FACULTY OF SCIENCE
ZAGAZIG UNIVERSITY
BENHA BRANCH

FORMATION EVALUATION AND SUBSURFACE
STUDIES IN THE AREA NORTH OF OCTOBER
FIELD - GULF OF SUEZ,
EGYPT

B1E C V 9

A THESIS
SUBMITTED FOR THE DEGREE OF DOCTOR
OF PHILOSOPHY (Ph.D)
IN GEOPHYSICS

BY
AREF ADEL LASHIN
(M. SC., GEOPHYSICS)

TO
GEOLOGY DEPARTMENT
FACULTY OF SCIENCE
ZAGAZIG UNIVERSITY
(BENHA BRANCH)

2002

SUPERVISORS

- *Prof. Dr. Mohamed Sharaf El-Din Hafez*

Professor of Geophysics and Head of Geology Department,
Faculty of Science, Zagazig University,
Benha Branch.

- *Prof. Dr. Nasser Mohamed Abou Ashour*

Professor of Geophysics, Faculty of Science,
Geophysics Department,
Ain Shams University.

- *Dr. Hesham Shaker Zahra*

Associate Professor of Geophysics
Faculty of Science, Geology Department,
Zagazig University / Benha Branch.

Head of Geology Department:

Prof. Dr. Mohamed Sharaf El-Din Hafez

To my small family, especially my kind wife for her support and help during the course of this thesis, especially during these two long and hard years outside the homeland, and to my so sweet twins; Ahmed and Ayah.

To my big family; my father, my mother and my brothers.

ACKNOWLEDGEMENTS

This thesis represents the culmination of work which, as is often the case with such endeavours, could never been completed without the assistance of many people. I would like to express my deep thanks to *Prof. Dr. Mohamed Sharaf El-Din Hafez*, Professor of Geophysics and Head of Geology Department, Faculty of Science, Zagazig University-Benha Branch, for his effective supervision, suggesting the research point, continuous encouragement and all the facilities he offered to me during the progress of this work and in preparing and reviewing the thesis.

I wish to express my indebtedness and deepest appreciation to *Prof. Dr. Nasser Mohamed Abou Ashour*, Professor of Geophysics, Faculty of Science, Ain Shams University, for his fruitful supervision, useful guidance, valuable leading comments during the progress of this work and special thanks for critical revising the manuscript.

I would like to thank *Prof. Dr. Harald Lindner*, Professor of Bore Hole Geophysics and Petrophysics and director of the institute, Freiberg University of Mining and Technology, Institute of Geophysics, Germany, for his guidance throughout the course of the work and in particular, for giving me encouragement and support, and for providing me with all the facilities and the necessary software needed for processing of this work.

Special thanks are also to *Dr. Hesham Shaker Zahra*, Associate Professor of Geophysics, Faculty of Science, Geology Department, Zagazig University-Benha Branch, for his valuable help and encouragement during the progress of this work.

I would like to thank *Dr. Siegfried Fricke*, Well Logging Analysis Dept., Bore Hole Measurements Company (BLM), Magdeburg, Germany, for his valuable ideas and fruitful

discussions and suggestions during the course of the work and special thanks for his open invitation to me to visit the company from time to time.

My deep appreciations and warm feelings to *Dr. Andreas Schuck*, Head Seismic Processing and Interpretation Research Manager, Geophysics GGD Company, Leipzig, for his kind assistance and valuable scientific discussions during my visit to the company in Leipzig.

I would also like to thank *Mr. Mario Neßler* the computer administrator of the institute for providing expert technical assistance and unrivaled computer facilities.

Without appropriate data, this work would not be possible, so I would like to thank the Egyptian General Petroleum Corporation (EGPC) and Gulf of Suez Petroleum Company (GUPCO) for their permission to do this work and for providing me with necessary raw data.

Special thanks also are to *Mr. Said Shaheen* (Database manager, GUPCO) for the facilities he offered while getting the data, *Dr. Mohamed Shehab* (Geochemistry Dept., GUPCO) and *Mr. Esam Abd El-Maugoud* (Database Dept., GUPCO).

My thanks extend also to my colleagues and all the staff members of Geology Department, Benha Faculty of Science, Zagazig University-Benha Branch.

LIST OF CONTENTS

LIST OF CONTENTS

<u>Subject.</u>	<u>Page.</u>
ACKNOWLEDGMENTS.....	
LIST OF CONTENTS.....	
LIST OF FIGURES	
LIST OF TABLES.....	
LIST OF SYMBOLS.....	

CHAPTER I

INTRODUCTION

1.1 Generals.....	1
1.2 Exploration History of October Field.....	1
1.3 October Field and Available Data.....	4
1.4 Aim of Work.....	4
1.5 Processing of Data and Methods of Study.....	7
1.5.1 Picking of Data.....	7
1.5.2 Preparation and Correction of Data.....	7
1.5.3 Evaluation Technique.....	

