Prof. Dr. Ezzat Khamis Amine

Professor of Nutrition

High Institute of Public Health

University of Alexandria

A handwritten signature in black ink, appearing to read 'Fahmy Charl', written in a cursive style.

Dr. Fahmy Charl

Assistant Professor of Occupational Medicine

High Institute of Public Health

University of Alexandria

ACKNOWLEDGEMENT.

I wish to express my profound gratitude and deep appreciation to my advisor Prof. Dr. Ezzat Khamis Amine , the Dean of the High Institute of Public Health, for his continuous support and guidance throughout all the stages of this study and for his interest in my academic career.

My profound gratitude is also extended to Dr. Fahmy Charl, assistant professor of occupational health, my co-supervisor, for his helpful cooperation, valuable suggestions, and his encouragement to fulfill this work.

I also, owe special thanks to all the directors, managers and workers of all the plants where the study was conducted, without their support this work could not be possible.

Finally, I pay great tribute to the Nutrition and Occupational health Departments at the High Institute of Public Health, Alexandria University for providing me with education and necessary help.

LIST OF TABLE

PAGE

Table (I): Geographic Distribution of the Studied Plants and the Examined Workers.	46
Table (II): Demographic Data of the Examined Workers	48
Table (III): Type of Education of the Examined Workers	49
Table (IV): Employment and On-the-job Training of the Examined Workers	51
Table (V): Coverage of the Examined Workers by Health Insurance	51
Table (VI): Smoking among Examined Worker	52
Table (VII): Daily Calorie Intake of the Examined worker	54
Table (VII): Daily Carbohydrate Intake of the Examined Workers	55
Table (IX): Daily Fat of the Examined workers Intake from Animal and Vegetable Sources	57
Table (X): Daily Protein Intake of the Examined Workers From Animal and Plant Sources	59
Table (XI): Daily Intake of Iron of the Examined Workers	62
Table (XII): Profile of Daily Iron Intake of the Examined workers	63
Table (XIII): Daily Consumption of Baladi and French Bread by the Examined workers	65
Table (XIV): Daily Intake of Vitamin C of the Examined workers	67
Table (XV): Daily Vitamin C Intake of the Age Groups of the Examined workers	68

Table (XVI): Daily Consumption of Tea by the Examined workers	69
Table (XVII): Body Composition and Metabolic Rate of the Examined Workers as Related to Age	72
Table (XVIII): Body Composition and Metabolic Rate of the Examined Workers as Related to Duration of Employment	77
Table (XIX): Weight, height and BMI of the Examined Workers as Related to Age.	81
Table (XX): Hip, Waist And Chest circumferences of the Examined Workers as Related to Age.	86
Table (XXI): Midarm circumferences, Triceps fold and Predicted fat of the Examined workers as Related to Age	87
Table (XXII): Weight, Height and BMI of the Examined Workers as Related to Duration of Employment	90
Table (XXIII): HIP, Waist And Chest Circumferences of the Examined Workers as Related to Duration of Employment	93
Table (XXIV): Mid arm circumference and Triceps fold of the Examined Workers as Related	94
Table (XXV): Productivity of the Studied Plants and the Examined Workers	97
Table (XXVI): Absenteeism Among Studied Workers	99
Table (XXVII): Haemodynamic Measurements of the Examined Workers as Related Age	101
Table(XXVIII): Haemodynamic Measurements of the Examined Workers as Related to Duration of Employment	105
Table(XXIX):Haemodynamics of the Examined Workers as Related to their BMI	109

Table(XXX): Haemodynamics of the Examined Workers as Related to their Wait to Hip ratio	109
Table (XXXI): Respiratory Functions tests of the Examined workers as Related to Age.	111
Table (XXXII): Respiratory Functions tests of the Examined workers as Related Duration of Employment.	115
Table (XXXIII): Respiratory Functions tests of the Examined workers as Related to their BMI.	118
Table (XXXIV): Respiratory Functions tests of the Examined workers as Related to their Waist to Hip ratio.	118
Table (XXXV): Blood Hemoglobin of the Examined workers as Related to Age	120
Table (XXXVI): Blood Hemoglobin of the Examined Worker as Related to Duration of Employment	120
Table (XXXVII): Blood Hemoglobin of the Examined workers Distributed by their Geographic Locations	121
Table (XXXVIII): Parasitic Infestations among the Examined workers As related to age	123
Table (IXL): Parasitic Infestations Among the Examined Workers Distributed by Their Geographic Locations	124
Table (XL): Summary of the Significant Correlated Investigated Variables with the workers' Productivity	127
Table (XLI): Multiregression Analysis with the productivity as the dependent variable	128
Table (XLII): Workers' productivity as Related to their Body Mass Index (BMI)	129
Table (XLIII): Workers' Productivity as Related to their Wto Hip Ratio	130
