dry plants	46
ii. Free cutting of dry-plants	46
3.3.2 Case Study	47
3.4 Analysis of Results of the Free-Cutting Process	48

CHAPTER 4: NUMERICAL ANALYSIS OF AGRICULTURAL CUTTING TOOLS

4.1 Introduction	49
4.2 Finite Element Package	51
4.3 Numerical Models	51
4.4 Effect of Edge Geometry and Configuration on Lifetime of Cutting Tool	54

4.4.1 Effect of edge angle	54
4.4.2 Effect of edge thickness	55
4.4.3 Effect of edge configuration	56
4.4.4 Effect of tool clamping method	57

CHAPTER 5: EXPERIMENTAL WORK

5.1 Introduction	58
5.2 Physical and Mechanical Properties of Maize and Cotton Stalks	59
5.2.1 Physical properties	60
5.2.2 Mechanical properties	61
5.2.2.1 Specimens preparation	61
5.2.2.2 Tensile testing	63
5.3 Specification of the Cutting Machine	66
5.3.1 Machine description	66
5.3.2 Machine specifications	67
5.4 Cutting Tools	74
5.4.1 Materials properties	74
5.4.2 Manufacturing of cutting tools	75
5.4.2.1 Original Cutting Tool	76
5.4.2.2 Local cutting tools	78
5.4.3 Manufacturing and heat treatment of local cutting tools	79
5.4.3.1 Manufacturing process	79
5.4.3.2 Heat treatment processes	80
I – Quenching and tempering processes	81
II - Nitriding	82
III – Carburising	83
IV - Hard chrome Coating	84
V – Case hardening	85
5.5 Calculations of Cutting Efficiency η_c	86

CHAPTER 6: RESULTS AND DISCUSSION

6.1 Cutting Tools Parameters	87
6.1.1 Effect of edge-angle on fuel consumption and cutting efficiency	88
i. Fuel consumption	88
ii. Cutting efficiency	89
6.1.2 Effect of edge-sharpness on fuel consumption and cutting efficiency	95
i. Fuel consumption	95
ii. Cutting efficiency	95
6.1.3 Effect of cutting-edge shape on fuel consumption and cutting efficiency	100
i. Fuel consumption	100
ii. Cutting efficiency	100
6.2 Study of the Chopping Machine Parameters	105
6.2.1 Effect of cutting drum speed on fuel consumption(cutting energy) and cutting efficiency	105
i. Fuel consumption	105
ii. Cutting efficiency	106
6.2.2 Effect of feeding drum speed on fuel consumption and cutting efficiency	106
i. Fuel consumption	106
ii. Cutting efficiency	107
6.3 Wear of Cutting Tools	110
6.3.1 Wear results	110
6.3.1.1 Wear of the original and local cutting tools with same heat treatment processes	111
6.3.1.2 Wear of the local cutting tools with different heat treatment processes.	112
6.3.1.3 Wear of the original and local cutting tools with different heat treatment processes	113
6.4 Technical and Economical Evaluation of The Locally Manufactured Cutting Tools	114

CHAPTER 7: CONCLUSION AND PROPOSAL FOR FUTURE WORK

7.1 Conclusions	115
7.2 Proposal For Future Work	117
References	118
Appendices	124
Arabic Title Page And Arabic Abstract