CHAPTER II

GENERAL GEOLOGY

2.1 Introduction.....	18
2.2 Stratigraphy.....	18
2.2.1 Miocene.....	20
2.2.1.1 Gharandal Group (Miocene Clastics).....	20

<u>Subject.</u>	<u>Page.</u>
i- Nukhul Formation.....	22
ii- Rudeis Formation.....	22
ii.1 Mheiherrat Formation.....	23
ii.2 Hawara Formation.....	23
ii.3 Asl Formation.....	23
2.3 Tectonic Framework of the Gulf of Suez.....	25
2.3.1 The Structure Provinces of the Gulf of Suez.....	25
2.3.1.1 Ataqa Province.....	26
2.3.1.2 Gharib Province.....	26
2.3.1.3 Zeit Province.....	26
2.3.2 Main Fault Trends in the Gulf of Suez Rift.....	26
2.3.2.1 Clysmic Trend.....	26
2.3.2.2 Aqaba Trend.....	28
2.4 Petroleum Systems of the Gulf of Suez.....	28
2.4.1 Source Rocks.....	28
2.4.2 Overburden Rocks.....	29
2.4.3 Trap Styles.....	30
2.4.4 Reservoir Rocks.....	30
2.4.5 Seal Rocks.....	32
 <u>CHAPTER III</u> <u>WELL LOGGING ANALYSIS</u> 	
3.1 Introduction.....	33
3.2 Methodology.....	33
3.3 Preparation of Data.....	34
3.4 Environmental Corrections.....	34
3.4.1 Formation Temperature.....	35

<u>Subject.</u>	<u>Page.</u>
3.4.2 Correction of Fluid and Rock Resistivities.....	35
3.4.3 Bore Hole Diameter Corrections.....	36
3.4.4 Matrix Corrections.....	36
3.4.4.1 For Dolomite.....	37
3.4.4.2 For Sandstone.....	37
3.5 Well Log Calculations.....	37
3.5.1 Determination of Water Resistivity (R_w)	37
3.5.2 Shale Content Evaluation.....	38
3.5.2.1 Single Curve Methods.....	38
3.5.2.1.1 Neutron Log as A clay Indicator.....	38
3.5.2.1.2 Resistivity Log as A clay Indicator.....	39
3.5.2.1.3 Gamma Ray Log as A clay Indicator.....	39
3.5.2.2 Double Log Indicators.....	40
3.5.2.2.1 Neutron-Density Model.....	40
3.5.2.2.2 Neutron -Sonic Model.....	41
3.5.2.2.3 Density -Sonic Model.....	41
3.5.2.2.4 Porter Method.....	42
3.5.2.3 Normalization and Correction of Shale Volume.....	42
3.5.3 Total Porosity Determination.....	43
3.5.3.1 Density Log.....	43
3.5.3.2 Sonic Log.....	44
3.5.3.2.1 Wyllie's Model.....	44
3.5.3.2.2 Raymer-Hunt Transform.....	44
3.5.3.3 Neutron Log.....	45
3.5.3.4 Neutron-Density Combination.....	45
3.5.3.5 Gamma Ray-Sonic Combination.....	46

<u>Subject.</u>	<u>Page.</u>
3.5.4 Crossplots for Porosity and Shale Volume Determination.....	46
3.5.4.1 Neutron-Density Crossplot.....	46
3.5.4.2 Neutron-Sonic Crossplot.....	47
3.5.5 Correction of Porosity for Shaliness and Determination of Effective Porosity.....	47
3.5.5.1 Effective Porosity from Sonic Log.....	47
3.5.5.2 Effective Porosity from Density Log.....	48
3.5.5.3 Effective Porosity from Neutron Log.....	48
3.5.5.4 Effective Porosity from Neutron-Density Combination.....	48
3.5.6 Determination of Fluid Saturations.....	49
3.5.6.1 Gas Determination.....	50
3.5.6.1.1 Gas Detection Using Fluid Identification (FID) Plot.....	50
3.5.6.1.2 Gas Detection Using GR - ($\phi_N - \phi_D$) Plot.....	51
3.5.6.2 Water Saturation Determination.....	52
3.5.6.2.1 Water Saturation of Clean Formation.....	52
3.5.6.2.2 Water Saturation of Shaly Formation.....	53
3.5.6.2.2.1 Laminated Shale Model.....	53
3.5.6.2.2.2 Dispersed Shale Model.....	54
3.5.6.2.2.3 Modified Total Shale Model.....	54
3.5.6.2.2.4 Fertl and Hammack Equation.....	54
3.5.6.2.2.5 Fertl Equation.....	55
3.5.6.2.2.6 Indonesian Equation.....	55
3.5.6.2.2.7 Waxman and Smits Model.....	56
3.5.6.2.2.8 Juhasz Model.....	56
3.5.6.2.2.9 Shaly-Sand Model "Dual Water"	57
3.5.6.2.3 Selected Models for Water Saturation Determination.....	58
3.5.6.3 Hydrocarbon Saturation Determination.....	58
