Acknowledgement

I would like to express my deepest gratitude to **Prof . Dr . Abdel Aziz Mohamed Yousef**, Prof. of anesthesia and intensive care, Ain Shams University. He has been continuously supportive and encouraging. He is a very challenging personality with hard principals. It is great privilege to work under his supervision. Only god can reward him, as he deserves.

It is also a great pleasure to express my sincere thanks to **Prof . Dr . Nabila Mohamed Abdel Aziz**, Prof. of anesthesia and intensive care, Ain Shams University. Her kindness and sincerity has allowed me to overcome all difficulties and problems and paved the way for me to continue my work unabated. Inspite of her overload of commitments, she never let me short of any help or support. Her opinions were always respectable and vital in proceeding with the work.

I considered my self lucky when **Dr. Khaled Mohamed Maghawry** lecturer of anesthesia and intensive care, Ain Shams University, supervised my master essay. I am deeply grateful for him for his kind follow up , valuable advice, encouragement and scientific refinement through all the stages of this work.
